 - a. color
 - b. line
 - c. perspective
 - d. shape
6. Clear, crisp lines are most important in
 - a. *The Adoration of the Christ Child.*
 - b. *Banks of the Seine at Médan.*
 - c. *Ceres (Summer).*
 - d. *Nature Abhors a Vacuum.*
7. In *Tugboat on the Seine, Chatou*, the green color in the trees is contrasted with the complementary color of _____ in the tugboats.
8. Techniques of showing perspective by leaving out details and using paler colors are called
 - a. scientific.
 - b. atmospheric.
 - c. linear.
 - d. none of the above

9. To keep viewers moving throughout the image in *Cardinal Bandinello Sauli, His Secretary, and Two Geographers*, the artist used rhythms of
- texture.
 - shape.
 - line.
 - color.

True/False

10. Contrasts of light and dark are important in *Marchesa Brigida Spinola Doria*.
11. We are drawn quickly into *Lady at the Paris Exposition* by the woman's direct gaze at us.
12. *Abraham Leading Isaac to Sacrifice* and *The Departure of the Boatman* would both fit into the same subject category.
13. A line of shadow falling across the tallest building in *View of the Dogana and Santa Maria della Salute* adds liveliness to the scene.
14. The boy pictured behind the musician in *The Rommel-Pot Player* balances the composition.
15. Texture and perspective are more important than line and shape in *The Musician*.

Art History

16. Which of the following is not a characteristic common in Neoclassical painting?
- playful, lighthearted mood
 - smooth, polished canvas
 - grand themes from history and legend
 - strongly drawn lines
17. John Marin first became famous for working with _____ paints.
18. Which of these portraits was painted by a British artist?
- The Skater (Portrait of William Grant)*
 - Marchesa Brigida Spinola Doria*
 - Mrs. Richard Hogarth*
 - all of the above
19. _____ was one of the leading American artists who painted in the Impressionist style.

20. Everett Shinn first earned his living as
 - a. an engraver.
 - b. a newspaper reporter.
 - c. an architect.
 - d. a boxer.

21. Which work was painted later, *Solitude* or *Kaaterskill Falls*?

22. Which of these artists is best known for painting genre scenes?
 - a. Ingres
 - b. Honthorst
 - c. Gossart
 - d. Frankenthaler

23. Which of these events occurred during the Modern period of art history?
 - a. automobiles became common
 - b. invention of the printing press
 - c. Galileo's scientific discoveries
 - d. invention of the steam engine

24. El Greco's way of painting was admired by later artists who worked in the style called
 - a. Neoclassic.
 - b. Rococo.
 - c. Romantic.
 - d. Pointillist.

True/False

25. Reinier Nooms painted a kind of subject that was especially popular with art customers in his native country.

26. Corot and Caillebotte both frequently provided financial help to other artists.

27. Because of his great skill, Meléndez became a successful and wealthy man.

28. Frans Snyders often worked together on paintings with Frans Hals.

29. *Sunset on the Lagoon, Venice* was painted in a style that developed during the Modern period of art history.

30. Judith Leyster often used both ends of her brush to create the images she painted.

**2019-2020 Art Study Test 1 - Grades 7-8
(Part B)**

Answer Key

Elements	History
1. <i>The Annunciation</i> (23, 67)	16. a (10, 41, 46)
2. a (50)	17. watercolor (64)
3. caterpillar / butterfly (32)	18. c (39)
4. c (49)	19. Hassam (63)
5. c (62)	20. b (60)
6. a (25)	21. <i>Kaaterskill Falls</i> (44, 50)
7. red (8, 16, 59)	22. b (34)
8. b (22)	23. d (41)
9. d (26)	24. c (28)
10. T (29, 31)	25. T (37)
11. F (56)	26. T (52, 53)
12. F (30, 52)	27. F (43)
13. T (40)	28. F (36)
14. T (33)	29. T (11, 41, 58)
15. F (61)	30. T (35)

Numbers in parentheses are page numbers where answers can be found in the *Art Smart Bulletin* for 2019-2020 and 2020-2021. Correct spelling is not required for short answers.

2019-2021 Art Study Test 2 - Grades 7-8
Art Elements

1. Diagonal lines the artist used to picture architecture in *The Annunciation* were intended to
 - a. create a feeling of movement.
 - b. show perspective.
 - c. focus attention on the figures.
 - d. all of the above

2. Which genre scene is a larger original painting, *Setting Out to Fish* or *The Concert*?

3. _____ is a cool primary color.

4. Which of these still life paintings was not created with oils on canvas?
 - a. *Flowers on a Window Ledge*
 - b. *Still Life with Oranges, Jars, and Boxes of Sweets*
 - c. *Still Life with Peaches and Old Glass*
 - d. *Vase of Flowers with a Curtain*

5. The sitter in *Portrait of Hendrik III, Count of Nassau-Breda* appears
 - a. calm and confident.
 - b. busy and energetic.
 - c. gentle and friendly.
 - d. busy and distracted.

6. The ships' masts pictured in *Keelmen Heaving in Coals by Moonlight* offer an example of an artist's use of _____.

7. Color is used to tie foreground and background together in
 - a. *Synchromy in Purple Minor*.
 - b. *The Skater (Portrait of William Grant)*.
 - c. *Madonna and Child with Saint Martina and Saint Agnes*.
 - d. *Banks of the Seine at Médan*.

8. *Pansies in Washington* and *Sunset on the Lagoon, Venice* are most alike in their
 - a. subjects.
 - b. use of color.
 - c. brushwork.
 - d. use of perspective.

9. The artist created a feeling of movement in *Amsterdam Harbor Scene* with
- diagonal lines.
 - round shapes.
 - sunlight and shadow.
 - complementary colors.

True/False

10. In *Still Life with Peaches and Old Glass*, the fruit and jars provide a contrast of textures.
11. The term canvas may be used to refer to a painting or to the type of surface on which the painting is created.
12. The lion under the woman's hand in *Ceres (Summer)* is the symbol that identified her to viewers.
13. Viewers see the Madonna and Child from a lower point of view in *Madonna and Child* than in *Madonna and Child with Saint Martina and Saint Agnes*.
14. Realistic detail is more important in *By the Seine* than in *View of the Dogana and Santa Maria della Salute*.
15. The artist included live animals in *Still Life with Grapes and Game* to add interest.

Art History

16. _____ is often called "the forgotten Impressionist."
17. Corot's father was
- a banker.
 - a doctor.
 - an engraver.
 - a merchant.
18. Which of these artists painted during the Baroque period?
- Gossart
 - Honthorst
 - Ingres
 - Sebastiano
19. *Solitude* was painted by an artist whose nationality was _____.

20. Kensett was one of the founders of the
 - a. Impressionist style.
 - b. British Royal Academy.
 - c. Metropolitan Museum of Art.
 - d. American Society of Painters in Watercolor.

21. Marcoussis was born in
 - a. France.
 - b. Italy.
 - c. Poland.
 - d. Spain.

22. New discoveries in science encouraged a more realistic approach toward painting during the period of art history.

23. Which of these artists came from a family that included other painters?
 - a. Bellini
 - b. Jiménez Aranda
 - c. Meléndez
 - d. all of the above

24. Although he traveled extensively, for most of his life John Singer Sargent lived in
 - a. London.
 - b. New York.
 - c. Paris.
 - d. Rome.

True/False

25. The Romantic style of painting developed later than the Impressionist style did.

26. Judith Leyster's painting was influenced by the work of Frans Hals.

27. Helen Frankenthaler used thick paints and active brushwork to portray the landscape scenes she liked to paint.

28. Sir Peter Paul Rubens was knighted by King Charles I of England for his diplomatic services.

29. Both Watteau and Hogarth often used characters or ideas from the theater in their works.

30. Some of Botticelli's works were actually painted by assistants in his workshop.

**2019-2020 Art Study Test 2 - Grades 7-8
(Part B)**

Answer Key

Elements			History		
1.	b	(23)	16.	Bazille	(51)
2.	<i>The Concert</i>	(67)	17.	d	(52)
3.	blue	(9, 11, 15, 16)	18.	b	(34)
4.	d	(67)	19.	British	(44)
5.	a	(27)	20.	c	(49)

A+ ACADEMICS

University Interscholastic League

Calculator Applications

**DO NOT OPEN TEST
UNTIL TOLD TO DO SO**

How to Write the Answers

A. For all problems except stated problems as noted below—write three significant digits.

1. Examples (* means correct but not recommended)

Correct: 12.3, 123, 123.*, 1.23x10*, 1.23x10^{0*}
1.23x10¹, 1.23x10⁰¹, .0190, 0.0190, 1.90x10⁻²

Incorrect: 12.30, 123.0, 1.23(10)², 1.23·10², 1.230x10²,
1.23*10², 0.19, 1.9x10⁻², 19.0x10⁻³, 1.90E-02,

answers written in parentheses(), brackets[] or braces{} are incorrect

2. Plus or minus one digit error in the third significant digit is permitted.

B. For stated problems

1. Except for integer and dollar sign problems, answers to stated problems should be written with three significant digits.

2. Integer problems are indicated by (integer) in the answer blank. Integer problems answers must be exact, no plus or minus one digit, no decimal point or scientific notation.

3. Dollar sign (\$) problems should be answered to the exact cent, but plus or minus one cent error is permitted. Answers must be in fixed notation. The decimal point and cents are required for exact-dollar answers.

Calculator Applications

**DO NOT OPEN TEST
UNTIL TOLD TO DO SO**

How to Write the Answers

A. For all problems except stated problems as noted below—write three significant digits.

1. Examples (* means correct but not recommended)

Correct: 12.3, 123, 123.*, 1.23x10*, 1.23x10^{0*}
1.23x10¹, 1.23x10⁰¹, .0190, 0.0190, 1.90x10⁻²

Incorrect: 12.30, 123.0, 1.23(10)², 1.23·10², 1.230x10²,
1.23*10², 0.19, 1.9x10⁻², 19.0x10⁻³, 1.90E-02,

answers written in parentheses(), brackets[] or braces{} are incorrect

2. Plus or minus one digit error in the third significant digit is permitted.

B. For stated problems

1. Except for integer and dollar sign problems, answers to stated problems should be written with three significant digits.

2. Integer problems are indicated by (integer) in the answer blank. Integer problems answers must be exact, no plus or minus one digit, no decimal point or scientific notation.

3. Dollar sign (\$) problems should be answered to the exact cent, but plus or minus one cent error is permitted. Answers must be in fixed notation. The decimal point and cents are required for exact-dollar answers.

2019 University Interscholastic League MS/JH Calculator Contest B

19Y-1. $-815 - 309$ ----- 1= _____

19Y-2. $45 - 25 + 31$ ----- 2= _____

19Y-3. $87 + 39 - 36$ ----- 3= _____

19Y-4. $\pi - 14 - 8 + 16$ ----- 4= _____

19Y-5. $1560 - 4510 - 4210 + 6060$ ----- 5= _____

19Y-6. $202 - 176 - 54.5 - 139 + 244$ ----- 6= _____

19Y-7. $(3.17 - 1.24) + (0.642 - 1.25 - 2.11)$ ----- 7= _____

19Y-8. $5.62 + 2.98 + 7.19 + \pi + 1.18$ ----- 8= _____

19Y-9. $344 \times 51.7 \times 52.1$ ----- 9= _____

19Y-10. $1670 \times 22.1 \times 5000 \times 31.3$ ----- 10= _____

19Y-11. What is the sum of 16.4, pi, and positive square root of 29? 11= _____

19Y-12. A rectangular block of wood has a mass of 83 grams and a volume of 92 cm^3 . What is the wood's density? ----- 12= _____ g/cm^3

19Y-13. A car has a miles per gallon (mpg) rating of 27.6 mpg. How many miles will the car travel on 16.3 gallons of fuel? ----- 13= _____ miles

19Y-14. $(224)[85 \times 79 \times 455]$ ----- 14= _____

19Y-15. $(81)[116 \times 84/16]$ ----- 15= _____

19Y-16. $\left[\frac{555}{122}\right] [(585/149) - 2.67]$ ----- 16= _____

19Y-17. $(203 + 504)[120 - 346 - 323]$ ----- 17= _____

19Y-18. $\left[\frac{(8950/7120) - (6200/1920)}{0.398/(0.699)}\right]$ ----- 18= _____

19Y-19. $\frac{(57/112) + (190/183)}{(6.70 \times 10^{-4} - 9.34 \times 10^{-4})}$ ----- 19= _____

19Y-20. $(\pi)[310/413 \times 545/344] - 1.47$ ----- 20= _____

19Y-21. $\frac{(\pi)(2/13)(2/14)}{59}$ ----- 21= _____

19Y-22. $\frac{(\pi + 3.17 - 2.79)}{\{(0.00224 - 0.00966)/(856)\}}$ ----- 22= _____

19Y-23. $\left[\frac{465 + 359}{839 - 1320}\right] \left[\frac{583}{1430}\right]$ ----- 23= _____

19Y-24. According to my car's temperature probe, the outside temperature was 98°F. The actual outside air temperature was 92.5°F. What is the percent error in the probe's temperature reading?----- 24= _____ %

19Y-25. I bought a box of cat litter that was priced at \$19.79. If I used a \$2-off coupon and sale tax is 8¼%, how much did the cat litter cost? 25=\$ _____

19Y-26. If there are 640 acres in one square mile, how many square feet are in one acre? ----- 26= _____ ft²(Integer)

19Y-27. $(0.00196) \left[\left[\frac{0.00149}{(3.82 \times 10^{-4})} \right] \left[\frac{211}{(122)} \right] \right]$ ----- 27= _____

19Y-28. $(682) \left[\left(\frac{64.4}{67.3} \right) (118 + 49) \right]$ ----- 28= _____

19Y-29. $[6050 - (5710 + 4470)] + [(14.2)(826 - 1000)]$ ----- 29= _____

19Y-30. $\frac{(0.0305 + 0.0813)}{(9.91 \times 10^{10})}$ ----- 30= _____

19Y-31. $(68) \left[(7.94 \times 10^9) - (3.74 \times 10^{10}) \right]$ ----- 31= _____

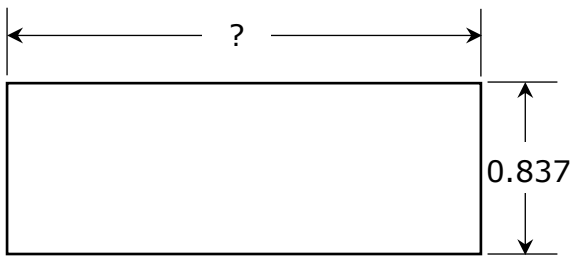

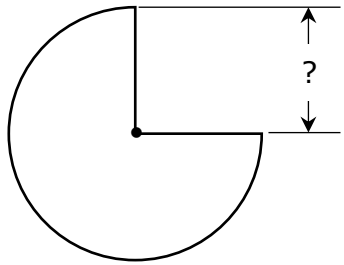

19Y-32. $(0.0123) \left[\frac{0.249}{(3.77 \times 10^7)} \right]$ ----- 32= _____

19Y-33. $\frac{1}{21.8} - \frac{1}{(50.7 + 123)}$ ----- 33= _____

19Y-34. $\left[\frac{1/475}{1/510} \right] + [0.407]$ ----- 34= _____

19Y-35. In Mackenzie's gym class there are 28 boys and 23 girls. If every day the teacher randomly chooses one student to take the roll sheet to the attendance office, what is the probability that it will be a girl? ---- 35= _____

19Y-36. A 10-foot ladder is leaned up against a building wall. If the bottom of the ladder is on level ground and 3 ft 8 in from the bottom of the wall, how far up the wall is the top of the ladder? ----- 36= _____ ft

<p>19Y-37. RECTANGLE</p>  <p style="text-align: center;">Perimeter = 5.25</p> <p>19Y-37= _____</p>	<p>19Y-38. THREE-QUARTERS CIRCLE</p>  <p style="text-align: center;">Area = 500</p> <p>19Y-38= _____</p>
--	--

19Y-39. $\left[\frac{221}{2.89}\right](0.289 + 0.992)^4$ ----- 39= _____

19Y-40. $\sqrt[4]{\frac{17.4 + 4.49}{5240 - 1900}}$ ----- 40= _____

19Y-41. $\frac{(15000 + 19100)^3}{(0.0819 - 0.0772)^2}$ ----- 41= _____

19Y-42. $\sqrt{(31.5/11.4) + 1.93 - 0.657}$ ----- 42= _____

19Y-43. $(35500)\sqrt{7680 + 1830 + 8610}$ ----- 43= _____

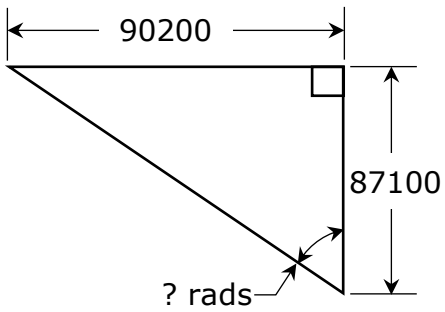

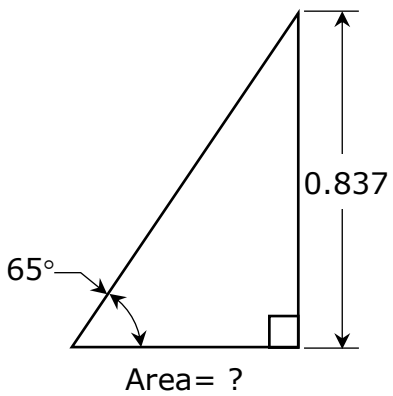

19Y-44. $(1/\pi)\sqrt[3]{\frac{0.139 + 0.124}{0.0471 - 0.0211}}$ ----- 44= _____

19Y-45. $\frac{1}{\sqrt{436 + 1060 + 372}} + \left(\frac{1}{\sqrt{5.46}}\right)^3$ ----- 45= _____

19Y-46. $\sqrt[3]{2.06 - 2990/4710} + 1/\sqrt{0.29 + 0.191}$ ----- 46= _____

19Y-47. A steel pipe, 16 inches in diameter, stretches from Cushing, Oklahoma to Houston, Texas; a distance of 511 miles. If the pipe is filled with natural gas, how much gas is in the pipe? ----- 47= _____ cu.ft.

19Y-48. Liz found out that a company charges \$250 plus \$7.75 per person to host a birthday party for one of her sons. If there were a total of 18 individuals at the party, how much did it cost? ----- 48=\$ _____

<p>19Y-49. RIGHT TRIANGLE</p>  <p style="text-align: center;">19Y-49= _____ rads</p>	<p>19Y-50. RIGHT TRIANGLE</p>  <p style="text-align: center;">19Y-50= _____</p>
--	--

19Y-51. $\frac{(0.00822 + 0.00484 - 0.00149)^2}{\sqrt{0.0392 + 0.291 + 0.31}}$ ----- 51= _____

19Y-52. $\sqrt{\frac{7.83 \times 10^{-5}}{(0.24)(890)} + \frac{(0.042 - 0.0335)}{(5.51 + 4.71)}}$ ----- 52= _____

19Y-53. $\left[\frac{5.09 - 3.32 + \sqrt{2.49/1.71}}{-198 + 326} \right]^{-2}$ ----- 53= _____

19Y-54. $\sqrt{\frac{(11900)(41100)}{(50600)(2850)}} - 0.786 + 0.202$ ----- 54= _____

19Y-55. $21200 + \sqrt{(18400)(21400)} - (6870 + 3750)$ ----- 55= _____

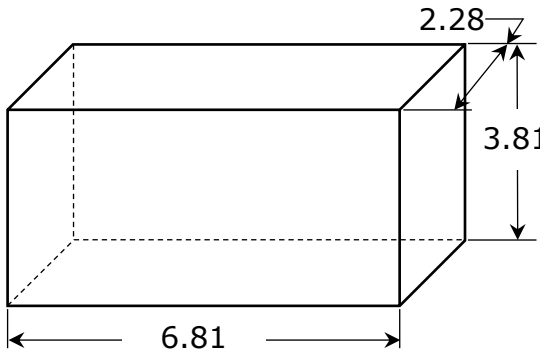

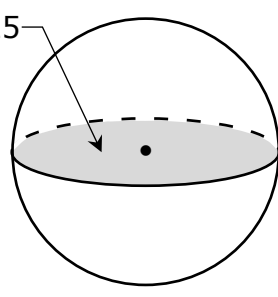

19Y-56. $0.969 + \sqrt{(1970)/(1480)} - (0.511 + 0.639)^2$ ----- 56= _____

19Y-57. $\sqrt{\frac{1/(17.9 - 16.6)}{(194)(17.9 + 4.79)^{-2}}}$ ----- 57= _____

19Y-58. $\sqrt{\frac{(29.9)(86.5)}{(217) + (123)}} - 2.92$ ----- 58= _____

19Y-59. A formula for calculating the final speed of an object dropping in a gravitational field is found by adding the initial speed to the product of the value of the acceleration due to gravity and the time for that acceleration. An object is thrown downward with an initial speed of 4.75 feet/second on the airless Moon where the acceleration due to gravity is 5.36 feet/second². If the object takes 2.83 seconds to land, what is the speed of the object upon landing? ----- 59= _____ ft/sec

19Y-60. An equation, studied by many high school Physics students, is called the lens equation. It states that the reciprocal of the focal length of a lens is equal to the sum of the reciprocal of the object distance and the reciprocal of the image distance. If the focal length of a lens is 35 millimeters and the image distance is 36 millimeters, what is the object distance? ----- 60= _____ meters

<p>19Y-61. RECTANGULAR BOX</p>  <p style="text-align: center;">Total Surface Area = ?</p> <p>19Y-61= _____</p>	<p>19Y-62. SPHERE</p> <p style="text-align: center;">Shaded Area 0.00825</p>  <p style="text-align: center;">Volume = ?</p> <p>19Y-62= _____</p>
--	--

19Y-63. $\frac{6! - 8!}{14!}$ ----- 63= _____

19Y-64. (deg) $(157 - 261)\tan(933^\circ)$ ----- 64= _____

19Y-65. $(106 - \pi)e^{0.379}$ ----- 65= _____

19Y-66. (rad) $\sin\left[\frac{(4.2)(\pi)}{(50.1)(2.61)}\right]$ ----- 66= _____

19Y-67. (deg) $\tan(1.74^\circ - 0.351^\circ) + 0.00383$ ----- 67= _____

19Y-68. (deg) $\frac{\sin(49.4^\circ) - \tan(49.4^\circ)}{\sin(49.4^\circ)}$ ----- 68= _____

19Y-69. (deg) $\frac{\sin(5.61^\circ)}{\tan(5.61^\circ)}[622]$ ----- 69= _____

19Y-70. $(16.5 + 54.3 + 43.1)^{2/5}$ ----- 70= _____

19Y-71. The international Space Station (ISS) is currently 211 miles above the Earth's surface. If the radius of the Earth is 3960 miles and the ISS take 93 minutes to circle once around in orbit, how fast is the ISS moving in orbit around the Earth?----- 71= _____ mph

19Y-72. If a light beam travels with the speed of 186,000 miles/second, how long does it take to travel 132 feet across a gym floor? ----- 72= _____ s

19Y-73.

SQUARE AND RECTANGLE

Rectangle Area = 2.1 x Square Area

AD = ?

19Y-73= _____

19Y-74.

CUBE AND RIGHT CYLINDER CAVITY

Shaded Area = 3.95×10^9

Volume Remaining = ?

19Y-74= _____

19Y-75. $\frac{\text{Log}(7.78 \times 10^{10} + 5.50 \times 10^{11})}{0.514}$ ----- 75= _____

19Y-76. $\frac{(6.48)^{0.686}(48.2)^{0.986}}{(9.17 - 5.3)^{-10}}$ ----- 76= _____

19Y-77. $(9010)_{10}^{(0.388)}(3.51)$ ----- 77= _____

19Y-78. $(7.39)^\pi(0.0301)^2(415 - 276)^4$ ----- 78= _____

19Y-79. $1 + 2 + 3 + \dots + 539$ ----- 79= _____

19Y-80. $1 + 0.16 + (0.16)^2 + \frac{(0.16)^4}{8} - \frac{(0.16)^5}{15}$ ----- 80= _____

$$19Y-31 = -2.00 \times 10^{12}$$

$$19Y-32 = 8.12 \times 10^{-11}$$

$$19Y-33 = 0.0401 \\ = 4.01 \times 10^{-2}$$

$$19Y-34 = 1.48 \\ = 1.48 \times 10^0$$

$$19Y-35 = 0.451 \\ = 4.51 \times 10^{-1}$$

$$19Y-36 = 9.30 \\ = 9.30 \times 10^0$$

$$19Y-37 = 1.79 \\ = 1.79 \times 10^0$$

$$19Y-38 = 14.6 \\ = 1.46 \times 10^1$$

2019 University Interscholastic League MS/JH Calculator Contest B Answer Key

19Y-39 = 206	19Y-51 = 0.000167	19Y-61 = 100	19Y-73 = 30.0
= 2.06×10^{-2}	= 1.67×10^{-4}	= 1.00×10^{-2}	= 3.00×10^1
19Y-40 = 0.285	19Y-52 = 0.00144	19Y-62 = 0.000564	19Y-74 = 8.16×10^{17}
= 2.85×10^{-1}	= 1.44×10^{-3}	= 5.64×10^{-4}	19Y-75 = 23.0
19Y-41 = 1.80×10^{18}	19Y-53 = 1850	19Y-63 = -4.54×10^{-7}	= 2.30×10^1
19Y-42 = 2.01	= 1.85×10^3	19Y-64 = -67.5	19Y-76 = 1.24×10^8
= 2.01×10^0	19Y-54 = 1.26	= -6.75×10^1	19Y-77 = 207000
19Y-43 = 4.78×10^6	= 1.26×10^0	19Y-65 = 150	= 2.07×10^5
19Y-44 = 0.688	19Y-55 = 30400	= 1.50×10^2	19Y-78 = 1.81×10^8
= 6.88×10^{-1}	= 3.04×10^4	19Y-66 = 0.101	19Y-79 = 146000
19Y-45 = 0.102	19Y-56 = 0.800	= 0.101×10^{-1}	= 1.46×10^5
= 1.02×10^{-1}	= 8.00×10^{-1}	19Y-67 = 0.0281	19Y-80 = 1.19
19Y-46 = 2.57	19Y-57 = 1.43	= -0.537×10^{-1}	= 1.19×10^0
= 2.57×10^0	= 1.43×10^0	19Y-68 = -0.537	19Y-80 = 1.19
19Y-47 = 3.77×10^6	19Y-58 = -0.162	= -5.37×10^{-1}	= 1.19×10^0
19Y-48 = 389.50	= -1.62×10^{-1}	19Y-69 = 619	19Y-80 = 1.19
Dollar Answer	19Y-59 = 19.9	= 6.19×10^{-2}	19Y-80 = 1.19
19Y-49 = 0.803	= 8.03×10^{-1}	19Y-70 = 6.65	19Y-80 = 1.19
= 0.803×10^{-1}	19Y-60 = 1.26	= 6.65×10^0	19Y-80 = 1.19
19Y-50 = 0.163	= 1.26×10^0	19Y-71 = 16900	19Y-80 = 1.19
= 1.63×10^{-1}	19Y-60 = 1.26	= 1.69×10^4	19Y-80 = 1.19
19Y-50 = 0.163	19Y-60 = 1.26	19Y-72 = 1.34×10^{-7}	19Y-80 = 1.19
= 1.63×10^{-1}	19Y-60 = 1.26	= 1.34×10^{-7}	19Y-80 = 1.19

SPRING DISTRICT 2018-2019

A+ ACADEMICS

Calculator Applications

**DO NOT OPEN TEST
UNTIL TOLD TO DO SO**

How to Write the Answers

A. For all problems except stated problems as noted below—write three significant digits.

1. Examples (* means correct but not recommended)

Correct: 12.3, 123, 123.*, 1.23x10*, 1.23x10^{0*}
1.23x10¹, 1.23x10⁰¹, .0190, 0.0190, 1.90x10⁻²

Incorrect: 12.30, 123.0, 1.23(10)², 1.23·10², 1.230x10²,
1.23*10², 0.19, 1.9x10⁻², 19.0x10⁻³, 1.90E-02,

answers written in parentheses(), brackets[] or braces{} are incorrect

2. Plus or minus one digit error in the third significant digit is permitted.

B. For stated problems

1. Except for integer and dollar sign problems, answers to stated problems should be written with three significant digits.

2. Integer problems are indicated by (integer) in the answer blank. Integer problems answers must be exact, no plus or minus one digit, no decimal point or scientific notation.

3. Dollar sign (\$) problems should be answered to the exact cent, but plus or minus one cent error is permitted. Answers must be in fixed notation. The decimal point and cents are required for exact-dollar answers.

19Z-1. $643 - 1110$ ----- 1= _____

19Z-2. $15 + 34 - 60$ ----- 2= _____

19Z-3. $-2700 - 1660 + 3670$ ----- 3= _____

19Z-4. $\pi - 27 - 25 - 17$ ----- 4= _____

19Z-5. $-52 + 146 - 177 - 355$ ----- 5= _____

19Z-6. $134 - 81.6 - 59.5 + 137 + 169$ ----- 6= _____

19Z-7. $-0.281 + 1.14 - 0.608 + 1.34 + 0.452$ ----- 7= _____

19Z-8. $0.19 - 1.33 + 1.37 - 1.24 - 0.802$ ----- 8= _____

19Z-9. $142 \times 117 \times 213$ ----- 9= _____

19Z-10. $187 \times 1180 \times 208 \times 933$ ----- 10= _____

19Z-11. What is the positive difference between two pi and $\frac{13}{7}$? ----- 11= _____

19Z-12. A rectangular block of wood has a mass of 79.3 grams and a volume of 90 cm^3 . What is the wood's density? ----- 12= _____ g/cm^3

19Z-13. A car has a mile per gallon (mpg) rating of 31.6 mpg. How many miles will the car travel on 16.5 gallons of fuel? ----- 13= _____ miles

19Z-14. $(-77)[131 \times 71 \times 66]$ -----14= _____

19Z-15. $(-217)[89 \times 189/135]$ -----15= _____

19Z-16. $\{52/45\} \left[\frac{311}{300 + 47} \right]$ -----16= _____

19Z-17. $\left[\frac{73}{51} \right] [(27/13) + 0.785]$ -----17= _____

19Z-18. $\frac{[0.109/(0.165)]/0.709}{(6.65 \times 10^{-4} \times 4.84 \times 10^{-4})(1.12)}$ -----18= _____

19Z-19. $\left[\frac{68/59}{134/101} \right] \{0.327 + 0.229 - 1.6\}$ -----19= _____

19Z-20. $(1.55)[68/132 \times 232/212] - 0.728$ -----20= _____

19Z-21. $\frac{(1440)(282)}{0.0176} (0.00117 - 0.00108)$ -----21= _____

19Z-22. $\frac{(\pi)(87/113)(95/67)}{(41/124)}$ -----22= _____

19Z-23. $\left[\frac{760 + 4610}{1880 - 4090} \right] \left[\frac{5020}{2530} \right]$ -----23= _____

19Z-24. According to my car's temperature probe, the outside temperature was 67°F. The actual outside air temperature was 66.5°F. What is the percent error in the probe's temperature reading? -----24= _____ %

19Z-25. I bought a box of cat litter that was priced at \$17.99. If I used a \$2-off coupon and sale tax is 8¼%, how much did the cat litter cost? -25=\$ _____

19Z-26. If there are 640 acres in one square mile, how many square yards (yds) are in one acre? -----26= _____ yds²(Integer)

19Z-27. $[1930 - (472 + 1840)] + [(0.381)(1570 - 1850)]$ -----27= _____

19Z-28. $(0.00331)[[5.4/(4.56)][0.0284/(0.0172)]]$ -----28= _____

19Z-29. $\frac{(35.4 - 36.9)(0.0093 + 0.0126)}{(1.61 \times 10^{11})}$ -----29= _____

19Z-30. $\frac{(0.0202 + 0.0219)}{(7.00 \times 10^{11})}$ -----30= _____

19Z-31. $\frac{1}{501} + \frac{1}{(468 - 270)}$ -----31= _____

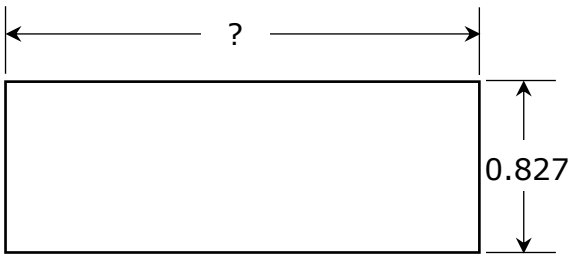

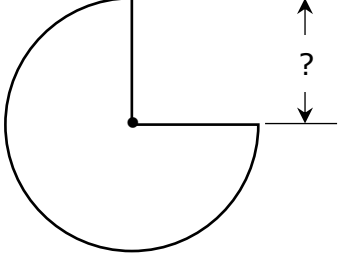

19Z-32. $[0.0297] \left[\frac{1/4570}{1/(5050)} \right]$ -----32= _____

19Z-33. $\frac{1}{253} - \frac{1}{(346 + 288)}$ -----33= _____

19Z-34. $\frac{1}{173} - \frac{1}{115} + \frac{1}{26.6}$ -----34= _____

19Z-35. In Mackenzie's gym class there are 32 boys and 24 girls. If every day the teacher randomly chooses one student to take the roll sheet to the attendance office, what is the probability that it will be a girl? ----35= _____

19Z-36. A 12-foot ladder is leaned up against a building wall. If the bottom of the ladder is on level ground and 3 ft 8 in from the bottom of the wall, how far up the wall is the top of the ladder? -----36= _____ ft

<p>19Z-37.</p> <p style="text-align: center;">RECTANGLE</p>  <p style="text-align: center;">Perimeter = 5.45</p> <p>19Z-37= _____</p>	<p>19Z-38.</p> <p style="text-align: center;">THREE-QUARTERS CIRCLE</p>  <p style="text-align: center;">Area = 0.846</p> <p>19Z-38= _____</p>
--	--

19Z-39. $\left[\frac{1780 + (1/(0.00229))}{(1700/494) - 2.79} \right]^2$ -----39= _____

19Z-40. $(874 + 159 + 876)^2(760 + 1300)^2$ -----40= _____

19Z-41. $\left[\frac{2390}{205} \right](50.2 + 52.3)^4$ -----41= _____

19Z-42. $(1/(4.29 \times 10^{-4}))(1410 - 2010)^3$ -----42= _____

19Z-43. $\sqrt{(1140/1930) + 0.478 - 0.275}$ -----43= _____

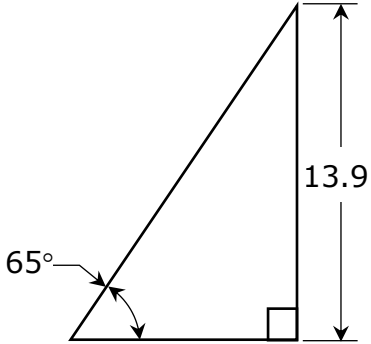

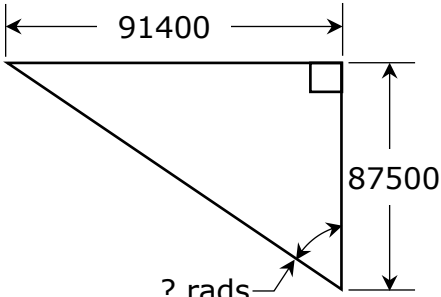

19Z-44. $\sqrt{1430 - 1290 + 1300} - \sqrt{335}$ -----44= _____

19Z-45. $\sqrt[3]{3.14 - 1750/1310} + 1/\sqrt{0.0571 + 0.15}$ -----45= _____

19Z-46. $\frac{1}{\sqrt{156 + 184 + 187}} + \left(\frac{1}{\sqrt{4.56}} \right)^3$ -----46= _____

19Z-47. A steel pipe, 16 inches in diameter, stretches from Andrews, Texas to Houston, Texas; a distance of 463 miles. If the pipe is filled with natural gas, how much gas is in the pipe? -----47= _____ cu.ft.

19Z-48. Liz found out that a company charges \$250 plus \$8.50 per person to host a birthday party for one of her sons. If there were a total of 21 individuals at the party, how much did it cost? -----48=\$ _____

<p>19Z-49.</p> <p style="text-align: center;">RIGHT TRIANGLE</p>  <p style="text-align: center;">Area = ?</p> <p>19Z-49= _____</p>	<p>19Z-50.</p> <p style="text-align: center;">RIGHT TRIANGLE</p>  <p style="text-align: right;">? rads</p> <p>19Z-50= _____ rads</p>
---	--

19Z-51. $\left[\frac{716 + 1060 + \sqrt{2.91 \times 10^6 + 2.32 \times 10^6}}{21/20.2} \right]^3$ -----51= _____

19Z-52. $\frac{(12 + 27.3 - 33.8)^3}{\sqrt{64.2 + 54.1 + 50.4}}$ -----52= _____

19Z-53. $\left[\frac{4820 - 3590 + \sqrt{1.50 \times 10^6 / 4.93}}{-12 + 18.5} \right]^{-4}$ -----53= _____

19Z-54. $(98.6)^2 \sqrt{(3.89)/(334)} - (791 + 182)$ -----54= _____

19Z-55. $\sqrt{\frac{(21900)(1.72 \times 10^5)}{(7220)(48600)}} - 2.69 + 1.06$ -----55= _____

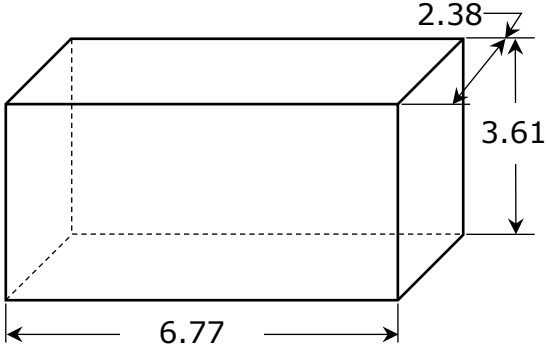

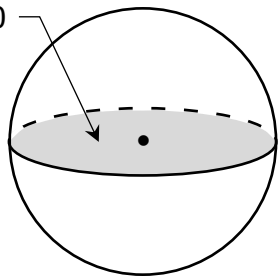

19Z-56. $0.979 + \sqrt{(137)/(87.9)} - (0.358 + 0.182)^2$ -----56= _____

19Z-57. $\sqrt{\frac{(22.5)(656)}{(19.7) + (59.1)}} - 14.7$ -----57= _____

19Z-58. $(\text{deg}) \sin(1800^\circ) + (38.7/20.7)$ -----58= _____

19Z-59. A formula for calculating the final speed of an object dropping in a gravitational field is found by adding the initial speed to the product of the value of the acceleration due to gravity and the time for that acceleration. An object is thrown downward with an initial speed of 5.75 feet/second on the airless Moon where the acceleration due to gravity is 5.36 feet/second². If the object takes 2.75 seconds to land, what is the speed of the object upon landing? -----59= _____ ft/sec

19Z-60. An equation, studied by many high school Physics students, is called the lens equation. It states that the reciprocal of the focal length of a lens is equal to the sum of the reciprocal of the object distance and the reciprocal of the image distance. If the focal length of a lens is 50 millimeters and the image distance is 51 millimeters, what is the object distance?-----60= _____ meters

<p>19Z-61. RECTANGULAR BOX</p>  <p style="text-align: center;">Total Surface Area = ?</p> <p>19Z-61= _____</p>	<p>19Z-62. SPHERE</p> <p style="text-align: center;">Shaded Area 967000</p>  <p style="text-align: center;">Volume = ?</p> <p>19Z-62= _____</p>
---	--

19Z-63. $\frac{25!}{22!}$ -----63= _____

19Z-64. $(9.03 \times 10^5 - 5.50 \times 10^5)^{-8} (1.05 \times 10^8)$ -----64= _____

19Z-65. (deg) $\frac{\cos(1.73^\circ)}{3020}$ -----65= _____

19Z-66. (rad) $\frac{\cos(26.8)}{49.3/733}$ -----66= _____

19Z-67. (deg) $\sin(23.6^\circ - 7.43^\circ) + 0.124$ -----67= _____

19Z-68. (rad) $\sin[(52.7 - 47.4)(15.8)]$ -----68= _____

19Z-69. (deg) $\frac{\sin(0.692^\circ) - \tan(0.692^\circ)}{\sin(0.692^\circ)}$ -----69= _____

19Z-70. $(836 + 830 + 589)^{2/5}$ -----70= _____

19Z-71. The international Space Station (ISS) is currently 211 miles above the Earth's surface. If the radius of the Earth is 3960 miles and the ISS take 94.6 minutes to circle once around in orbit, how fast is the ISS moving in orbit around the Earth? -----71= _____ mph

19Z-72. If a light beam travels with the speed of 186,000 miles/second, how long does it take to travel 300 feet across a football field?-----72= _____ s

19Z-73.

SQUARE AND RECTANGLE

Area BCDE = 2.4 x Square Area

AD = ?

19Z-73= _____

19Z-74.

CUBE AND RIGHT CYLINDER CAVITY

Shaded Area = 4.25×10^9

Volume Remaining = ?

19Z-74= _____

19Z-75. $\frac{0.792 + \sqrt{(0.336)(0.796) + (0.453)(1.13)}}{\sqrt{\sqrt{0.278 + 0.252}}}$ -----75= _____

19Z-76. $\frac{(2.26)^{0.407}(8.78)^{0.711}}{(1.19 - 0.46)^{-10}}$ -----76= _____

19Z-77. $\text{Log} \sqrt{\frac{6.36 - 1.36}{(11.4)(7.13)}}$ -----77= _____

19Z-78. $(179)^\pi (7.8)^5 (150 - 140)^5$ -----78= _____

19Z-79. $1 + 2 + 3 + \dots + 595$ -----79= _____

19Z-80. $1 + (0.15) + \frac{(0.15)^2}{2} + \frac{(0.15)^3}{6} + \frac{(0.15)^4}{24}$ -----80= _____

UNTIL TOLD TO DO SO**

How to read and answer questions on this test

- To answer the questions on this test, you'll need to know how to read chess moves. It's simple to do.
- Every square on the board has an "address" made up of a letter and a number.

Piece Names	Each chessman can also be represented by a symbol, except for the pawn. (Figurine Notation)
King	
Queen	
Rook	
Bishop	
Knight	
Pawn	a-h (We write the file it's on.)

- To make them easy to read, the questions on this test use the figurine piece symbols on the right, above.
- When answering the puzzle questions, remember that white pawns move "up" the diagrams. Black pawns move "down" the diagrams.

At right are two sample moves.

If you look closely at the diagrams in the questions below, you'll see that the frame around the diagram labels the ranks (1-8) and files (a-h) to help you.

White has just played **e4**. Black has just played ... **Nf6**.

#1. Black to move

What term best describes this situation?

- a) Black is in checkmate.
- b) Black is in stalemate.
- c) Black is in check.
- d) None of the above.

#2. Black to move

What term best describes this situation?

- a) Black is in checkmate.
- b) Black is in stalemate.
- c) Black is in check.
- d) None of the above.

#3. Black to move

What term best describes this situation?

- a) Black is in checkmate.
- b) Black is in stalemate.
- c) Black is in check.
- d) None of the above.

#4.

Black just played c7 to c5. Which pawn can be captured?

- a) Black's b-pawn
- b) Black's d-pawn
- c) Black's c-pawn
- d) All of the above

#5.

Which side has material advantage?

- a) White
- b) It is even.
- c) Black
- d) It is not possible to tell.

#6. White to move

Which move is possible for Black?

- a) Short Castle.
- b) Long Castle.
- c) Both A and B.
- d) Neither A or B.

#7. White to move

What is the outcome of the game?

- a) White wins
- b) Black wins
- c) Draw
- d) Impossible to tell

#8. White to move

What is the best move?

- a) Promote to a Queen
- b) Promote to a Rook
- c) Promote to a Knight
- d) Move the King to d6

#9. White to move

White can checkmate Black in two moves, what's the *first* move?

- a) b3
- b) ♖×h7
- c) ♕a3
- d) ♖×h2

#10. White to move

What is White's best move?

- a) b×a7
- b) b×c7
- c) ♖×a7
- d) b7

#11. White to move

What is White's best move?

- a) ♘×e4
- b) ♘c4
- c) ♖×e4
- d) ♘b3

#12. White to move

What is White's best move?

- a) ♖b8
- b) ♖e6
- c) ♖×g6
- d) ♘×e5

#13. White to move

White can checkmate Black in two moves, what is the *first* move?

- a) $\text{N} \times \text{f6}$
- b) $\text{N} \times \text{b6}$
- c) $\text{N} \times \text{c7}$
- d) $\text{N} \times \text{b4}$

#14. White to move

What is White's best move?

- a) $\text{Q} \text{h5}$
- b) $\text{Q} \text{b5}$
- c) $\text{Q} \text{c4}$
- d) $\text{N} \text{c3}$

#15. White to move

What is White's best move?

- a) $\text{Q} \times \text{d5}$
- b) $\text{Q} \times \text{f5}$
- c) $\text{R} \text{g8}$
- d) $\text{Q} \times \text{f3}$

#16. White to move

White can checkmate Black in two moves, what is the *first* move?

- a) $\text{N} \times \text{d5}$
- b) $\text{K} \text{a8}$
- c) $\text{R} \times \text{c7}$
- d) $\text{K} \times \text{d5}$

#17. White to move

White can checkmate Black in three moves, what is the *first* move?

- a) ♘e7
- b) ♕xh7
- c) ♘f6
- d) ♖g1

#18. White to move

What is White's best move?

- a) ♖b2
- b) ♖a8
- c) ♖a3
- d) ♖h2

#19. White to move

What is White's best move?

- a) ♘g4
- b) ♙x e5
- c) f4
- d) ♘c4

#20. White to move

If White can checkmate Black in two moves, what's the *first* move?

- a) ♕xg8
- b) ♖xg7
- c) ♕xh6
- d) ♕g6

1. A diner is a restaurant in the shape of a what?
A. tunnel
B. pyramid
C. railroad car
D. lighthouse
2. How long is the Tennessee River?
A. 652 miles
B. 4002 miles
C. 1049 miles
D. 625 miles
3. Methylene blue is a dye used to reverse the effects of what type of poisoning?
A. food
B. cyanide
C. carbon monoxide
D. lead
4. In a no-hitter baseball game, the pitcher does not allow the opposition what type of hits?
A. fast
B. bounce
C. base
D. curve
5. How old would a person be if they were an octogenarian?
A. 74
B. 26
C. 66
D. 81
6. Auguste Piccard and Jacques Piccard are two Swiss scientist that developed what?
A. the bathyscaphe
B. the airplane
C. the stapler
D. the telephone
7. How many passengers does a roadster fit?
A. 1
B. 4
C. 2
D. 7
8. A person born or living in Madagascar is called what?
A. a Mada
B. a Malagasy
C. a Gasy
D. a Gaspar
9. Amblyopia is reduced vision in one eye and is also called what?
A. cataract
B. retina
C. optic nerve disorder
D. lazy eye
10. What type of pattern is printed on a chintz?
A. rainbow
B. chevron
C. flowery
D. southwestern

11. What happens to a process or progress when it is expedited?
 A. it is cancelled
 B. it is sped up
 C. it is slowed down
 D. it is reversed
12. How many days in a row is the Roman Catholic devotion novena said?
 A. 9
 B. 6
 C. 19
 D. 5
13. Which of the following lakes is not part of the Great Lakes?
 A. Superior
 B. Ontario
 C. Erie
 D. Conroe
14. A Dane is a person that refers to someone born or living in what country?
 A. Dominica
 B. Danube
 C. Denmark
 D. Dhaka

UIL Editorial Writing Contest • A+ Invitational • 2018-2019
(Distribute this sheet to judges prior to judging.)

JUDGING INSTRUCTIONS

In each contestant's editorial, please look for clarity of thought, and if the writer came to a clear conclusion. Remember that many of these writers have not been trained in proper editorial writing. Therefore key considerations should be that they have made a statement of the situation and formed a stance. They should back that stance with examples. Those examples do not have to come from the data sheet. The contestant then should come to a specific solution or recommendation.

Remember that for purposes of the contest these students go to Leaguetown Middle School. Contestants should not have to specify Leaguetown Middle School, because everyone reading the school paper knows where they go to school. Also, when they refer to the school board they do not have to say "Leaguetown School Board." Again, they know in what city they live.

Judging criteria has been developed to help you score the papers. The criteria are intended to help you evaluate the writing, not as a control over your background in editorial writing or the writing process.

SAMPLE EDITORIAL

With students showing a lack of focus in their afternoon classes, principal Melissa Vaske proposed adding recess time to the end of lunch. The goal would be to help students let out their energy and refocus. The proposal includes a 20 minute recess for sixth graders and a 15 minute recess for seventh and eighth graders. The recess time would come from taking two to three minutes off of each class period. The school board will vote on the proposal at Thursday's meeting.

The board should deny the proposal for recess time.

Students are not in elementary school anymore. Middle school is supposed to be a stepping stone into high school. Recess time does not adequately prepare them for a busy high school day where they are supposed to balance homework, organizations, and jobs.

Teachers need to find a better way to get students to focus. Those who act out and get the class off-topic in afternoon classes should be reprimanded, not rewarded with play time. The idea that adding recess time will keep students from losing focus in class would be just like adding nap time to stop students from falling asleep in class—it's still going to happen.

Supporters of the proposal argue that the recess time will allow students to be more productive in their afternoon classes because with the current school day, instructional time is lost refocusing the class. This sends the wrong message that bad behavior is rewarded. Approving this proposal would encourage some students to act up again in hopes of getting more recess or other time away from class.

Students need to be taught personal responsibility. The recess time proposed by Principal Vaske is not going to do that. The board should give a strong no to the proposal on Thursday.

Editorial Writing

A+ Invitational • 2018-2019

You are a reporter for the Leaguetown Press, the student newspaper of Leaguetown Middle School. From the given information, write an editorial as you would for the middle school newspaper. Remember that as an editorial writer you should support or oppose policy or action; you should not sermonize.

You have 45 minutes.

Do not write your name or the name of your school on this sheet or entry. Put your number in the upper right corner of each page of your entry.

STATEMENT OF SITUATION

Leaguetown Middle School is located in West Texas and has an enrollment of 700 students in grades 6, 7, and 8. Last month, principal Melissa Vaske proposed adding recess time within the school day after noticing so many students unable to focus in classes.

If the school board approves this proposal, students in 6th grade will have 20 minutes added on to their lunch time and students in 7th and 8th grade will have 15 minutes. The time for recess would come from shortening each class period by 2-3 minutes.

“Recess gives us an opportunity to provide students with a much-needed break in the middle of the day,” Vaske said. “From what I’ve seen, it’s harder for students to focus in their afternoon classes when they have been in a classroom since 8 a.m. This will give them a chance to blow off some steam and get outdoors.”

While the Parent-Teacher Association and many parents support the proposal, others are concerned about it taking away instructional time.

“How is this supposed to prepare them for high school?” parent Paul Contreras said. “These kids need to learn how to focus and behave in class without play time. Those skills are important going forward in school.”

Teachers support the proposal.

“I spend more time in my afternoon classes trying to get the class on track than I do teaching,” science teacher Janice Stephens said. “I have only 50 minutes with my students a day, and I need to make the most of those. If giving them recess time gets them more focused in my class, then I think it’s a good idea.”

The proposed recess time would take place right after lunch, and students would have the choice to spend the time in the gym or outside in the courtyard area.

“I think recess would definitely be a nice break in the day, but we aren’t kids anymore,” eighth grader Rylee Mulligan said. “If it passes, most students will just play on their phones. I don’t think it will help with behavior problems.”

The school board will vote on whether or not to approve the recess time proposal at its regular meeting Thursday, Sept. 27. You are writing for the issue of the Press to be distributed on Tuesday, Sept. 25.

STANCES

Supporting the proposal

Adding recess time would allow students to let off some steam and refocus for classes later in the day. Right now, teachers are losing more than 2-3 minutes of instructional time just disciplining students. Middle school can be a stressful time, and students should be able to take a little time to relax and have fun.

Opposing

First, this isn’t really recess. There is no playground. Second, there is no recess in high school. Students need to learn how to focus now. They shouldn’t be rewarded because they can’t behave appropriately in class.

Contestants should not have to specify Leaguetown Middle School, because everyone reading the school paper knows where they go to school. Also, when they refer to the school board they do not have to say "Leaguetown School Board." Again, they know in what city they live.

Judging criteria has been developed to help you score the papers. The criteria are intended to help you evaluate the writing, not as a control over your background in editorial writing or the writing process.

SAMPLE EDITORIAL

The school board will vote on Monday whether to reverse Principal Seth Penprase's new detention policy where those in detention wear orange t-shirts and do various chores around the school building after school. After a parent posted photos of students cleaning in orange shirts on social media, other parents began questioning the policy as well.

The board should reverse the detention policy.

It is not the responsibility of students to provide their own clean learning environment. The school has custodians who are paid to clean the school and know how to do the job safely and correctly. Students should not be exploited for free labor as a punishment.

The range of actions that can land students in detention ranges from tardiness to getting in a fight. Grouping them all together and giving them the same punishment of cleaning the school is unfair. The old policy of having a silent period is enough for most students and they make the needed correction. For those who continue to be a problem, the administration can look into additional punishments.

Those in support of the policy say that it holds students accountable for their actions, but that groups too many students into the same category. Maybe it would help some students, but for those who only violated a minor rule once, being made to wear an orange shirt and clean the school is downright embarrassing. There are juvenile detention centers for those who need that kind of correction. Public school is not the place to make students feel like inmates.

A return to the previous detention policy is the best option for students, and doing what is best for students is the school's first priority. The board should vote on Monday to reverse the new detention policy.

Editorial Writing

A+ Fall/Winter District • 2018-2019

You are a reporter for the Leaguetown Press, the student newspaper of Leaguetown Middle School. From the given information, write an editorial as you would for the middle school newspaper. Remember that as an editorial writer you should support or oppose policy or action; you should not sermonize.

You have 45 minutes.

Do not write your name or the name of your school on this sheet or entry. Put your number in the upper right corner of each page of your entry.

STATEMENT OF SITUATION

Leaguetown Middle School is located in North Texas and has an enrollment of 800 students in grades 6, 7, and 8. According to a new detention policy which started earlier this month, students serving detention must wear orange T-shirts and clean the school.

After a post was shared on social media of students in the T-shirts cleaning the school, a group of parents demanded that school officials do away with the new detention policy. The school board agreed to discuss the policy at its next meeting.

Parent Millie Lopez shared the post after she saw students cleaning windows while she was waiting in the carpool line.

“I couldn’t believe what I saw,” she said. “What kind of message does this send to kids who just got in trouble for talking during class? If my child is acting up, I would rather their teacher come to me than make her scrub windows.”

Some parents were upset with the color of the T-shirts, as they are the same color as prison uniforms.

“These students looked like prison inmates cleaning the school,” parent Michelle Owusu said. “Students should never be treated as inmates as a form of punishment.”

Principal Seth Penprase said he started the policy and saw it as a way for students to be held accountable for their actions.

“Every action has a reaction and it’s better that they learn it now,” he said. “I don’t want to students to like the consequences. If they did, this wouldn’t work. Right now, two good things have resulted from this policy. Our school is cleaner, and we have less disruptions in class. Once students turn 18, they will have to do community service if they get in trouble. This is no different from that.”

If the new policy is reversed, students will go back to serving detention in a monitored classroom after school for 45 minutes where they must sit in silence.

“I had detention last week because I was late to class,” sixth grader Mitchell Thomas said. “I didn’t really mind cleaning the school, but it was just embarrassing wearing that massive orange shirt. Everyone walked by me after school and saw. I just don’t think it’s fair to have to dress like that when I was only late to my first period class by three minutes.”

The school board will discuss the detention policy at its regular meeting Monday, Sept. 24. You are writing for the issue of the Press to be distributed on this Friday, Sept. 21.

STANCES

Supporting the detention policy

This policy holds students responsible for their actions. With the old policy, they were just sitting silently in a room for 45 minutes and not being productive. Now, the school is getting cleaned, and the students are less likely to act up in class.

Opposing

This new policy is unfair and embarrassing to students and treats them like inmates. The school has custodians to clean the school. There was nothing wrong with the old detention policy. If parents think their children need to be disciplined further, they can make them clean at home.

UIL Editorial Writing Contest • A+ Spring District • 2018-2019
(Distribute this sheet to judges prior to judging.)

JUDGING INSTRUCTIONS

In each contestant's editorial, please look for clarity of thought, and if the writer came to a clear conclusion. Remember that many of these writers have not been trained in proper editorial writing. Therefore key considerations should be that they have made a statement of the situation and formed a stance. They should back that stance with examples. Those examples do not have to come from the data sheet. The contestant then should come to a specific solution or recommendation.

Remember that for purposes of the contest these students go to Leaguetown Middle School. Contestants should not have to specify Leaguetown Middle School, because everyone reading the school paper knows where they go to school. Also, when they refer to the school board they do not have to say "Leaguetown School Board." Again, they know in what city they live.

Judging criteria has been developed to help you score the papers. The criteria are intended to help you evaluate the writing, not as a control over your background in editorial writing or the writing process.

SAMPLE EDITORIAL

After watching the movie "Eighth Grade" with her own middle school-aged niece and nephew, Principal Lauren Young has proposed a screening of the movie for all eighth graders next Friday, April 12. Because of the "R" rating of the movie, some parents are against the screening. They believe it contains content that is innappropriate for middle-schoolers to see. The school board will vote on the proposal at their meeting Tuesday.

The board should pass the proposal for the movie screening.

The topics of anxiety, depression, and even the bad language and sexual innuendos addressed in "Eighth Grade" are nothing new to middle schoolers. Students are the ones going to school every day and dealing with those very real problems. Sheltering them from watching the movie doesn't stop those things from happening in real life.

Young planned for students to have a discussion in small groups with a teacher after the screening. This can be really helpful for someone who feels like they have no one else to turn to with their problems and creates a safer, more open school environment.

Opponents of the proposal argue that middle schoolers aren't mature enough to handle the content shown in the movie seriously enough. Parents aren't the ones overhearing gossip in the locker room and the cafeteria. Parents aren't the ones struggling with the transition to high school. Students are. A potential solution could be allowing parents to sign a permission slip to either allow their student to participate in the screening or not.

The discomfort of some parents shouldn't determine what happens to all the eighth grade students. The movie screening proposed by Principal Young promotes a better school environment. The board should give a strong yes to the proposal on Tuesday.

You are a reporter for the Leaguetown Press, the student newspaper of Leaguetown Middle School. From the given information, write an editorial as you would for the middle school newspaper. Remember that as an editorial writer you should support or oppose policy or action; you should not sermonize.

You have 45 minutes.

Do not write your name or the name of your school on this sheet or entry. Put your number in the upper right corner of each page of your entry.

STATEMENT OF SITUATION

Leaguetown Middle School is located in Central Texas and has an enrollment of 1,100 students in grades 6, 7, and 8. After seeing the movie “Eighth Grade,” principal Lauren Young proposed having a screening of the movie for eighth grade students next Friday, April 12. The school board has to approve all movies shown in schools with a rating of “PG-13” or “R.”

Parents have expressed concern because the movie has an “R” rating and contains topics that they consider inappropriate for middle schoolers. The specifications for the “R” rating on “Eighth Grade” indicate it is for language and mild sexual content.

According to one movie review, the movie is “a realistic, relatable indie dramedy about going through adolescence. Elsie Fisher stars as socially awkward eighth grader Kayla, a social media-savvy teen who’s enduring the awkward transition between middle and high school.” Common Sense Media rates the film appropriate for ages 14 and up.

“I can’t believe that this movie could be shown at any school — especially a middle school,” parent Lisa Brooks said. “I saw the movie myself, and I would not want my daughter watching it. If the school board approves this proposal, I will be keeping her home from school that day.”

Young saw the movie with her niece and nephew, who are both in eighth grade. They told Young they loved the movie and every middle school student should see it.

“The movie opened my eyes to what it’s like to be a middle school student in this day and age,” Young said. “I want the eighth graders to be able to see it, so maybe they can understand that they aren’t the only ones feeling anxious about school and life.”

Young said teachers will lead discussions in small groups after the movie.

“I understand why she wants to show students the movie, but I don’t think all of the students are mature enough to take it seriously,” English teacher Carol Summers said. “Teachers are going to be the ones to struggle and refocus the students after the screening.”

“My mom took me to see the movie when it first came out,” eighth grader Devin Field said. “It’s the first movie about school that I’ve seen that I can actually relate to. There is some inappropriate stuff in there, but I’ve heard much worse things in the locker room. Honestly, I don’t know why it’s rated R. It should be PG-13.”

The school board will discuss and vote on whether or not to approve the movie screening at its regular meeting this upcoming Tuesday, March 26. You are writing for the issue of the Press to be distributed on this Monday, March 25.

STANCES

Supporting the movie screening

The message in the movie is something that eighth graders need to hear. The movie is realistic because eighth graders deal with these issues every day. Taking time out of the school day to give students a space to talk with peers and adults about these issues can only help students and the culture of the school.

Opposing

There is an “R” rating on the movie for a reason. Most middle schoolers aren’t mature enough to take the topics discussed in the movie seriously. Parents should be the ones to show their children the movie if they think it is appropriate.

Impromptu Speaking

EVALUATION SHEET

INSTRUCTIONS

Contestants should be evaluated and ranked based on effectiveness of delivery, organization of ideas and the overall impression of the speech. Students draw three topics and have three minutes to prepare a speech. The maximum time limit for speaking is five minutes. There is no minimum time limit. Topics may be serious or humorous in nature. Note cards may not be used during the presentation. Please make your comments using language understandable to the contestant. Students and instructors appreciate constructive narrative comments. Please do not confer with other judges before ranking students. Judging decisions are an individual responsibility.

Speaker Number _____

Speaker Name _____

Section _____

Topic _____

CRITERIA

Evaluate the contestant in each category. Do NOT total these numbers to determine rank in the round. They are only designed to give the contestant an indication of strengths and weaknesses.

QUESTION	NEEDS WORK	GOOD	SUPERIOR		
1. Was the presentation organized clearly and effectively?	1	2	3	4	5
2. Was the speaker's delivery smooth and articulate?	1	2	3	4	5
3. Did the student have adequate eye contact?	1	2	3	4	5
4. Did the student have a creative approach to the topic?	1	2	3	4	5
5. Was the speaker poised and confident?	1	2	3	4	5
6. Did the speaker have vocal variety?	1	2	3	4	5
7. Was the speaker interested and enthusiastic?	1	2	3	4	5
8. Did the speaker communicate with the audience?	1	2	3	4	5

WRITTEN EVALUATION

Comments should be constructive and supportive.

Judge's signature _____

JUDGE'S MASTER BALLOT

**UIL LISTENING CONTEST - GRADES 7 & 8
INVITATIONAL MEET 2018-2019**

Contest Script- "Natural Gas"

Natural gas is a clean source of energy that has many uses in today's world. It is used for heating and cooking in homes across the country and around the world. Most of us take the ability to use natural gas for granted. However, natural gas has only been used commercially for less than 250 years. What is natural gas, and what is its history?

Natural gas is just what its name implies. It is a naturally occurring hydrocarbon gas mixture. A hydrocarbon is a compound made up of a hydrogen and carbon. Natural gas consists primarily of methane, which is one of the most simple hydrocarbons. It is made up of one carbon atom and four hydrogen atoms. Natural gas commonly includes varying amounts of other alkanes such as propane, butane and ethane. An alkane is a type of molecular compound that contains carbon and hydrogen connected in what resembles a tree-like structure. Each carbon atom has 4 bonds and each hydrogen atom is joined to one of the carbon atoms. All of the carbon-to-carbon bonds are single. This complex structure is known as the compound's carbon skeleton or carbon backbone. Methane is an alkane, but there are many other alkanes with much more complicated structures. Natural gas also sometimes contains a small percentage of carbon dioxide, nitrogen, hydrogen sulfide, or helium.

1:00

Natural gas is a fossil fuel formed in nature. It is formed from the remains of plants and animals that lived millions of years ago. When layers of decomposing plant and animal matter experience the intense heat and pressure under the surface of the Earth over millions of years, the energy that the plants originally obtained from the sun is stored in the form of chemical bonds in the gas. Natural gas is found in large lakes, or reservoirs, beneath the surface of the earth. As the natural gas forms, it tries to float

2:00

to the surface. Large layers of rock trap the gas where it pools. Although we refer to the areas where the gas is located as a lake or pool, in reality, the gas is held in the small holes and cracks that naturally occur in rock formations.

3:00

Although the gas occurs naturally, before there was an understanding of what natural gas was, it was surrounded by myth and mystery. If a lightning strike occurred near an area in which natural gas was escaping from the earth's crust, it would create a fire, which seemed to originate from deep inside the earth. These fires were most certainly a mystery to most early civilizations and formed the root of myth and superstition. One of the most famous occurrences was found in ancient Greece on Mount Parnassus around 1000B.C. While herding goats, a man came across what he described as a "burning spring". He had seen a flame rising from a fissure in a rock. Believing it to be a gift from the gods, the Greeks built a temple around the flame. This temple housed a priestess who was called the Oracle of Delphi. She gave out prophecies she claimed were inspired by the flame.

4:00

In about 500 B.C., the Chinese discovered that they could use the natural fires to their advantage. They began using crude bamboo pipelines to transport gas to an area in which they could control the flame and use it for boiling sea water. As the water boiled, they could separate the water from the salt and create drinkable water for themselves. Commercial use of natural gas is much more recent. Great Britain was the first nation to commercialize natural gas. In 1785, the British discovered how to produce natural gas from coal and used it to light their streets and houses. In 1816, Baltimore, Maryland also used this type of manufactured natural gas to become the first city in the United States to light its streets with gas. However, manufacturing gas was much less efficient than using gas that forms naturally underground.

In America, naturally occurring gas was discovered as early as 1626. French explorers discovered that Native Americans were lighting gases that seeped into and around Lake

Erie. It was in this area that the American natural gas industry began. In Fredonia, New York in 1821, William Hart dug the first well specifically intended to seek out and obtain natural gas. After he noticed gas bubbles rising to the surface of a creek, William Hart dug a 27-foot well to try to increase the flow of gas to the surface. He is widely regarded as the 'father of natural gas' in America. Eventually, the Fredonia Gas Light Company was formed. It was America's first natural gas company.

5:00 In 1836, the city of Philadelphia created the first city owned natural gas distribution company, the Philadelphia Gas Works. Although there are more than 900 publicly owned natural gas distribution companies in the United States today, the Philadelphia Gas Works is the largest and longest operating public gas system in existence. In 1859, a former railroad conductor, Colonel Edwin Drake, dug the first well hitting oil and natural gas at 69 feet below the surface. A two-inch diameter pipeline ran 5 ½ miles from the well to the village of Titusville, Pennsylvania proving that natural gas could be safely transported from its underground source and used for practical purposes. During the 19th century, however, few pipelines were created. Without this infrastructure, the difficulty in transporting the gas prohibited the use in homes for heating or cooking. Near the end of the 19th century, the availability of electricity led to a decline in the use of natural gas, so producers were forced to look for new uses for their supply.

6:00 In 1891, a 210-mile-long pipeline was constructed to carry natural gas from wells in Indiana to the city of Chicago. Although this pipeline was not very efficient, it led to the idea of building a pipeline infrastructure. In the 1920s, after World War II, advances in welding techniques, pipe rolling and metallurgy improved pipeline reliability and further advanced the use of natural gas. Throughout the next 40-50 years, pipelines were constructed all across America. In 1885, an inventor named Robert Bunsen developed what is now known as the Bunsen burner. This device mixed natural gas with air allowing a flame that could be safely used for cooking and heating inside the home. This invention led to many more inventions which effectively used natural gas in

America and throughout the world. A temperature-regulating thermostat which allowed the temperature of the flame to be adjusted and monitored made heating with natural gas much safer and effective. Natural gas was used to heat homes and operate appliances such as water heaters, ovens, and cooktops. Manufacturing plants, processing plants, and electric companies also used natural gas.

7:00 Obtaining natural gas is big industry in 21st Century. However, in the 19th and early 20th century, methods for obtaining usable gas were just being developed. In the 19th century, natural gas was released as companies were drilling for oil. If there was not a method for transporting the natural gas to market near the oil fields, it was simply released into the atmosphere or burned off at oil fields. Because of the advances in pipelines and gas transportation, this is no longer the case. Today, the natural gas is either injected back into the natural rock formation to be kept until a buyer can be located. In areas where natural gas is in high demand, pipelines are constructed and used to transport the gas from the wellsite to a processing plant. Upon arriving at the gas processing plant, impurities and by-products are extracted for other uses. These by-products include ethane, propane, butane, and sulphur. When the clean natural gas is almost pure methane, it is transported through pipelines and delivered to its point of use.

8:00

There are 3 different types of pipelines used to transport the natural gas. Gathering pipelines transport the raw natural gas directly from the wellhead to the gas processing plant. Once processed, the gas is sent to consumers via transmission pipelines.

Transmission pipelines are highly pressurized and allow processed natural gas to be sent in large volumes over great distances. From the transmission pipelines, the gas flows into a low-pressure distribution system. Utility companies add an odorant to the gas as a safety precaution, so the consumers can detect a leak. Distribution pipelines supply gas to homes and businesses. A regulator is used to decrease the pressure even more, and a meter measures the gas consumed by the user.

9:00

With all of the oil wells in Texas, one would think that Texas would be overflowing with natural gas. In fact, Fort Worth is built on top of a natural gas field so vast that the U.S. Geological Service estimates it contains approximately 26 trillion cubic feet of undiscovered natural gas. They also estimate that as much as 160 billion cubic feet of natural gas are in place per square mile in this formation. Called the Barnett Shale field, it is the largest gas-producing field in Texas. The Barnett Shale field covers 15 counties in the northern part of Texas with its core area comprising about 120,000 acres stretching from Fort Worth to the western outskirts of Denton. This field was discovered in 1981 by Mitchell Energy when they drilled the first well in the area. The Barnett Shale core area produces more than 550 million cubic feet of natural gas per day out of more than 1,700 wells.

10:00

Ninety-nine percent of the natural gas used in the United States comes from North America. As more and more people become concerned about protecting the environment, the use of natural gas makes sense because it is the cleanest burning fossil fuel. It has become a vital part of the world's energy supply. Natural gas currently supplies more than half of the energy consumed by residential and commercial customers. Forty-one percent of the energy used by industry in the United States is natural gas. It is one of the cleanest, safest, and most useful of all available energy sources today.

UIL LISTENING CONTEST - GRADES 7-8
INVITATIONAL 2018-2019
TEST

"Natural Gas"

1. Natural gas is composed primarily of
 - A. propane
 - B. butane
 - C. methane
 - D. ethane
2. The first city owned natural gas distribution company
 - A. Philadelphia Gas Works
 - B. Fredonia Gas Light Company
 - C. Great Britain Natural Gas
 - D. Baltimore Commercialized Gas
3. In 1891, a 210-mile-long pipeline was constructed to carry from wells in Indiana to
 - A. Philadelphia
 - B. Chicago
 - C. Baltimore
 - D. Titusville
4. What was the significance of the Bunsen burner?
 - A. It mixed natural gas and air, thus allowing the flame to be safely controlled.
 - B. It regulated the temperature of the flame, thus allowing controlled heating.
 - C. It limited the amount of natural gas released, thus promoting efficiency.
 - D. It created a hotter flame, thus making cooking with gas possible.
5. The U.S. Geological Service estimates that the undiscovered natural gas located in Barnett Shale field is approximately
 - A. 38 million cubic feet
 - B. 45 billion cubic feet
 - C. 15 million cubic feet
 - D. 26 trillion cubic feet
6. French explorers discovered that Native Americans were lighting gases that seeped into and around
 - A. Baltimore
 - B. Fredonia, New York
 - C. the Allegheny Mountains
 - D. Lake Erie
7. The Chinese discovered that they could use natural fires to their advantage in about
 - A. 500 BC
 - B. 1000 BC
 - C. 1785
 - D. 1350

8. The first city in the United States to light its streets with gas was
- A. Philadelphia
 - B. Baltimore
 - C. Chicago
 - D. Fredonia
9. In the early 19th Century, what happened to natural gas that was found while drilling for oil?
- A. If there wasn't a market for it, the gas was injected back into the ground.
 - B. If a buyer wasn't available, the gas was released into the air.
 - C. Without a safe way to transport it, the gas was always burned off.
 - D. It was piped into barrels and stacked in warehouses until needed.
10. What type of pipeline transports the raw natural gas directly from the wellhead to the gas processing plant?
- A. Gathering
 - B. Transmission
 - C. Pressurization
 - D. Distribution
11. What percentage of the natural gas used in the United States comes from North America?
- A. 45%
 - B. 78%
 - C. 85%
 - D. 99%
12. An alkane is a type of molecular compound that contains
- A. carbon dioxide and helium
 - B. butane and ethane
 - C. hydrogen and carbon
 - D. sulfide and nitrogen
13. Colonel Edwin Drake
- A. dug a well hitting oil and natural gas at 69 feet below the surface in 1859
 - B. constructed a 210-mile long pipeline to carry natural gas to Chicago
 - C. discovered natural gas under what is now Fort Worth, Texas
 - D. dug the first well specifically intended to seek out and obtain natural gas
14. Who is widely regarded as the father of natural gas in America?
- A. Edwin Drake
 - B. Barnett Mitchell
 - C. Robert Bunsen
 - D. William Hartt
15. What percent of the energy used by industry in the United States today is natural gas? _____

16. All of the following advanced the use of natural gas after World War II except
- A. advanced welding techniques
 - B. safer means of building pipelines underground
 - C. improvements in pipe rolling and metallurgy
 - D. increased pipeline reliability
17. The complex structure of an alkane is known as the compound's
- A. tree-trunk skeleton
 - B. hydrogen-web
 - C. carbon backbone
 - D. hydrocarbon signature
18. William Hartt dug a 27 foot well to increase gas flow after he
- A. noticed bubbles rising to the surface of a creek
 - B. encountered a burning spring on a mountain side
 - C. saw the surface of a lake burning in the night
 - D. captured a North American Indian who led him to the sacred flame

True/False

19. In natural gas, each carbon atom has 4 bonds and each hydrogen atom is joined to one of the carbon atoms.
20. Natural gas is a clean source of energy that has been used commercially for approximately 500 years.
21. As natural gas forms, it tries to float to the surface and is trapped beneath the waters of large underground lakes and pools of oil.
22. The Oracle of Delphi lived in a Greek temple build around a flame found in ancient Greece on Mount Olympus around 1000 B.C. by a goat herdsman who saw a flame rising from a rock.
23. Manufacturing natural gas from coal is much less efficient than using gas that forms naturally underground.
24. Near the end of the 19th century, the availability of electricity led to a decline in the use of natural gas, forcing producers to look for new uses for their supply.
25. The Barnett Shale core area produces more than 550 million cubic feet of natural gas per day out of more than 1,700 wells.

UIL LISTENING CONTEST - GRADES 7 & 8 Fall/Winter District 2018-2019

Contest Script- "The Green Bank Telescope"

Nestled deep in Pocahontas County, inside the Allegheny Mountain Range, lies a quiet little town called Green Bank. The community was named for a green riverbank located nearby. Green Bank is found along West Virginia Highway 28 near the Snowshoe Mountain Ski Resort. At the last national census in 2010, its population was 143. Sounds like a quiet, sleepy place. So why is it important? Green Bank, West Virginia, is home to the Green Bank Telescope.

1:00 The Greenbank Telescope is the world's largest fully steerable radio telescope. This telescope was operated by the National Radio Astronomy Observatory (NRAO) until September 30, 2016. Since October 1, 2016, the Telescope has been operated by the Green Bank Observatory. Because of the telescope, Green Bank has been designated as part of the National Radio Quiet Zone, which means that any radio transmissions are heavily restricted by law. This includes the use of cell phones, wireless networks (think Internet access) and satellite television. This law is enforced by a radio policeman who uses specialized equipment to detect signals from unauthorized electronics. Imagine not being able to use a microwave oven to heat up your leftovers! Scientists were baffled when an unidentified source skewed their data. They were amused to find out that the interference was coming from battery operated fans being sold in the gift shop.

2:00 In the National Radio Quiet Zone, or NRQZ, radio transmissions are only used to facilitate scientific research and promote military intelligence. The National Radio Quiet Zone was established by Congress in 1958. The Quiet Zone is an approximate rectangle of land measuring 107 miles on the north edge, 109.6 miles on the south edge and 120.9 miles on each of the east and west edges. It comprises approximately 13,000 square miles. Because Green Bank is located within the Quiet Zone, many people who suffer from

electromagnetic hypersensitivity have moved there to make a new, more peaceful home for themselves. Although scientists find no evidence to support a scientific diagnosis for electromagnetic hypersensitivity, those who believe they suffer from it report symptoms of headache, fatigue, stress, sleep disturbances, skin prickling, burning sensations, rashes, pain and muscle aches. Escape from cellular radiation is the main attraction to Green Bank for these people. As of 2013, an estimated 36 people had moved to Green Bank to escape the effects of electromagnetic hypersensitivity.

3:00

The National Radio Quiet Zone straddles the border between Virginia and West Virginia and also includes a small part of Maryland. It is centered between the Green Bank Observatory in Green Bank and the Sugar Grove Observatory in Sugar Grove, West Virginia. The Sugar Grove Station is a National Security Agency (NSA) communications site, which according to a 2005 article in the New York Times, intercepted all international communications entering the Eastern United States. The site was first developed by the Naval Research Laboratory in the early 1960s as the site of a 600-foot radio telescope that would gather information on Soviet radar and radio signals reflected from the moon. It would also gather data on outer space.

4:00

This project was halted in 1962, and the site was turned into a radio receiving station. It was activated as Naval Radio Station Sugar Grove on May 10, 1969. In April 2013, however, the Sugar Grove Station was ordered to be closed no later than September 30, 2015. On July 26, 2016, the Sugar Grove Station was auctioned off with a winning bid of \$11.2 million. This transaction fell through, and in 2017, a second auction resulted in a \$4 million purchase by an investment group based out of Alabama. It is being repurposed as a privately-owned healthcare facility for active-duty military, veterans and their families. The listening station in Green Bank, however, continues to operate.

Why is the Green Bank Site so important? The telescope's location has been the site of important radio astronomy telescopes since 1957. It was dedicated on October 17, 1957. The National Radio Astronomy Observatory was founded in 1956 and the Observatory's

first telescope, the Tattle 85 Foot (which was 85 feet in diameter), was completed in 1959. The 300 Foot telescope was completed in 1962 followed by a 140 Foot telescope. By locating the telescope within the Radio Quiet Zone, scientists are able to detect even very faint radio-frequency signals which man-made signals might otherwise mask. Its location also has the natural borders of National Forest land and the Allegheny Mountains to shield it from some radio interference.

5:00 At present, there are seven additional telescopes. For many years scientists and alien hunters have discussed the idea of using telescopes to search for extra-terrestrial life. It was at the Green Bank Site in 1961 that Frank Drake presented the Drake Equation which he had developed to estimate the total number of detectable extraterrestrial civilizations found in the Milky Way galaxy. Using the Tattle 85 telescope, he tried to find evidence that other life-forms were sending out radio transmissions. He did not discover any. These days, the telescope sits as a memorial to the beginnings of the world's first scientific study using radio telescopes to determine the origins of life on other and other planets. Drake called his project Ozma.

6:00 The newest addition to the radio telescopes in Green Bank is Robert C. Byrd Green Bank Telescope, or the GBT as it is more commonly called. The GBT is the world's largest fully steerable radio telescope. This telescope honors the late Senator Robert C. Byrd who represented West Virginia and pushed funding for the telescope through Congress. The cost of building the telescope was more than \$95 million. Groundbreaking for the GBT was in 1991. The GBT began operations in 2001. It was constructed after a previous telescope collapsed on November 1988 due to the sudden loss of a gusset plate in the box girder assembly. Without it, the structural integrity of the telescope was compromised. The GBT operates at meter to millimeter wavelengths. Its collecting area is 100 meters in diameter. That's 2.3 acres! It weighs almost 17 million pounds and stands 485 feet above ground level. That's 60% taller than the Statue of Liberty! It operates 7 days a week, 24 hours a day, 362 days a year. The panels, which make up the telescope, are made of aluminum. The panels have actuators, which keep the

telescope from sagging under its own weight as the panels are moved. It is fully steerable and 85% of the entire celestial sphere can be accessed. It is used for astronomy about 6500 hours each year, which is more than most observatories. Because of its flexibility and ease of use, it can rapidly respond to new scientific ideas. Scientists can reconfigure it with new and experimental hardware with relative ease as well. The facilities of the

7:00 Green Bank Observatory are also used for research for many programs in education including training students and teachers with approximately 40,000 scientists and visitors annually. Locals jokingly call the GBT the Great Big Thing.

The giant 2.3-acre receiving dish of the GBT can be thought of as an enormous bucket, which scoops up the weak radio waves that fall on us from objects in space. It is extremely sensitive to the hydrogen clouds that exist between stars and galaxies. Because hydrogen is the building block of the universe, when scientists are able to study where these clouds exist, what is happening inside those clouds, and where the clouds are headed, they are able to draw conclusions about the history and future of galaxies they are studying. They also study comets to learn about their temperatures and chemical make-up. When partnered with a transmitting radar antenna, the GBT can be used to map asteroids, moons, planets and comets with amazing accuracy.

8:00 Research using the telescope has led to several discoveries. In 2002, scientists discovered 3 new millisecond pulsars in the globular cluster Messier 62. This cluster is located 22,500 light years from Earth and is 100 light years across. In 2006, several other discoveries were announced. A large, coil-shaped magnetic field was located in the Orion molecular cloud. In addition, a large hydrogen gas super-bubble was located 23,000 light years away. In September of 2014, scientists used the GBT to discover that our Milky Way Galaxy is located in a super cluster of galaxies that is 500 million light years across and has a mass of more than 100 million billion suns! Scientists have also located a massive neutron star which they have determined to be the largest to date, a cloud of primordial gas surrounding several galaxies and even complex molecules, such as sugar, in space.

9:00

In August 2012, the National Science Foundation recommended to Congress that the GBT be defunded over a period of 5 years. In the 2014 fiscal year budget, Congress did not grant funding for the project. At this point, the GBT committee began looking for funding. In October of 2016, operation of the Observatory changed from the National Science Foundation to the Green Bank Observatory, which allowed for private funding to be secured. West Virginia University donated \$1 million during a 2-year period in exchange for giving students and professors access for research.

10:00

Another source that heavily funded the GBT is a group called Breakthrough Listen. Breakthrough Listen is a science-based program that searches for intelligent extraterrestrial communications throughout the universe. The project began in January 2016 and will most likely continue for 10 years. It had \$100 million in funding and thousands of hours of dedicated telescope time. It is the largest, most comprehensive search for alien communications ever launched. Breakthrough Listen is based at Berkeley SETI Research Center in the Astronomy Department of the University of California, Berkeley. This project uses information gleaned from the Green Bank Observatory, the Parkes Observatory, and the Automated Planet Finder. The project generates data from over one million nearby stars and the centers of 100 galaxies within range. All of their data is available to the public and can be accessed for study.

Perhaps one day they will discover alien civilizations or yet undiscovered stars and galaxies. Who knows? What is sure is that as long as funding allows, the GBT is an engineering marvel that will continue to provide a listening station for scientists and a quiet place for those wishing to live in a world free from radio transmissions.

UIL LISTENING CONTEST - GRADES 7-8
FALL/WINTER DISTRICT 2018-2019
TEST

"The Green Bank Telescope"

1. Green Bank is located in
 - A. Maryland
 - B. West Virginia
 - C. Virginia
 - D. Pennsylvania
2. Green Bank has been the site of important radio astronomy telescopes since
 - A. 1957
 - B. 1969
 - C. 1962
 - D. 1974
3. The National Quiet Zone comprises approximately
 - A. 10,000 square miles
 - B. 11,000 square miles
 - C. 12,000 square miles
 - D. 13,000 square miles
4. Because Green Bank is located within the Quiet Zone, many people have moved there who suffer from _____ hypersensitivity
 - A. radio transmission
 - B. geothermic
 - C. magnetic radio-wave
 - D. electromagnetic
5. Who operated the Green Bank Telescope until September 30, 2016?
 - A. Green Bank Telescope Committee
 - B. National Radio Astronomy Observatory
 - C. National Security Agency
 - D. Breakthrough Listen
6. Scientists discovered 3 new millisecond pulsars in the globular cluster Messier 62 in
 - A. 2006
 - B. 2014
 - C. 2002
 - D. 1997
7. The Green Bank Telescope is fully steerable and _____ % of the entire celestial sphere can be accessed.

8. The Sugar Grove Station is a National Security Agency (NSA) communications site which, according to a 2005 article in the New York Times, intercepted all international communications entering the
- A. Northern United States
 - B. Pacific Northwest
 - C. Eastern United States
 - D. Washington D.C. metroplex
9. Locals jokingly call the Green Bank Telescope the
- A. Great Big Thing
 - B. Gang Bang Thang
 - C. Gravity Based Triad
 - D. Giant Black Terror
10. In September of 2014, scientists used the GBT to discover that our Milky Way Galaxy is located in a super cluster of galaxies that is
- A. 100 billion miles in diameter
 - B. 500 million light years across
 - C. composed of 250 million stars
 - D. equivalent to 100 billion suns
11. The focus of Breakthrough Listen is to
- A. search for anomalies given off by stars and planets
 - B. find harmony in the universe
 - C. identify extraterrestrial communication
 - D. locate the source of unidentified wavelengths
12. On May 10, 1968, the Sugar Grove Observatory was activated as
- A. Sugar Grove Naval Base
 - B. The National Telescope and Radio Tower at Sugar Grove
 - C. Sugar Grove Radio Astronomy Center
 - D. Naval Radio Station Sugar Grove
13. The Sugar Grove Observatory was first developed as the site of a 600-foot radio telescope that would gather information on
- A. all communications from extraterrestrials
 - B. the Milky Way galaxy
 - C. Soviet radar and radio signals reflected from the moon
 - D. hydrogen clouds that exist between galaxies
14. The receiving dish of the GBT is 100 meters in diameter which is equal to
- A. 2.3 acres
 - B. 3200 feet
 - C. 1.2 miles
 - D. 47 hectares

15. In 2014, what happened to the Green Bank Telescope?
- A. Congress did not vote to fund it.
 - B. It received new framing to keep it from sagging.
 - C. It was moved so that it received better signal from outer space.
 - D. The National Radio Telescope Association sold it.
16. The National Quiet Zone is located in all of these states except
- A. Virginia
 - B. West Virginia
 - C. Pennsylvania
 - D. Maryland
17. The National Radio Astronomy Observatory's first telescope was _____ feet in diameter.
18. Frank Drake called his project
- A. Extra-Terrestrial Search
 - B. Ozma
 - C. Tatl
 - D. Milky Way Exploration

True/False

19. Groundbreaking for the GBT was in 1991 and operations began in 2001.
20. In 2006, by using the GBT, a large, coil-shaped magnetic field was located in the Messiner molecular cloud.
21. Although Breakthrough Listen uses information gleaned from the Green Bank Observatory, the Parkes Observatory, and the Automated Planet Finder, its findings are only available to scientists and military experts.
22. The National Radio Quiet Zone restricts radio transmissions including the use of cell phones, wireless networks, satellite television and microwaves.
23. At the last national census in 2010, its population was 36.
24. On July 26, 2016, the Sugar Grove Station was auctioned off with a winning bid of \$11.2 million by an investment group out of Alabama.
25. In 1961 that Frank Drake presented the Drake Equation which he had developed to estimate the total number of detectable extraterrestrial civilizations found in the Milky Way galaxy.

UIL LISTENING CONTEST - GRADES 7 & 8
SPRING MEET 2018/2019

Contest Script- "Theodore Roosevelt"

Have you ever wondered why stuffed bears are referred to as "Teddy Bears"? There are no species of bears whose name is related to the word Teddy. In 1902, the term originated because of an incident with a bear and the US President at the time, Theodore Roosevelt.

1:00 Theodore Roosevelt Jr. was born in New York City on October 27, 1858. His parents were Martha Stewart Bulloch and Theodore Roosevelt. He was the second of four children. He had an older sister named Anna who was nicknamed Bamie, a younger brother named Elliott, and a younger sister named Corinne. His father was a businessman, and his family owned a plate-glass business. When he was young, Theodore was often sick and had to wear glasses due to poor eyesight. He suffered from asthma so extreme that when he experienced nighttime attacks, it gave him the feeling of being smothered to death.

2:00 Although doctors had no cure for asthma at that time, Theodore didn't let it keep him from playing and learning. When he was seven years old, he began to be interested in zoology. He saw a dead seal at a local market and made a point of obtaining the seal's head. He and two of his cousins then formed what they called the "Roosevelt Museum of Natural History". He learned the basics of taxidermy and filled his museum with animals that he killed or caught, then studied and prepared for display. When he was nine, he wrote a paper entitled "The Natural History of Insects" in which he recorded what he had learned through his observation of insects.

Because of his illness, Theodore was homeschooled and was taught by tutors. But, as he grew older, his father encouraged him to exercise and workout including weightlifting. Because of this strenuous program, he began to grow stronger and developed a lifetime

love of exercise. When his family went hiking in the Alps in 1869, Theodore realized that he could keep pace with his father. This encouraged him to continue working out. After being bullied by two older boys on a camping trip, he found a boxing coach to teach him to fight and added boxing to his workout routine.

3:00

He encouraged all of his family to live what later became referred to as a strenuous life as opposed to a life of ease and pleasure. His father strongly influenced his life in other ways as well. Roosevelt often spoke of his father as the best man he ever knew. His father was a prominent leader in New York's cultural affairs and helped to found the Metropolitan Museum of Art.

He took his family on trips overseas including touring Europe in 1869 and 1870 and visiting Egypt in 1872. This gave young Theodore a broader view of the world. His father died unexpectedly on February 9, 1878. He began to throw himself into his studies and planned to focus on biology and nature. However, as Theodore grew, he began to display a wide range of intellectual curiosity. He graduated from Harvard College in 1880. When his father died, Theodore inherited \$125,000, which was enough to keep him comfortable for the rest of his life. He abandoned his intent to focus on environmental issues and attended Columbia Law School.

4:00

He found law school to be irrational and began writing a book about the War of 1812. It was then that he decided to pursue a career in writing and politics instead. Assisted by two uncles, he scoured original source materials and official U.S. Navy records in order to write meticulously about the role the Navy played in the war. His carefully researched book, published in 1882, remains one of the most important scholarly studies of the war to date.

Roosevelt joined the New York State Assembly as a representative from New York City. He was the youngest to ever serve in that position. He held several other public service positions including captain of the National Guard and minority leader of the New York

5:00

Assembly. On his 22nd birthday in 1880, he married Alice Hathaway Lee. They had one daughter named Alice who was born on February 12, 1884. However, on February 14, 1884, his mother and his wife both died tragically. This propelled him to leave for the Dakota Territory for two years. While he was there, he became increasingly concerned about protecting the environment of the West. He lived there as a cowboy and cattle rancher while his elder sister took care of young Alice. He returned to political life in 1886 when he ran for the New York City mayor but was defeated. At this time, he married Edith Kermit Carow whom he had known as a child. They lived the rest of their lives at Sagamore Hill, an estate near Oyster Bay, Long Island, New York. They had five children: Theodore, Kermit, Ethel, Archibald, and Quentin.

6:00

Roosevelt was known as a foe of corrupt politics. He remained active in politics and became a member of the US Civil Service Commission from 1889 – 1895 and as the president of the New York City Board of Police Commissioners. When he was appointed as the assistant secretary of the Navy by President William McKinley, he pushed to have a bigger navy and to declare war with Spain. When war was declared in 1898, he organized the 1st Volunteer Cavalry, known as the Rough Riders. They were sent to fight in Cuba. Roosevelt led the charge of the Rough Riders on foot up Kettle Hill during the Battle of Santiago in 1898. This made him the biggest national hero to come out of the Spanish American War. He was nominated for the Medal of Honor and was elected governor of the state of New York in 1898.

7:00

Unlike most Republicans of that day, Roosevelt was a progressive. He fought to remove corrupt officials and enacted legislation to regulate corporations and the civil service. In an effort to rein him in, Republican Party bosses decided to draft him as the Republican Vice-President nomination in 1900. However, in 1901, President McKinley was assassinated, and at the age of 42, Theodore Roosevelt became the youngest man to enter the US Presidency.

Although while running for Vice-President Roosevelt promised to hold true to McKinley's policies, once he became President, he began to make changes. He gave a new name to the executive mansion – the White House. He began to entertain in the White House including cowboys, prize fighters, explorers, writers and artists. Although this drew criticism, he ran the White House as a home for his family. He is said to have played with his children and even threw water balloons from the roof. He was known for his fun-loving nature as well as his competitive spirit.

8:00 In 1902, he was invited to go bear hunting with the governor of Mississippi. Although other hunters in the group had been successful, Roosevelt had not. One of his assistants was able to catch a bear and tie it to a tree suggesting that Roosevelt shoot it there. Roosevelt said that it would be extremely unsportsmanlike and refused. When this story hit the media, a toy maker began making stuffed bears and selling them with the name "Teddy Bear". This was the origin of the Teddy bears we know and love today.

9:00 The new energy he brought to the White House along with his domestic and foreign policies helped him to win a second term as President in 1904. He became known as the great "trust buster" for his efforts to break up industrial monopolies under the Sherman Antitrust Act. He was also widely known as a dedicated conservationist. During his presidency, he urged Congress to create the Forest Service in 1905 to manage government-owned forests and appointed Gifford Pinchot to head the agency. He also used his authority as President to designate public lands as national forests. This made them off-limits for use as lumber, minerals, or waterpower. In fact, Roosevelt set aside almost five times as much land as all of his predecessors combined. During his presidency, he set aside 194 million acres as protected land. In commemoration of his dedication to conservation, the Theodore Roosevelt National Park was created in North Dakota as well as Theodore Roosevelt Island, a 91-acre wooded island in the Potomac River in Washington, DC, were named in his honor.

10:00

As the 1908 election drew near, Roosevelt decided to honor a pledge that he had made in 1904 to not seek another term as President. He felt that term limits were needed in order to prevent a dictatorship. He supported the Secretary of War, William Howard Taft, to succeed him. Immediately after leaving office in January of 1909, Roosevelt left for a 10-month safari in Africa and a tour of Europe. When he returned, he found that President Taft had not followed through on his promise of continuing to create progressive reforms. As a result, Roosevelt campaigned against Taft for the Republican nomination in 1912. When he was unsuccessful, he and his supporters formed the Progressive Party which became known as the Bull Moose Party. While campaigning in Milwaukee, Wisconsin, Roosevelt was shot by saloonkeeper John Schrank in a failed assassination attempt on October 14, 1912. He was not seriously wounded, but doctors thought it was too dangerous to attempt to remove the bullet. Roosevelt carried that bullet inside him for the rest of his life.

11:00

The Bull Moose Party disbanded in 1914. Beyond his life in politics, Roosevelt was a prolific writer. He published more than 25 books. He wrote on a wide range of subjects including history, biology, geography and philosophy. He also published a biography and an autobiography including a four volume set entitled *The Winning of the West*. During the winter of 1914, Roosevelt and his son Kermit went on an expedition to explore the River of Doubt in Brazil. He came down with a tropical fever and seriously injured his leg. Although he was able to recover, this ordeal severely affected his health. On January 6, 1919, at Sagamore Hill, Theodore Roosevelt died in his sleep of an arterial blood clot. He was 60 years old. He was buried at the Youngs Memorial Cemetery in New York.

12:00

On January 16, 2001, President William Clinton posthumously awarded Theodore Roosevelt the Medal of Honor for his charge up San Juan Hill in Cuba during the Spanish-American War. This award was accepted on his behalf by his great-grandson, Tweed Roosevelt.

South America

1. What country has two of the largest urban areas in South America?
 - a. Brazil
 - b. Argentina
 - c. Colombia
 - d. Peru
2. How many miles does one inch equal on the elevation map cross-section?
 - a. 1,000
 - b. 315
 - c. 220
 - d. 100
3. What is the climate type for most of central Brazil?
 - a. tropical
 - b. savanna
 - c. marine
 - d. humid subtropical
4. The highest elevations are found in what area of the continent?
 - a. near the northern coast
 - b. near the eastern coast
 - c. near the southern coast
 - d. near the western coast
5. Which city in Argentina has the largest population?
 - a. Rosario
 - b. La Plata
 - c. Formosa
 - d. Buenos Aires
6. Which of the following countries has the highest percentage of indigenous descendants?
 - a. Bolivia
 - b. Colombia
 - c. Venezuela
 - d. Guyana
7. The Uruguay River forms part of the border between Argentina and what other country?
 - a. Chile
 - b. Brazil
 - c. Bolivia
 - d. Paraguay
8. Glacier land cover can be found in what country?
 - a. Chile
 - b. Suriname
 - c. Ecuador
 - d. Guyana
9. What do the pink lines on the land cover map represent?
 - a. shift in land cover type
 - b. time zone boundary
 - c. latitude lines
 - d. international boundary
10. What country's capital is closest to the Equator?
 - a. Ecuador
 - b. Brazil
 - c. Colombia
 - d. Peru
11. What percentage of modern medicine is developed from rain forest plants?
 - a. 15%
 - b. 20%
 - c. 25%
 - d. 30%
12. Which of the following resources can be found in French Guiana?
 - a. oil
 - b. natural gas
 - c. iron
 - d. gold
13. The Falkland Islands are a territory of what country?
 - a. U.S.
 - b. U.K.
 - c. Brazil
 - d. France
14. What is the elevation of Mt. Chimborazo in Ecuador?
 - a. about 10,000 feet
 - b. about 15,000 feet
 - c. about 20,000 feet
 - d. about 25,000 feet
15. Which of the following crops grows best at higher elevations?
 - a. barley
 - b. bananas
 - c. rice
 - d. cacao

Trinity Park: Mountain Bike Trails

16. What does the symbol of the bike represent?
- bike repair shop
 - picnic area
 - bike trail start
 - bathrooms
17. How many types of bike trails are there in the park?
- 1
 - 2
 - 3
 - 4
18. Two inches on the map would equal how many miles?
- .5
 - 1
 - 2
 - 4
19. What does the solid double line represent?
- highway
 - easy trail
 - advanced trail
 - expert trail
20. Which type of trail goes the furthest south?
- highway
 - easy trail
 - advanced trail
 - expert trail
21. How many parking areas are indicated on the map?
- 0
 - 1
 - 2
 - 3
22. What is the highest elevation on the map?
- 100-300 feet
 - 300-600
 - 600-700
 - 700-900
23. How many miles is it to the nearest town?
- 5
 - 10
 - 20
 - not indicated on the map
24. What type of trail goes through the highest elevation?
- highway
 - easy trail
 - advanced trail
 - expert trail
25. How many advanced trails are there?
- 1.
 - 2
 - 3
 - 4
- TRUE/FALSE**
26. One of the advanced trails runs just south of Wallace Pond.
27. Cooper is 25 miles north of the park.
28. There are an equal number of expert and easy trails.
29. There are more picnic areas by the advanced trails than there are by the other types of trails.
30. The highest elevation an easy trail reaches is the 100-300 feet level.

Monthly Averages: Visitors And Bikes Entering Trinity Park

■ Number of Visitors ■ Overnight Campers * Bikes Brought to Park

Trinity Park: Monthly Averages

31. What does the dotted line represent?
- number of visitors per month
 - overnight campers
 - bikes brought into park
 - average temperatures for each month
32. Which month had the fewest number of visitors?
- September
 - May
 - August
 - November
33. What information is shown on the x axis?
- the month
 - number of visitors
 - overnight campers
 - bikes brought into park
34. In how many months were more than 100 bikes brought into the park?
- 0
 - 6
 - 8
 - 12
35. What month had the highest number of bikes in the park?
- May
 - June
 - July
 - August
36. The information on the graph represents what year?
- 2017
 - 2018
 - 2019
 - not indicated
37. How many months were there around 10 overnight campers?
- 2
 - 5
 - 6
 - 0
38. Which two months had the same number of total visitors?
- March and September
 - April and August
 - February and June
 - January and November
39. The biggest drop in the number of visitors happened in what month?
- September
 - October
 - November
 - December
40. May saw the highest numbers for what single category?
- number of visitors per month
 - bikes brought to park
 - overnight campers
 - none

TRUE/FALSE

41. The month with the highest number of visitors also had the highest number of overnight campers.
42. Compared to the previous month, when the number of visitors rises, the number of bikes in the park also rises.
43. February had the lowest numbers for all three categories.
44. Summer months have more overnight campers than winter months.
45. May saw an increase in all three categories.

North America

46. Which of the following is an agricultural product of New Mexico?
- beef
 - dairy
 - corn
 - wheat
47. Most of the east coast of the United States falls into what rainfall range?
- 10-20 inches
 - 20-40 inches
 - 40-80 inches
 - over 80 inches
48. The largest urban area is in what country?
- Greenland
 - Canada
 - U.S.
 - Mexico
49. The climate of Greenland is mainly of what type?
- marine
 - tundra
 - ice cap
 - highland
50. The Bering Strait forms a boundary between the U.S. and what other country?
- Russia
 - Canada
 - Mexico
 - Greenland
51. How far is between the capitals of Belize and Panama?
- about 400 miles
 - about 800 miles
 - about 1,600 miles
 - about 3,200 miles
52. Being on the leeward side of a mountain range results in which of the following?
- more rain
 - less rain
 - longer winters
 - longer summers
53. Which of the following countries is not part of CAFTA-DR?
- Mexico
 - U.S.
 - Honduras
 - Nicaragua
54. The largest percentage of immigrants to the U.S. are from where?
- Asia
 - South America
 - Middle America
 - Europe
55. The dotted lines on the political relief map of Canada indicate what?
- international boundary
 - national boundary
 - province boundary
 - country boundary
56. Forests cover how much of Canada?
- | | |
|--------|--------|
| a. 30% | c. 50% |
| b. 40% | d. 60% |
57. Volcanoes are most active in which area?
- North American Plate
 - Pacific Plate
 - Caribbean Plate
 - South American Plate
58. Which of the following is Cuba's primary trade partner?
- U.S.
 - China
 - Venezuela
 - European Union
59. What is the fastest growing means of transportation in the U.S.?
- | | |
|--------|----------|
| a. air | c. bus |
| b. car | d. train |
60. Which of the following statements about U.S. farms is not true?
- the number of farms is decreasing
 - farm sizes are decreasing
 - farm population has been decreasing
 - all are true

Mountain Bike Race Entries by Year and Level

Mountain Bike Race Entries by Year and Level

61. How many years are represented on the graph?
- three
 - four
 - five
 - six
62. What does the striped bar represent?
- the year 2015
 - the year 2016
 - the year 2017
63. What year did Summit have more beginners than experts?
- 2015
 - 2016
 - 2017
64. Which year had the highest total entries?
- 2015
 - 2016
 - 2017
65. How many categories per year are displayed?
- one
 - two
 - three
 - four
66. How many different race locations are on the graph?
- one
 - two
 - three
 - four
67. Which race had the most beginners in a single year?
- Summit
 - Trinity
 - Peak
68. What year had the highest total amount of experts for all locations?
- 2015
 - 2016
 - 2017
69. How many times did beginners outnumber the experts at Peak?
- 6
 - 5
 - 3
 - 1
70. Which single race category had the highest participation in 2016?
- Summit- Expert
 - Summit- Beginner
 - Trinity- Beginner
 - Peak- Expert
- TRUE/FALSE**
71. The least popular expert site was Summit for all three years.
72. Summit had an equal number of experts and beginners in 2016.
73. The graph indicates races held later in the year have higher participation.
74. Trinity had higher participation than Summit every year in every category.
75. The x axis provides information on the number of participants.

- Tundra can be found in which of the following countries?
 - South Korea
 - Russia
 - Iran
 - Taiwan
- Which of the following cities in Uzbekistan is the largest?
 - Jizzakh
 - Muynak
 - Tashkent
 - Samarqand
- Which country's capital is closest to the equator?
 - Philippines
 - Maldives
 - Taiwan
 - Yemen

Star City Summer Film Festival

Park Map Detail

Venues

- Art Art House Theatre
- AST Astro Hotel
- Brn Burn Museum
- BUS Business College
- CAM Camera Shoppe

- PKP Park Plaza
- RET Regal Theatre
- SAC Summer Art Center
- STT Sunset Theatre
- TTH Torres Theatre

- Concessions
- Ticket Sales
- Picnic Area
- Restrooms

Film Festival Shuttle
 Shuttle Hours: 11 a.m.
 to 1:00 a.m.

Star City Summer Film Festival

16. One inch equals how many miles on the map?
- 0.25
 - 0.50
 - 1.0
 - not indicated
17. How many bus stops are indicated on the map?
- 12
 - 13
 - 14
 - 15
18. How many hours do the shuttles run in a 24-hour period?
- 1 hour
 - 12 hours
 - 13 hours
 - 14 hours
19. What do the dotted lines represent?
- University Shuttle
 - Main Street Shuttle
 - Scott Street Shuttle
 - Streets
20. Which shuttle runs the furthest south?
- University Shuttle
 - Main Street Shuttle
 - Scott Street Shuttle
 - Buttercup Lane
21. How many restrooms are indicated on the insert?
- 0
 - 1
 - 2
 - 3

22. Which shuttle services Park Plaza?
- University Shuttle
 - Main Street Shuttle
 - Scott Street Shuttle
 - None
23. When boarding the University Shuttle at the shuttle parking area, which of the following stops would mean the longest ride?
- Burn Museum
 - Camera Shoppe
 - History Museum
 - City Center
24. Ticket sales can be found in what corner of the park?
- northwest
 - northeast
 - southwest
 - southeast
25. Which of the following venues is the furthest east?
- Business College
 - Moore House
 - Sunset Theatre
 - Torres Theatre

TRUE/FALSE

26. The Main Street Shuttle runs north to south on Buttercup Lane.
27. The area for Poolside Movies is just south of Regal Theatre.
28. Each shuttle services the same number of venues.
29. There are two picnic areas just west of Children's Cinema Park.
30. The Summer Art Center and Astro Hotel are serviced by the same shuttle.

Torres Theatre: Concession Unit Sales

Thursday

Friday

Saturday

Sunday

- Popcorn
- Soft Drinks
- Candy
- Pretzels
- Hot Dogs

Torres Theatre: Concession Unit Sales

31. How much time is represented on the graph?
- 4 days
 - 5 days
 - 4 weeks
 - 5 weeks
32. What do the solid grey areas represent?
- Saturday
 - candy
 - Sunday
 - Popcorn
33. Which item had the highest number of sales on Sunday?
- popcorn
 - candy
 - pretzels
 - soft drinks
34. How many times did soft drinks outsell popcorn?
- 1
 - 2
 - 3
 - 4
35. Which of the following items had the highest sales in a single day?
- popcorn
 - candy
 - pretzels
 - hot dogs
36. What day had the lowest amount of sales for soft drinks?
- Thursday
 - Friday
 - Saturday
 - Sunday
37. How many days did the number of pretzels sold drop below 100?
- 1
 - 2
 - 3
 - 4
38. Which item made the most money for the theatre?
- soft drinks
 - popcorn
 - candy
 - not indicated on the chart
39. Which item has the biggest difference between its highest and lowest number of daily sales?
- popcorn
 - candy
 - pretzels
 - hot dogs
40. What day had the highest number of sales for all items combined?
- Thursday
 - Friday
 - Saturday
 - Sunday
- TRUE/FALSE**
41. The sales of popcorn and soft drinks peaked on the same day.
42. Soft drinks sell twice as well as candy on every day.
43. Friday saw the highest number of sales for three items.
44. Pretzels had the highest percentage of total sales for Thursday out of all the concession items.
45. Popcorn accounted for 25% of total sales on Thursday.

Australia & Oceania

46. Which of the following countries does Australia import the most from?
- United States
 - European Union
 - Japan
 - South Korea
47. On the political relief map, one cm equals how many kilometers?
- 400
 - 632
 - 750
 - 1000
48. On the political relief map, multi-colored lines in the ocean represent what?
- ocean currents
 - continental boundaries
 - groups of islands with the same government
 - areas of dispute
49. What is the vertical exaggeration on the cross section of the elevation map?
- 78 to 1
 - 24 to 1
 - 470 to 1
 - 278 to 1
50. The outback covers what percentage of Australia?
- | | |
|-------|-------|
| a. 20 | c. 60 |
| b. 40 | d. 80 |
51. Which natural resource can be found in New Zealand?
- coal
 - gold
 - lead
 - tin
52. Which of the following indigenous people settled in Hawaii?
- Aborigines
 - Melanesians
 - Micronesians
 - Polynesians
53. The ethnic composition of New Zealand is mostly what?
- | | |
|-------------|---------------|
| a. Asian | c. Maori |
| b. European | d. Polynesian |
54. Suva is the capital of what country?
- | | |
|-------------|------------|
| a. Fiji | c. Palau |
| b. Kiribati | d. Vanuatu |
55. What is the population range of Townsville, Australia?
- under 1,000
 - over 50,000
 - 100,000 to 500,000
 - over 500,000
56. Which is not of the invasive species found in Australia?
- European rabbit
 - feral pig
 - kangaroo
 - sheep
57. What is the elevation of Jaya Peak in New Guinea?
- | | |
|----------------|----------------|
| a. 15,452 feet | c. 18,746 feet |
| b. 16,503 feet | d. 18,975 feet |
58. How far is it from the capital of Tonga to the capital of Samoa?
- about 250 miles
 - about 350 miles
 - about 450 miles
 - about 600 miles
59. Norfolk Island is a territory of what country?
- Australia
 - Japan
 - Indonesia
 - United States
60. What is the region's most densely populated country?
- Australia
 - Indonesia
 - Nauru
 - Vanuatu

Film Attendance by venue and type:
Saturday August, 25th

Film Screenings Attendance

61. What do the darker bars represent?

- a. Individual Tickets
- b. Venue
- c. Festival Passes
- d. Number

62. How much time is represented on the graph?

- a. 11 days
- b. 1 day
- c. 1600 days
- d. 7 days

63. At how many venues did festival passes outpace individual tickets?

- a. 0
- b. 2
- c. 4
- d. 6

64. Which theatre had the lowest number of individual tickets?

- a. Moore House
- b. Torres Theatre
- c. History Museum
- d. Park Plaza

65. How many venues are represented?

- a. 1600
- b. 2
- c. 10
- d. 11

66. Which theatre had the highest difference between individual tickets and festival passes?

- a. Moore House
- b. Glover Galley
- c. Torres Theatre
- d. Regal Theatre

67. What does the x-axis represent?

- a. Number
- b. Individual Tickets
- c. Venues
- d. Festival Passes

68. How many venues had fewer individual tickets than Moore House?

- a. 0
- b. 1
- c. 2
- d. 3

69. Which venue had the highest combined total?

- a. Regal Theatre
- b. Art House
- c. Torres Theatre
- d. Summer Art Center

70. How many theatres had less than 500 in both categories?

- a. 11
- b. 8
- c. 4
- d. 1

TRUE/FALSE

71. Torres Theatre had more than twice as many individual tickets as Art House.

72. Regal Theatre had more individual tickets than the Burn Museum had for both categories.

73. The year the data is collected is indicated on the graph.

74. The two venues with the highest number of passes also had the highest number of individual tickets.

75. The graph indicates that the festival made more money on individual tickets than on the sale of festival passes.

Africa

- How many miles does an inch equal on the Political Relief Map of Southern Africa?
 - 423 miles
 - 600 miles
 - 730 miles
 - 820 miles
- The land cover of the Congo Basin is mostly of what type?
 - cropland
 - desert
 - tropical rain forest
 - tundra
- How many miles is it from the capital of Uganda to the capital of Somalia?
 - about 500 miles
 - about 700 miles
 - about 900 miles
 - about 1,100 miles
- What is the main metal in the country of Nigeria?
 - oil
 - copper
 - nickel
 - tin
- The largest country by population is in what area of the continent?
 - eastern
 - northern
 - southern
 - western
- What is the highest elevation in the country of Chad?
 - over 10,000 feet
 - 5,000 to 10,000 feet
 - 2,000 to 5,000 feet
 - 1,000 to 2,000 feet
- Which country does the Niger river not run through?
 - Mali
 - Egypt
 - Niger
 - Nigeria
- The Great Rift Valley runs through which country?
 - Angola
 - Gabon
 - Mozambique
 - Niger
- What is the main climate type found on Madagascar?
 - desert
 - savanna
 - steppe
 - tropical rain forest
- How many capitals does the nation of South Africa have?
 - 0
 - 1
 - 2
 - 3
- What is the dominant land use in Angola?
 - commercial farming
 - forestry
 - nomadic herding
 - subsistence farming
- What capital is just north of the largest lake on the continent?
 - Cairo, Egypt
 - Bamako, Mali
 - Kampala, Uganda
 - Cape Town, South Africa
- What percentage of the labor force in Niger is involved in agriculture?
 - 50%
 - 75%
 - 80%
 - 90%
- Which of the following has the highest population growth?
 - Ethiopia
 - Niger
 - South Africa
 - the world
- The longest continental mountain range crosses which country?
 - Angola
 - Congo
 - Morocco
 - Niger

Sunny Days Music Festival

Festival Park

New Haven, New York

August 10-12, 2018

Sunny Days Music Festival Map

16. How many festival venues are indicated on the map?
- 1
 - 2
 - 3
 - 4
17. What do the gift box icons represent?
- Christmas
 - birthday gifts
 - vendors
 - not indicated
18. What is the scale of the insert compared to the other map?
- 4 to 1
 - 10 to 1
 - 20 to 1
 - not indicated
19. What does the dotted line represent?
- state highway
 - city street
 - river
 - parking area
20. Which venue is the furthest south?
- City Center
 - Festival Park
 - Morgan Art Center
 - University Park
21. Where in Festival Park is the camping area located?
- northeast corner
 - northwest corner
 - southeast corner
 - southwest corner
22. How many First Aid stations are shown on the map?
- 1
 - 2
 - 3
 - 4
23. The insert shows details for what venue?
- City Center
 - Festival Park
 - Morgan Art Center
 - University Park
24. Which stage area is just north of the camping area?
- Sunrise Stage
 - Main Stage
 - Kiddie Stage
 - none
25. How many venues can be found along I45?
- 1
 - 2
 - 3
 - 4
- TRUE/FALSE**
26. The festival takes place the last week in August.
27. There are more venues south of Baker Street than north of it.
28. On-site parking for Festival Park is on the northeast side.
29. There is an exit near each corner of Festival Park.
30. There are more vendors than restrooms in Festival Park.

POST MUSIC FESTIVAL SURVEY RESULTS

Music Festival Survey

31. What does the line with triangles represent?
- genres
 - average age of genre fan
 - average amount of dollars spent on merchandise
 - percentage of fans interested in a particular genre
32. What genre had the highest percentage of self-identified fans?
- rock
 - rap
 - country
 - jazz
33. Which genre's fans spent the most on average?
- electronic
 - rap
 - country
 - rock
34. Which genre's fans had the lowest average age?
- jazz
 - classical
 - soul
 - reggae
35. How many people took part in the survey?
- under 100
 - 100
 - over 100
 - not indicated
36. How many genres of music are represented on the graph?
- 3
 - 5
 - 8
 - 11
37. How many genres had an average fan age above 30?
- 2
 - 4
 - 6
 - 0
38. Which genre with an average fan age over 30 had the highest percentage of self-identified fans?
- electronic
 - rock
 - classical
 - rap
39. How many genres had a percentage of self-identified fans above 30%?
- 2
 - 4
 - 6
 - 0
40. Which of the following is not represented by the y axis?
- age
 - dollars
 - attendance in thousands
 - percentage of fans
- TRUE/FALSE**
41. The fans of the genre with the oldest average age spent the least money on merchandise.
42. More people are country music fans than soul music fans.
43. The survey was taken after a music festival.
44. The x-axis is ordered from highest genre fan percentage to lowest.
45. Rap fans spent more on merchandise per person than electronic fans.

This page is intentionally blank.

Asia

46. How many of the world's tallest 100 peaks are in Asia?
- 10
 - 40
 - 80
 - 100
47. Balqash, Kazakhstan is on the north shore of what body of water?
- Caspian Sea
 - Lake Balkhash
 - Aral Sea
 - Arabian Sea
48. The Himalayas are in what area of China?
- eastern border
 - western border
 - northern border
 - southern border
49. What do purple areas of the elevation map indicate?
- elevation of over 6,000 meters
 - an elevation range of 3,000 to 6,000 meters
 - an elevation range of 1,500 to 3,000 meters
 - an elevation range of 600 to 1,500 meters
50. What capital city can be found below the equator at about 107°E?
- Vientiane, Laos
 - Jakarta, Indonesia
 - Manila, Philippines
 - Tokyo, Japan
51. How many types of land cover are shown on the Land Cover Map?
- 6
 - 7
 - 8
 - 9
52. Which of the following countries gets the most precipitation?
- Iran
 - Saudi Arabia
 - Thailand
 - Afghanistan
53. Gaza is officially part of what country?
- Jordan
 - Israel
 - Syria
 - none
54. The area of the continent known as "the cold desert" can be found in what country?
- Yemen
 - Russia
 - India
 - Oman
55. Russian territory cannot be found on which regional map?
- | | |
|----------------------|--|
| a. Southwestern Asia | c. Eastern Asia |
| b. Central Asia | d. Russian territories noted on all maps |
56. Which country is not an OPEC member?
- Algeria
 - Libya
 - Nigeria
 - Russia
57. Which of the following Indian cities has the largest population?
- Bangalore
 - Meerut
 - Patna
 - Vijayawada
58. China exports the least amount of goods to which country?
- Japan
 - United States
 - Hong Kong
 - All others
59. Which country has the highest GDP?
- India
 - Japan
 - South Korea
 - Indonesia
60. The longest river on the continent is in what country?
- China
 - India
 - Japan
 - Russia

Music Fest: Cost/Sales in Dollars

Music Festival Merchandise Sales

61. What years are represented on the graph?
- 2016, 2017
 - 2008, 2009
 - 2010, 2011
 - 2012, 2013
62. What do the darker bars represent?
- sales
 - number of bands
 - costs
 - number of venues
63. What was the single biggest expense in 2016??
- band bookings
 - merchandise
 - food/drink
 - venues
64. Which year had higher sales in Food/Drink?
- 2017
 - 2016
 - 2008
 - 2011
65. Which year had a higher total of sales?
- 2017
 - 2016
 - 2008
 - 2009
66. The cost went down in how many categories in 2017?
- 1
 - 4
 - 3
 - 2
67. Which year had higher profits for merchandise?
- 2008
 - 2011
 - 2016
 - 2017
68. How many separate (not counting annual totals) cost categories are there?
- 2
 - 4
 - 6
 - 5

69. Besides ticket sales, what category had the next highest amount of sales for 2017?
- venues
 - merchandise
 - band booking
 - food/drink
70. How much more did the venues cost in 2017?
- \$30,000
 - \$33,000
 - \$6,000
 - \$20,000

TRUE/FALSE

71. Merchandise sales had a higher sales total in 2016.
72. The cost for booking bands doubled in 2017.
73. Venue sales increased by 30,000 from 2016 to 2017.
74. Merchandise had higher sales than Food/Drink sales in both years.
75. The x axis provides sales and cost information in dollars.

- (1) Evaluate: $2^0 + 3^0 - 0.25^{-1}$
A) $-\frac{1}{4}$ B) -2 C) $3\frac{1}{4}$ D) $1\frac{3}{4}$ E) $4\frac{1}{4}$
- (2) $2\frac{2}{3}$ yards + 3 feet – 24 inches = _____
A) 9 ft. B) 13 ft. C) $3\frac{2}{3}$ ft. D) $3\frac{1}{3}$ E) None of these
- (3) $17 \times \frac{18}{19} =$ _____
A) $17\frac{1}{19}$ B) $16\frac{17}{19}$ C) $18\frac{1}{19}$ D) $17\frac{2}{19}$ E) $16\frac{2}{19}$
- (4) $12 - 3 \times 4^0 =$ _____
A) 12 B) 36 C) 0 D) 9 E) 5
- (5) $1230104 \div 11$ has a remainder of _____
A) 4 B) 6 C) 7 D) 9 E) 10
- (6) What is the area of an isosceles triangle with congruent sides 5 cm and other side 8 cm?
A) 20 cm^2 B) 24 cm^2 C) 6 cm^2 D) 12 cm^2 E) 15 cm^2
- (7) If the length of the shadow for a yardstick is 24 inches while Noah's shadow is 20 inches long. How tall is Noah?
A) 36 in. B) 34 in. C) 32 in. D) 30 in. E) 28 in.
- (8) What is the sum of the prime numbers less than ten?
A) 17 B) 26 C) 15 D) 18 E) 27
- (9) One-sixteenth is equivalent to what percent?
A) 16 B) $6\frac{1}{4}$ C) $8\frac{1}{3}$ D) $8\frac{2}{3}$ E) $16\frac{2}{3}$
- (10) If a circle's diameter is increased by 25%, then its area is
A) 25% larger. B) 125% larger. C) $\frac{5}{4}$ larger. D) 625% larger. E) $\frac{25}{16}$ larger.
- (11) $9\frac{1}{2}$ percent of 24 is the same as 19% of _____
A) 6 B) 48 C) 12 D) 18 E) 16
- (12) Mackenzie's class has 10 boys and 14 girls. If her teacher randomly chooses a student to hand out papers, what is the probability that a girl will be chosen?
A) $\frac{5}{7}$ B) $\frac{7}{10}$ C) $\frac{7}{5}$ D) $\frac{7}{12}$ E) $\frac{5}{12}$

- (13) A pizza was cut into 12 equal slices. Eduardo ate one-third of the slices and gave one-half of the remaining slices to friends. How many slices were left?
 A) 8 B) 6 C) 5 D) 4 E) 2
- (14) 35 base 6 equals _____ base 10?
 A) 8 B) 64 C) 11 D) 18 E) 23

For Questions 15 – 18 please use the chart below.

- (15) 200 Students answered a survey at Eagle View Elementary on what type of ice cream was their favorite. Using the above chart, how many students liked Strawberry ice cream the best?
 A) 18 B) 180 C) 36 D) 72 E) 40
- (16) 200 Students answered a survey at Eagle View Elementary on what type of ice cream was their favorite. Using the above chart, how many students liked Raspberry or Vanilla ice creams the best?
 A) 54 B) 27 C) 24 D) 30 E) 120
- (17) 200 Students answered a survey at Eagle View Elementary on what type of ice cream was their favorite. Using the above chart, how many students did not choose Vanilla ice cream as their favorite?
 A) 88 B) 176 C) 98 D) 60 E) 84
- (18) 200 Students answered a survey at Eagle View Elementary on what type of ice cream was their favorite. Using the above chart, if the average amount of ice cream eaten that day by each student was 2 ounces, how much chocolate ice cream was eaten?
 A) 88 oz. B) 24 oz. C) 48 oz. D) 60 oz. E) 96 oz.
- (19) 28.4 decimeters = _____ centimeters (cm).
 A) 0.284 cm B) 0.00284 cm C) 2.84 cm D) 284 cm E) 2840 cm

- (20) Lisha puts dots that are equally spaced apart on a sheet of paper. The dots are 1-inch apart. If there are 13 dots in each of 17 rows, what is the distance from the first dot in the 1st row to the last dot in the 17th row?
 A) 400 in. B) 30 in. C) $17\sqrt{13}$ in. D) 28 in. E) 20 in.
- (21) Genny draws a single card from a standard deck of 52 playing cards. What is the probability that she draws a red queen?
 A) $\frac{1}{4}$ B) $\frac{1}{26}$ C) $\frac{1}{52}$ D) $\frac{1}{2}$ E) $\frac{1}{13}$
- (22) $9\frac{1}{3} \times 9\frac{2}{3} = \underline{\hspace{2cm}}$
 A) $81\frac{2}{3}$ B) $90\frac{2}{3}$ C) $81\frac{2}{9}$ D) $90\frac{1}{9}$ E) None of these
- (23) If the area of circle is 36π , what is its circumference?
 A) 12π B) 18π C) 6π D) 12 E) 9π
- (24) Matt placed 20 bricks on the ground next to each other. He then placed 19 bricks on top of that row. He then placed 18 bricks on the next row above and continued to do so until there was only one brick to the top-most row. How many bricks total did Matt place?
 A) 420 B) 400 C) 380 D) 210 E) 200
- (25) If $2x - y = 24$ and $x + y = 30$, then $y = \underline{\hspace{2cm}}$
 A) 18 B) 12 C) -18 D) -12 E) -6
- (26) If $f(x) = x^2 + 4.6x + 5.29$, then $f(-2) = \underline{\hspace{2cm}}$
 A) 4 B) 18.49 C) 0.09 D) 9.2 E) 0.9
- (27) If the shaded area in the figure to the right is 200 square centimeters, what is the perimeter of the square?
 A) 20 cm D) 40 cm
 B) 400 cm E) 80 cm
 C) 1200 cm

- (28) Set $A = \{P, R, I, M, E\}$, $B = \{N, U, M, B, E, R\}$ and $C = \{U, I, L\}$. What is the number of unique elements in $A \cup C \cap B$?
 A) 4 B) 6 C) 3 D) 5 E) None of these
- (29) How many whole numbers will evenly divide into 24?
 A) 24 B) 36 C) 8 D) 48 E) 12
- (30) $42 \div 16 - 10 \div 16 =$
 A) 32 B) 2 C) 8 D) 4 E) 24

- (31) $0.06666\dots =$ _____ common fraction.
 A) $\frac{1}{30}$ B) $\frac{1}{6}$ C) $\frac{2}{15}$ D) $\frac{1}{15}$ E) $\frac{2}{33}$
- (32) Five identical squares, each with area of 36 square inches, are placed so that they each touch each other on a side, forming a rectangle. What is the perimeter of the rectangle?
 A) 180 in. B) 120 in. C) 72 in. D) 60 in. E) 36 in.
- (33) $(26 \times 17 + 74) \div 9$ has a remainder of _____
 A) 1 B) 3 C) 4 D) 6 E) 8
- (34) If you roll a single fair die, what are the odds that the number of dots showing on top is greater than 4?
 A) $\frac{1}{2}$ B) $\frac{1}{6}$ C) $\frac{1}{3}$ D) $\frac{2}{3}$ E) $\frac{2}{1}$
- (35) Wes can peel a bushel of potatoes in $1\frac{1}{2}$ hours, while Noah can peel a bushel of potatoes in 45 minutes. If the brothers work together, how long would it take them to peel a bushel of potatoes?
 A) $2\frac{1}{2}$ hrs. B) $2\frac{1}{4}$ hrs. C) $\frac{1}{2}$ hr. D) $\frac{4}{9}$ hr. E) $1\frac{1}{3}$ hrs.
- (36) What is the least common multiple of 24, 18 and 21?
 A) 3 B) 72 C) 84 D) 122 E) 504
- (37) The time difference, ignoring daylight savings time, between Austin, Texas and Vatican City, Italy is such that Vatican City is seven hours ahead. Los Angeles, California is 2 hours behind Austin. If it is 1:00 PM in Los Angeles, what time is it in the Vatican City?
 A) 3:00 AM B) 9:00 AM C) 7:00 PM D) 10:00 PM E) 11:00 PM
- (38) If R_1 and R_2 represents the two answers for the equation $2x^2 - 6x + 15 = 0$, what is $R_1 + R_2$?
 A) $7\frac{1}{2}$ B) $\frac{2}{15}$ C) 3 D) $\frac{1}{3}$ E) -3
- (39) What is the area of a rhombus with diagonals $12\frac{1}{3}$ cm and 6 cm?
 A) 37 cm^2 B) 42 cm^2 C) 68 cm^2 D) 74 cm^2 E) 108 cm^2
- (40) What is the tenth term in the Fibonacci sequence 1, 1, 2, 3, 5, ...?
 A) 21 B) 29 C) 34 D) 38 E) 55
- (41) A rectangular garden 50 feet long and 10 feet wide is enclosed by a fence. To make the garden larger, while using the same fence, its shape is changed to a square. By how many square feet does this enlarge the garden?
 A) 100 feet^2 B) 200 feet^2 C) 300 feet^2 D) 400 feet^2 E) 500 feet^2
- (42) $(6 \heartsuit 3) + 4 - (2 - 1) = 5$ if \heartsuit is which math operation?
 A) + B) - C) \times D) \div E) $\sqrt{\quad}$

- (43) The third exit on a highway is located at milepost 40 and the tenth exit is at milepost 160. There is a service center on the highway located three-fourths of the way from the third exit to the tenth exit. At what milepost would you expect to find this service center?
 A) 90 B) 100 C) 110 D) 120 E) 130

- (44) Three flower beds overlap as shown to the right. Bed A has 500 plants, bed B has 450 plants, and bed C has 350 plants. Beds A and B share 50 plants, while beds A and C share 100. What is the total number of plants?
 A) 850 D) 1300
 B) 1000 E) 1450
 C) 1150

- (45) The average age of the 40 members of a computer science camp is 17 years. There are 20 girls, 15 boys, and 5 adults. If the average age of the girls is 15 and the average age of the boys is 16, what is the average age of the adults?
 A) 26 B) 27 C) 28 D) 29 E) 30

- (46) Soda is sold in packs of 6, 12 and 24 cans. What is the minimum number of packs needed to buy exactly 90 cans of soda?
 A) 4 B) 5 C) 6 D) 8 E) 15

- (47) 2019^{2020} divided by 5 has a remainder of _____.
 A) 0 B) 1 C) 2 D) 3 E) 4

- (48) An ape at the Fort Worth Zoo ate 100 bananas from May 1st through May 5th. Each day she ate six more bananas than on the previous day. How many bananas did the ape eat on May 5th?
 A) 20 B) 22 C) 30 D) 32 E) 34

- (49) How many distinct triangles can be drawn using three of the dots shown to the right as vertices?
 A) 9 D) 20
 B) 12 E) 24
 C) 18

- (50) Albert’s empty swimming pool will hold 24,000 gallons of water when full. The pool will be filled by 4 hoses, each of which supplies 2.5 gallons of water per minute. How many hours will it take to fill the pool?
 A) 40 B) 42 C) 44 D) 46 E) 48

2018 – 2019 University Interscholastic League JH/MS Mathematics Contest B

- (1) Evaluate: $\left(\frac{1}{4}\right)^{-2} \div 2 - 4^0$
- A) 7 B) 8 C) $\frac{1}{32}$ D) $\frac{1}{8}$ E) -8
- (2) Forty-eight nickels plus nine quarters = _____.
- A) \$2.40 B) \$2.25 C) 46 dimes D) \$4.56 E) $46\frac{1}{2}$ dimes
- (3) $9 \times \frac{10}{11} =$ _____.
- A) $9\frac{2}{11}$ B) $8\frac{2}{11}$ C) $\frac{9}{11}$ D) $10\frac{8}{11}$ E) $9\frac{8}{11}$
- (4) $44\frac{4}{9}\% =$ _____.
- A) $\frac{4}{11}$ B) $\frac{8}{9}$ C) $\frac{4}{9}$ D) $\frac{9}{11}$ E) $\frac{9}{44}$
- (5) 88 feet/second = _____ miles per hour (mph).
- A) $129\frac{1}{3}$ mph B) 44 mph C) 120 mph D) 60 mph E) 132 mph
- (6) If $1^\circ\text{C} = \frac{5}{9}(1^\circ\text{F} - 32)$, then $60^\circ\text{C} =$ _____.
- A) 140°F B) $15\frac{5}{9}^\circ\text{F}$ C) 92°F D) $50\frac{2}{5}^\circ\text{F}$ E) None of these
- (7) $\frac{3}{16} =$ _____%
- A) $18\frac{1}{4}$ B) $18\frac{3}{4}$ C) $53\frac{1}{4}$ D) $53\frac{1}{3}$ E) $6\frac{3}{4}$
- (8) 2.2 is what percent of 20?
- A) 110 B) 1.1 C) 11 D) $9\frac{1}{11}$ E) $9\frac{1}{9}$
- (9) If four pencils cost \$1.20, then six pencils cost _____.
- A) \$1.80 B) 90¢ C) \$2.08 D) \$1.50 E) \$1.60
- (10) What is the arithmetic mean of 36, 22, 34 and 20?
- A) 27 B) 28 C) 29 D) 26 E) 25
- (11) Which of those listed below is a triangular number?
- A) 16 B) 18 C) 21 D) 27 E) 33

- (12) If $48^2 - 42^2 = 12k$, then k is equal to what value?
 A) 45 B) 6 C) 12 D) 64 E) 90
- (13) If $A > 1$ and $A^k \div A^2 \times A = A^4$, then k has what value?
 A) 9 B) 8 C) 7 D) 6 E) None of these
- (14) If $y = 19$ and $x = 13$, then what does $x^2 - 2xy + y^2$ equal?
 A) 6 B) -36 C) 18 D) 6 E) 36

For questions 15 – 18, please use the graph below.

- (15) If tickets were \$2 each, how much more money was made in ticket sales for the most daily ticket sales compared to the least daily ticket sales?
 A) \$90 B) \$60 C) \$120 D) \$50 E) \$70
- (16) What is the range for the number of tickets sold over the five-day period?
 A) 60 tickets B) 64 tickets C) 65 tickets D) 320 tickets E) 160 tickets
- (17) If ticket were \$2 each, how much money was made in ticket sales for the five-day period?
 A) \$320 B) \$160 C) \$128 D) \$130 E) \$640
- (18) What is the positive difference in the arithmetic mean and median for the total number of tickets sold over the five-day period?
 A) 65 tickets B) 64 tickets C) 139 tickets D) 1 ticket E) zero tickets
- (19) Find n , so that $917n$ is the largest four-digit number divisible by six.
 A) 2 B) 4 C) 6 D) 8 E) 0
- (20) $24 \div 0.08333 \dots = \underline{\hspace{2cm}}$.
 A) 1 B) 144 C) 288 D) 48 E) 2

- (21) $\sqrt{29 \times 31 + 1} = \underline{\hspace{2cm}}$.
 A) 31 B) 32 C) 33 D) 34 E) None of these
- (22) How much does it cost to drive a car 90 miles at twenty-five cents per mile?
 A) \$22.50 B) \$36 C) \$29.25 D) \$225 E) \$27.78
- (23) What is the simple interest on \$120 at 6% annual for three months?
 A) \$18 B) \$7.20 C) \$3.60 D) \$1.80 E) None of these
- (24) Four cups equal _____ liquid ounces.
 A) 16 B) 32 C) 36 D) 48 E) 96
- (25) If the sum of three consecutive even integers is 132, what is the largest integer?
 A) 42 B) 44 C) 46 D) 48 E) 52
- (26) A black bag contains 2 blue marbles, 1 red marble, 4 green marbles, 5 yellow marbles and 3 black marbles. All marbles are of identical size and weight. If Mackenzie reaches in and picks a single marble that is not blue, what is the probability that on the next try she pulls out a blue marble?
 A) $\frac{2}{15}$ B) $\frac{1}{5}$ C) $\frac{1}{3}$ D) $\frac{4}{15}$ E) $\frac{1}{7}$
- (27) Noah opens his bible to a random location and notices the product of the two page-numbers is 380. What is the sum of the two page-numbers that Noah turned to?
 A) 39 B) 40 C) 37 D) 38 E) 48
- (28) What is the slope of the straight line passing through the points (-2, 6) and (4, -10)?
 A) $\frac{8}{3}$ B) $\frac{3}{8}$ C) $\frac{2}{1}$ D) $-\frac{1}{2}$ E) $-\frac{8}{3}$
- (29) If $x + y = 6$ and $xy = 8$, then $x^2 + y^2 = \underline{\hspace{2cm}}$.
 A) 36 B) 28 C) 14 D) 20 E) 24
- (30) At one ticket window 9 adult tickets and 8 child tickets were sold for a total of \$69. At another ticket window, 4 adult and 12 child tickets were sold for a total of \$56. If two parents and their one child bought tickets, how much would they pay total?
 A) \$13 B) \$11 C) \$16 D) \$18 E) \$9
- (31) Two sides of a triangle measure 18 cm and 36 cm. What is the smallest possible integral length of the third side of the triangle?
 A) 18 cm B) 19 cm C) 17 cm D) 54 cm E) 55 cm
- (32) How many positive integral divisors does the number 40 have?
 A) 40 B) 200 C) 16 D) 8 E) 4
- (33) Genny walked 12 feet due West and then stopped. She then turned North and walked 16 feet and stopped. To the nearest foot, how far away was Genny from her starting point?
 A) 28 feet B) 4 feet C) 112 feet D) 400 feet E) 20 feet

- (34) When it is midnight in Vatican City, Italy, it is 6:00 PM the previous day in Fairfax, Virginia; 3:00 PM in San Francisco, California; and 5:00 PM in Houston Texas. If it is 8:00 AM in San Francisco, California, what time is it in the Fairfax, Virginia?

A) 5:00 AM same day
 B) 1:00 AM same day
 C) 3:00 PM same day
 D) 3:00 AM same day
 E) 11:00 AM same day

- (35) In the figure to the right, the square has an area of 64 cm^2 and is one-third the area of rectangle ABCD. What is the perimeter of rectangle ABCD?

A) 192 cm
 B) 96 cm
 C) 80 cm
 D) 64 cm
 E) 32 cm

- (36) Genny can vacuum four rooms of the home in 30 minutes. Andy takes 45 minutes to vacuum the same four rooms. If they work together, how long would it take them to vacuum the four rooms?

A) 16 minutes B) 18 minutes C) 24 minutes D) 28 minutes E) 36 minutes

- (37) What is the x -intercept of the graph of the linear function: $f(x) = \frac{3}{8}x - 24$?

A) $(-\frac{1}{24}, 0)$ B) (24, 0) C) (64, 0) D) (-9, 0) E) (9, 0)

- (38) Thirty-three minutes is what percent of an hour?

A) 33 B) $33\frac{1}{3}$ C) 55 D) 45 E) $30\frac{1}{3}$

- (39) If set $A = \{D, E, L, R, I, O\}$, set $B = \{T, E, X, A, S\}$ and set $C = \{R, I, O, G, R, A, N, D, E\}$, then $A \cup B \cap C$ has how many unique elements?

A) 3 B) 4 C) 5 D) 6 E) 8

- (40) Noah, who is 2 feet 6 inches tall casts a shadow that is 4 feet long when Mackenzie casts a shadow that is 6 feet long. How tall is Mackenzie?

A) 3 ft 8 in. B) 3 ft. 9 in. C) 4 ft. 3 in. D) 4 ft. 8 in. E) 4 ft. 9 in.

- (41) If the angles of a triangle are in the ratio 2, 4, 6, what is the sum of the measures of the two largest angles?

A) 30° B) 60° C) 72° D) 90° E) 150°

- (42) How many ways are there to make change for a quarter using only pennies and/nickels?

A) 4 B) 6 C) 10 D) 15 E) 25

- (43) Wesley's school has 1400 students. If the teacher-student ratio is 1:35, how many additional teachers will have to be hired to change the ratio to 1:20?

A) 30 B) 40 C) 55 D) 70 E) 110

- (44) If $A \heartsuit B = B^A$, then $2 \heartsuit 3 = \underline{\hspace{1cm}}$.

A) 6 B) 9 C) 8 D) 12 E) 24

- (45) Using all the letters in the word, TEXAS, how many arrangements are possible?
 A) 1 B) 5 C) 20 D) 24 E) 120
- (46) How many people can be seated at 12 square tables lined up end to end if each table used individually seats four persons?
 A) 24 B) 26 C) 28 D) 36 E) 48
- (47) What is the product of the least common multiple and greatest common divisor of 24 and 18?
 A) 42 B) 72 C) 84 D) 432 E) 540
- (48) What is the volume of a right cylinder with diameter 8 centimeters (cm) and length 10 cm?
 A) $80\pi \text{ cm}^3$ B) $160\pi \text{ cm}^3$ C) $180\pi \text{ cm}^3$ D) $200\pi \text{ cm}^3$ E) $640\pi \text{ cm}^3$
- (49) The figure shown to the right is made of two squares, labeled A and B, and two congruent rectangles, labeled R. The area of square A is 9 square units and the area of square B is 16 square units. What is the sum of the areas of the two rectangles?
 A) 24 square units
 B) 25 square units
 C) 28 square units
 D) 49 square units
 E) 50 square units
- (50) Mike received a birthday gift of money. He loaned \$5 to his friend Dan and spent half of the remaining money. The next day he received \$10 from his uncle. After spending \$9 at the movies, he still had \$11.00 left. How much money did Mike receive for his birthday?
 A) \$15 B) \$16 C) \$20 D) \$25 E) \$35

2018 – 2019 University Interscholastic League JH/MS Mathematics Contest C

- (1) Evaluate: $\left(\frac{1}{3}\right)^{-2} \div 3 - 3^0$
- A) 2 B) 3 C) $\frac{1}{27}$ D) $\frac{26}{27}$ E) -3
- (2) Forty-four nickels plus eight quarters = _____.
- A) \$2.20 B) \$2.00 C) 42 dimes D) \$4.02 E) $42\frac{1}{5}$ dimes
- (3) $8 \times \frac{10}{12} =$ _____.
- A) $9\frac{2}{3}$ B) $8\frac{5}{6}$ C) $\frac{2}{3}$ D) $7\frac{5}{6}$ E) $6\frac{2}{3}$
- (4) $63\frac{7}{11}\%$ = _____.
- A) $\frac{6}{11}$ B) $\frac{63}{11}$ C) $\frac{7}{11}$ D) $\frac{11}{63}$ E) $\frac{7}{9}$
- (5) 22 feet/second = _____ miles per hour (mph).
- A) $32\frac{4}{15}$ mph B) 15 mph C) 32 mph D) 66 mph E) 132 mph
- (6) If $1^\circ\text{C} = \frac{5}{9}(1^\circ\text{F} - 32)$, then $40^\circ\text{C} =$ _____.
- A) 104°F B) $44\frac{4}{9}^\circ\text{F}$ C) 140°F D) $40\frac{4}{9}^\circ\text{F}$ E) None of these
- (7) $\frac{5}{16} =$ _____%
- A) $31\frac{1}{5}$ B) $31\frac{3}{4}$ C) $3\frac{1}{5}$ D) $3\frac{1}{8}$ E) $31\frac{1}{4}$
- (8) 3.2 is what percent of 20?
- A) 64 B) 1.6 C) 16 D) $6\frac{1}{4}$ E) $9\frac{16}{25}$
- (9) If four pens cost \$3.20, then six pencils cost _____.
- A) \$6.80 B) 80¢ C) \$5.33 D) \$4.80 E) \$1.92
- (10) What is the arithmetic mean of 16, 22, 34 and 20?
- A) 21 B) 22 C) 23 D) 24 E) 25
- (11) Which of those listed below is a triangular number?
- A) 15 B) 16 C) 18 D) 20 E) 33

- (12) If $48^2 - 42^2 = 3k$, then k is equal to what value?
 A) 180 B) 36 C) 360 D) 60 E) 90
- (13) If $A > 1$ and $A^k \div A^2 \times A = A^5$, then k has what value?
 A) 9 B) 8 C) 7 D) 6 E) None of these
- (14) If $y = 18$ and $x = 12$, then what does $x^2 - 2xy + y^2$ equal?
 A) 6 B) -36 C) 18 D) -6 E) 36

For questions 15 – 18, please use the graph below.

- (15) If tickets were \$3 each, how much more money was made in ticket sales for the most daily ticket sales compared to the least daily ticket sales?
 A) \$180 B) \$60 C) \$120 D) \$90 E) \$70
- (16) What is the range for the number of tickets sold over the five-day period?
 A) 60 tickets B) 64 tickets C) 65 tickets D) 320 tickets E) 160 tickets
- (17) If tickets were \$3 each, how much money was made in ticket sales for the five-day period?
 A) \$320 B) \$960 C) \$160 D) \$480 E) \$640
- (18) What is the positive difference in the arithmetic mean and median for the total number of tickets sold over the five-day period?
 A) 65 tickets B) 64 tickets C) 139 tickets D) 1 ticket E) zero tickets
- (19) Find n , so that $832n$ is the largest four-digit number divisible by six.
 A) 2 B) 4 C) 6 D) 8 E) 0
- (20) $36 \div 0.08333 \dots = \underline{\hspace{2cm}}$.
 A) 3 B) 30 C) 288 D) 24 E) 432

- (21) $\sqrt{28 \times 32 + 4} = \underline{\hspace{2cm}}$.
 A) 31 B) 32 C) 33 D) 34 E) None of these
- (22) How much does it cost to drive a car 120 miles at twenty-five cents per mile?
 A) \$48 B) \$36 C) \$30 D) \$300 E) \$480
- (23) What is the annual simple interest on \$120 at 6% for four months?
 A) \$2.40 B) \$7.20 C) \$3.60 D) \$1.80 E) None of these
- (24) Six cups equal _____ liquid ounces.
 A) 16 B) 32 C) 36 D) 48 E) 96
- (25) If the sum of three consecutive even integers is 102, what is the largest integer?
 A) 32 B) 34 C) 36 D) 38 E) 42
- (26) A black bag contains 2 blue marbles, 1 red marble, 4 green marbles, 5 yellow marbles and 3 black marbles. All marbles are of identical size and weight. If Mackenzie reaches in and picks a single marble that is not green, what is the probability that on the next try she pulls out a green marble?
 A) $\frac{4}{5}$ B) $\frac{1}{5}$ C) $\frac{1}{3}$ D) $\frac{4}{15}$ E) $\frac{2}{7}$
- (27) Noah opens his bible to a random location and notices the product of the two page-numbers is 702. What is the sum of the two page-numbers that Noah turned to?
 A) 54 B) 53 C) 51 D) 49 E) 48
- (28) What is the slope of the straight line passing through the points (0, 6) and (6, -10)?
 A) $\frac{8}{3}$ B) $\frac{3}{8}$ C) $\frac{2}{1}$ D) $-\frac{1}{2}$ E) $-\frac{8}{3}$
- (29) If $x + y = 7$ and $xy = 12$, then $x^2 + y^2 = \underline{\hspace{2cm}}$.
 A) 50 B) 25 C) 24 D) 20 E) 18
- (30) At one ticket window, 10 adult tickets and 8 child tickets were sold for a total of \$92. At another ticket window, 5 adult and 12 child tickets were sold for a total of \$78. If two parents and their one child bought tickets, how much would they pay total?
 A) \$13 B) \$11 C) \$16 D) \$18 E) \$9
- (31) Two sides of a triangle measure 20 cm and 36 cm. What is the smallest possible integral length of the third side of the triangle?
 A) 17 cm B) 18 cm C) 19 cm D) 54 cm E) 56 cm
- (32) How many positive integral divisors does the number 36 have?
 A) 36 B) 1296 C) 9 D) 18 E) 24
- (33) Genny walked 24 feet due West and then stopped. She then turned North and walked 10 feet and stopped. To the nearest foot, how far away was Genny from her starting point?
 A) 34 feet B) 26 feet C) 240 feet D) 676 feet E) 25 feet

- (34) When it is midnight in Vatican City, Italy, it is 6:00 PM the previous day in Fairfax, Virginia; 3:00 PM in San Francisco, California; and 5:00 PM in Houston Texas. If it is 9:00 AM in San Francisco, California, what time is it in the Fairfax, Virginia?
- A) 5:00 AM same day D) 3:00 AM same day
 B) 12:00 AM same day E) 12:00 PM same day
 C) 3:00 PM same day

- (35) In the figure to the right, the square has an area of 81 cm^2 and is one-third the area of rectangle ABCD. What is the perimeter of rectangle ABCD?
- A) 90 cm D) 54 cm
 B) 72 cm E) 27 cm
 C) 63 cm

- (36) Genny can vacuum four rooms of the home in 24 minutes. Andy takes 48 minutes to vacuum the same four rooms. If they work together, how long would it take them to vacuum the four rooms?
- A) 16 minutes B) 18 minutes C) 24 minutes D) 28 minutes E) 36 minutes

- (37) What is the x -intercept of the graph of the linear function: $f(x) = \frac{3}{8}x - 18$?
- A) $(-\frac{1}{24}, 0)$ B) (24, 0) C) (64, 0) D) (48, 0) E) (6, 0)

- (38) Twenty-seven minutes is what percent of an hour?
- A) 9 B) $33\frac{1}{3}$ C) 48 D) 45 E) $22\frac{2}{9}$

- (39) If set $A = \{A, U, S, T, I, N\}$, set $B = \{T, E, X, A, S\}$ and set $C = \{T, R, A, V, I, S\}$, then $A \cup B \cap C$ has how many unique elements?
- A) 3 B) 4 C) 5 D) 6 E) 8

- (40) Noah, who is 2 feet 6 inches tall casts a shadow that is 6 feet long when Mackenzie casts a shadow that is 10 feet long. How tall is Mackenzie?
- A) 5 ft 8 in. B) 5 ft. 2 in. C) 4 ft. 8 in. D) 4 ft. 4 in. E) 4 ft. 2 in.

- (41) If the angles of a triangle are in the ratio 2:3:5, what is the sum of the measures of the two largest angles?
- A) 90° B) 120° C) 126° D) 144° E) 154°

- (42) How many ways are there to make change for a quarter using only dimes and or pennies?
- A) 4 B) 3 C) 10 D) 15 E) 25

- (43) Wesley's school has 1400 students. If the teacher-student ratio is 1:35, how many additional teachers will have to be hired to change the ratio to 1:25?
- A) 56 B) 40 C) 26 D) 20 E) 16

- (44) If $A \heartsuit B = B^A$, then $3 \heartsuit 4 = \underline{\hspace{1cm}}$.
- A) 64 B) 12 C) 81 D) 27 E) 24

- (45) Using all the letters in the word, AUSTIN, how many arrangements are possible?
 A) 1 B) 6 C) 36 D) 360 E) 720
- (46) How many people can be seated at 16 square tables lined up end to end if each table used individually seats four persons?
 A) 34 B) 36 C) 56 D) 64 E) 128
- (47) What is the product of the least common multiple and greatest common divisor of 16 and 24?
 A) 384 B) 192 C) 96 D) 90 E) 54
- (48) What is the volume of a right cylinder with diameter 12 centimeters (cm) and length 10 cm?
 A) $90\pi \text{ cm}^3$ B) $24\pi \text{ cm}^3$ C) $144\pi \text{ cm}^3$ D) $360\pi \text{ cm}^3$ E) $480\pi \text{ cm}^3$
- (49) The figure shown to the right is made of two squares, labeled A and B, and two congruent rectangles, labeled R. The area of square A is 16 square units and the area of square B is 25 square units. What is the sum of the areas of the two rectangles?
 A) 20 square units
 B) 16 square units
 C) 25 square units
 D) 40 square units
 E) 54 square units

- (50) Mike received a birthday gift of money. He loaned \$5 to his friend Dan and spent half of the remaining money. The next day he received \$10 from his uncle. After spending \$9 at the movies, he still had \$16.00 left. How much money did Mike receive for his birthday?
 A) \$15 B) \$16 C) \$20 D) \$25 E) \$35

**University Interscholastic League
2018 – 2019 Junior High Number Sense Test A**

Contestant's Number _____

Final		
2 nd		
1 st		
	Score	Initials

**Read Directions Carefully
Before Beginning Test**

**Do Not Unfold This Sheet
Until Told to Begin**

Directions: Do not turn this page until the person conducting this test gives the signal to begin. This is a ten-minute test. There are 80 problems. Solve accurately and quickly as many as you can in the order in which they appear. **ALL PROBLEMS ARE TO BE SOLVED MENTALLY.** Make no calculations with paper and pencil. Write only the answer in the space provided at the end of each problem. Problems marked with a (*) require approximate integral answers; any answer to a starred problem that is within five percent of the exact answer will be scored correct; all other problems require exact answers.

The person conducting this contest should explain these directions to the contestants.

Stop – Wait for Signal!

*(40) $2045 - 555 \times 999 =$ _____

(41) If set $A = \{A, U, S, T, I, N\}$ and $B = \{T, E, X, A, S\}$, then $A \cap B$ has how many elements? _____

(42) $14 \times 429 =$ _____

(43) $73201 \div 11$ has a remainder of _____

(44) What is the area of a parallelogram with base, $2\frac{1}{4}$ and height $6\frac{1}{4}$? _____

(45) 12 gallons = _____ quarts

(46) 213 base 4 = _____ base 10

(47) What is the surface area of a rectangular box with edges 12, 5 and 8? _____

(48) If $6 - 3x \leq 21$, then $x \geq$ _____

(49) If a number plus 3 times itself is 48, then what is the number? _____

*(50) $250\% \times 1088 =$ _____

(51) 232 base 6 + 145 base 6 = _____ base 6

(52) Three and one-eighth = _____ %

(53) $4\frac{3}{4} - 1\frac{5}{6} =$ _____ (mixed number)

(54) The measure of the interior angle of a regular pentagon is _____ degrees

(55) $111 \times 829 =$ _____

(56) What is the length of the hypotenuse for a right triangle with legs that measure 8 and 15? _____

(57) $\frac{1}{6} + \frac{1}{3} - \frac{1}{9} =$ _____

(58) For the sequence: 2, 3, 5, 8, 12, ..., k , 30, ... $k =$ _____

(59) $\frac{2 + 4 + 6 + \dots + 12}{6} =$ _____

*(60) $124\frac{1}{4} \times 125\frac{3}{4} =$ _____

(61) What is the probability of drawing a red king from a standard deck of playing cards? _____

(62) $5! + 4! \times 3! =$ _____

(63) $(319^2 \times 322) \div 4$ has a remainder of _____

(64) $\sqrt{92416} =$ _____

(65) The volume of a right cylinder with diameter 12 and length 11 is $k\pi$, and $k =$ _____

(66) The coordinates for the midpoint between (4, 2) and (6, -8) are (a , b). What is b ? _____

(67) If 18 % of $4\frac{1}{4}$ is $4\frac{1}{2}$ % of n , then $n =$ _____

(68) $\sqrt{361} - \sqrt{484} =$ _____

(69) $1 + 3 + 5 + \dots + 41 =$ _____

*(70) $28 \times 30 \times 32 =$ _____

(71) $2^5 + 3^4 + 4^3 =$ _____

(72) If the odds of an event successfully happening are 8 to 6, then the probability of that event happening is _____

(73) $0.1666\dots + 0.08333\dots =$ _____ (common fraction)

(74) $1.01 \times 1.5 =$ _____ (decimal)

(75) 25% of 44 less 44 is _____

(76) If 144 is the volume of a rectangular box with edges 8, 6 and n , what is n ? _____

(77) $45^2 + 15^2 =$ _____

(78) If 36π is the volume of a sphere, then its radius is _____

(79) $17^2 - 28^2 =$ _____

*(80) $833 \times 2404 =$ _____

(45) 41 base 10 = _____ base 6

(46) If $8 + 3x \geq 35$, then $x \geq$ _____

(47) What is the sum-total number of degrees in the interior of a regular pentagon? _____°

(48) The surface area of a cube with edge 8 is _____

(49) If a number minus 4 times itself is 24, then what is the number? _____

*(50) $444\frac{4}{9}\% \times 2690 =$ _____

(51) 232 base 6 - 45 base 6 = _____ base 6

(52) $529 \times 111 =$ _____

(53) $7\frac{5}{8} + 6\frac{5}{6} =$ _____ (mixed number)

(54) What is k in the sequence: 2, 5, 10, k , 26, ...?

(55) $\sqrt{96100} =$ _____

(56) What is the length of a side for a right triangle with hypotenuse 50, and other leg 48? _____

(57) $\frac{7}{8} + \frac{6}{8} + \frac{5}{8} + \dots + \frac{1}{8} =$ _____

(58) The number of unique edges for a square pyramid is

(59) $\frac{2+4+6+\dots+12}{1+2+3+\dots+12} =$ _____

*(60) $78\frac{1}{3} \times 79\frac{2}{3} =$ _____

(61) What are the odds of drawing a red queen from a standard deck of playing cards? _____

(62) $5! \div 4! \times 3! =$ _____

(63) $(67^2 \times 518) \div 5$ has a remainder of _____

(64) $0.2666\dots =$ _____ (common fraction)

(65) A hamburger patty with thickness 2 cm and diameter 10 cm has a volume of $k\pi$, and k _____ cm^3

(66) The coordinates for the midpoint between (6, -2) and (a, b) are (-4, -10). What is a ? _____

(67) If $8\frac{1}{2}\%$ of 32 is 4% of n , then $n =$ _____

(68) $\sqrt{289} + \sqrt{625} =$ _____

(69) $39^2 + 13^2 =$ _____

*(70) $41^4 =$ _____

(71) $2^5 \div 4^3 + 2^{-1} =$ _____

(72) If the probability of an event happening is $\frac{5}{6}$, what are the odds that the event will happen? _____

(73) $0.333\dots + 0.0833\dots =$ _____ (common fraction)

(74) $101 \times 125 =$ _____

(75) 24 more than 75% of 24 is _____

(76) The sum of positive integral factors of 12 is _____

(77) $8 \times 13 \times 25 =$ _____

(78) Five different books are on a shelf, how many different ways can the books be arranged? _____

(79) $\left(17\frac{1}{2}\right)^2 - \left(12\frac{1}{2}\right)^2 =$ _____

*(80) $699 \times 1430 =$ _____

	Score	Initials

**Read Directions Carefully
Before Beginning Test**

**Do Not Unfold This Sheet
Until Told to Begin**

Directions: Do not turn this page until the person conducting this test gives the signal to begin. This is a ten-minute test. There are 80 problems. Solve accurately and quickly as many as you can in the order in which they appear. **ALL PROBLEMS ARE TO BE SOLVED MENTALLY.** Make no calculations with paper and pencil. Write only the answer in the space provided at the end of each problem. Problems marked with a (*) require approximate integral answers; any answer to a starred problem that is within five percent of the exact answer will be scored correct; all other problems require exact answers.

The person conducting this contest should explain these directions to the contestants.

Stop – Wait for Signal!

A+ Ready Writing **for Elementary, Middle School, and Junior High**

Instructions for the Judges

Instructions

At some convenient time before the contest begins, the director shall discuss with the judges the criteria for evaluating the stories, making sure that they all have the same conception of those criteria and understand the relative importance to be accorded each. Each judge shall be given a copy of the evaluation sheet provided by the UIL. Judges should also read the Ready Writing topic sheets the contestants were given.

Criteria

The essays are to be evaluated as to relative excellence in interest (50%), organization (35%), and correctness of style (15%). Please make comments constructive and supportive. While judges are to consider all three elements in selecting the most effective stories, more weight should be given to interest than to organization, and to organization more than to correctness of style.

- (A) Interest depends primarily on perceptive ideas. It depends next upon originality and including specific examples, which individualize the story as an outgrowth of the writer's voice. The effectiveness of the title is also considered.
- (B) A well-organized story will present a clear thesis with well-developed paragraphs focused on the thesis. The use of transitions will also be examined as well as the effectiveness of support for the thesis. As a whole, the composition should be considered for clarity.
- (C) Grammatical correctness of style includes an examination of punctuation, sentence structure, grammar, word usage, and spelling.

Completing Evaluation Sheets

Before the results are announced, the judges shall prepare a written evaluation of each essay stating its good points and areas that could be improved. Comments need not be long, but they should be specific rather than general.

Rating the compositions

Judges should read the essays submitted and without marking on the essays, rank the essays in order of excellence: 1, 2, 3, 4, etc. Comments should be made on the evaluation sheets provided. The judges shall discuss the essays contending for a place, being permitted to alter their rankings as a result of the discussion. Judges are to reach a consensus on the rankings. There can be no ties in this contest.

Contestant Number _____

Contestant Name _____
 (to be filled in after judging)

UIL A+ Ready Writing Evaluation Sheet: Elementary, Middle School, and Junior High

Evaluation criteria are listed in the order of importance. Write the number that indicates the quality in each of the sub-areas and tally the points.

(50%) _____/100

INTEREST: Writing exhibits originality of thought, analytical acuteness and overall coherence of exposition.

	<u>POOR</u>	<u>FAIR</u>	<u>GOOD</u>	<u>EXCELLENT</u>
Perceptive ideas	_____/7	_____/13	_____/19	_____/25
Originality	_____/7	_____/13	_____/19	_____/25
Examples	_____/7	_____/13	_____/19	_____/25
Title	_____/7	_____/13	_____/19	_____/25

(35%) _____/70

ORGANIZATION: Each paragraph develops one idea and contributes to an understanding of main idea or thesis.

	<u>POOR</u>	<u>FAIR</u>	<u>GOOD</u>	<u>EXCELLENT</u>
Clear thesis	_____/3	_____/7	_____/11	_____/14
Well-developed paragraphs, focused on one idea	_____/3	_____/7	_____/11	_____/14
Transition	_____/3	_____/7	_____/11	_____/14
Thesis support	_____/3	_____/7	_____/11	_____/14
Composition clarity (as a whole)	_____/3	_____/7	_____/11	_____/14

(15%) _____/30

CORRECTNESS OF STYLE: Writing avoids errors in sentence structure, punctuation, grammar, word usage and spelling that hinder clear communication.

	<u>POOR</u>	<u>FAIR</u>	<u>GOOD</u>	<u>EXCELLENT</u>
Punctuation	_____/1	_____/3	_____/5	_____/6
Sentence structure	_____/1	_____/3	_____/5	_____/6
Grammar	_____/1	_____/3	_____/5	_____/6
Word Usage	_____/1	_____/3	_____/5	_____/6
Spelling	_____/1	_____/3	_____/5	_____/6

TOTAL SCORE: _____/200

CONSTRUCTIVE COMMENTS FOR THE CONTESTANT:

Please read "Instructions for the Judges" for Ready Writing Writing before evaluating contestants' papers. While judges are to consider all three elements in selecting the most effective compositions, they should weigh interest more than organization, and organization more than correctness of style.

AREAS NEEDING IMPROVEMENT:

Judge's signature _____

2018-19 A+ Ready Writing

INVITATIONAL

INSTRUCTIONS

Choose **one** of the following topics. Write the topic you have chosen at the top of your paper. **You should also include an original, creative title for your paper.** Remember you should not use your real name or that of your school.

SEVENTH AND EIGHTH GRADES

Topic: *Cell Phone Age*

People often say that kids these days are too interested in computers and cell phones. Imagine that a Texas law might be enacted with a requirement that you must be 16 years old to have a cell phone. Write a letter persuading the governor of Texas that this law would be good or bad for people in Texas. Be sure not to include your name or school in the letter.

Topic: *Resolving Conflict*

Think about a time when there was a conflict between two or more people in your life and you were caught in the middle of their problem. Write an essay explaining what was difficult about the situation and how you tried to help resolve it. Make sure not to include your name.

2018-19 A+ Ready Writing

FALL/WINTER DISTRICT

INSTRUCTIONS

Choose **one** of the following topics. Write the topic you have chosen at the top of your paper. **You should also include an original, creative title for your paper.** Remember you should not use your real name or that of your school.

SEVENTH AND EIGHTH GRADES

Topic: *Balancing Values*

A common debate in government is how to balance freedom, order, and equality. Think about each of those values, and then write an essay to persuade someone that either freedom, order, or equality is most important.

Topic: *Interesting Creation*

You have probably created something during your life, whether it was art, an invention, or something else. Think about everything you have created and write an essay describing the most interesting thing you have ever made and tell what prompted you to create.

2018-19 A+ Ready Writing

SPRING DISTRICT

INSTRUCTIONS

Choose **one** of the following topics. Write the topic you have chosen at the top of your paper. **You should also include an original, creative title for your paper.** Remember you should not use your real name or that of your school.

SEVENTH AND EIGHTH GRADES

Topic: *Soda Ban*

Imagine you have just learned that the city council where you live is considering banning soda from restaurants and schools. Think about the potential advantages and disadvantages of this decision. Then, write a letter to the city council persuading them of your opinion. Make sure not to include your name or school in the letter.

Topic: *Real World Experience*

Think about a time when something you learned in school was useful for something in the “real world.” Write an essay describing the experience and how the knowledge learned in school helped you in some way.

2018-2019 A+ SCIENCE I
INVITATIONAL TEST**

1. Which of the following are considered the products of photosynthesis?

- A. Water & Sucrose
B. Carbon Dioxide & Oxygen
C. Oxygen & Water
D. Oxygen & Glucose
2. The rate of blood flow depends on both blood pressure and the resistance to flow due to vessels in the body. What other force is able to affect the flow of blood in a body?
- A. Gravity
B. Tension
C. Air Pressure
D. Magnetism
3. In an energy pyramid, approximately how much energy is transferred to another organism when it is consumed?
- A. .01
B. .1
C. .001
D. 1/100
4. Which of the following best illustrates a chemical change?

5. A pot of water heating on a stove best demonstrates which of the following forms of heat transfer?
- I. Conduction
II. Convection
III. Radiation
- A. Only I
B. Only II
C. I & III
D. I & II
E. I, II, & III

6. Which of the following is not an immediate impact to a region that has been flooded?
- | | |
|---------------------|-------------------------------------|
| A. Crop destruction | C. Loss of life |
| B. Rip tides | D. Increase of water borne diseases |
7. According to NASA, which of the following is not a requirement for life to arise and thrive on a planet?
- | | |
|------------------|-------------|
| A. Energy source | C. Nitrogen |
| B. Liquid water | D. Carbon |
8. Which of these geological features in Texas was formed by erosion?
- Palo Duro Canyon
 - Guadalupe Mountains
 - Caprock
 - Western portions of the Edward's Plateau
9. The SEV (space exploration vehicle) has many surface and in-space components that enable space exploration. Which of the following best shows an in-space characteristic of the SEV?

- | | |
|---------------------------------|-------------------|
| A. International docking system | C. Both of these |
| B. Pivoting wheels | D. Neither A or B |
10. Which of the following is not true about groundwater?
- There is not a relationship between ground and surface water
 - Groundwater is a renewable resource
 - Groundwater is a significant source of water supply
 - Groundwater is trapped through wells or rocks beneath the surface of the Earth
11. A school project requires that students create a biome in a bottle. If the student uses rocks, dirt, and perennial grasses in their project, which biome would most likely be represented?
- | | |
|-----------|----------------|
| A. Desert | C. Rain forest |
| B. Taiga | D. Grassland |
12. According to the United Nations Environment Programme (UNEP), biodiversity measures variation at all of the following except:
- Within a species
 - Between a species
 - Atmospheric
 - Ecosystem

13. Students observe a garden as shown:

Using your knowledge of succession, order the following statements chronologically.

- I. Small seedlings emerge from soil.
- II. Some plants begin to flower.
- III. There is a lot of variety of plants.
- IV. Soil is loose and there is no plant growth.

- A. I, II, III, IV
- B. IV, I, III, II

- C. IV, II, III, I
- D. III, IV, I, II

14. Digestive systems of mammals are adapted to maximize the digestion and absorption of food. Which of the following is not a part of the digestive system?

- A. Intestine
- B. Gallbladder
- C. Larynx
- D. Stomach

15. Frogs hibernate to escape freezing temperatures during winter. Which is not a feature that aids in their survival during this time?

- A. Slow respiration rate
- B. Decreased heart rate
- C. Increased body temperature

16. This gland functions to regulate many body functions.

- A. Pituitary
- B. Thyroid
- C. Adrenal
- D. Reproductive

17. Which of the following does not show an example of selective breeding?

- A. Cattle that produce lots of meat
- B. Longevity
- C. Crops resistant to certain diseases
- D. Stature of a horse

18. Which of the following is a correct response for gravitropism?

- A. Negative upward growth
- B. Growth toward radiant energy
- C. Growth towards the point of contact
- D. Negative growth downward

19. Which of the following scientists did not help to summarize our modern cell theory?

- A. Schleiden
- B. Koch
- C. Schwann
- D. Virchow

20. The framework for a cell within the cytoplasm is most similar to which organ system?

- A. Respiratory
- B. Immune
- C. Circulatory
- D. Skeletal

21. Which condition arises when more water is lost by evaporation than is absorbed by the roots from the soil?

- A. Hunger
- B. Wilting
- C. Excretion
- D. Tropism

22. The picture refers to a ___ cell.

- A. Prokaryotic
- B. Eukaryotic
- C. Plasmid
- D. Basic

23. Which stage of meiosis is shown?

- A. Prophase I
- B. Prophase II
- C. Telophase I
- D. Telophase II

24. Which structure synthesizes proteins that are used by a cell?

- A. Chromatin
- B. Nucleons
- C. Ribosome
- D. Endoplasmic reticulum

25. For the given genotypes, $Rr \times Rr$, what is the percent of offspring that are recessive?

- A. 25%
- B. 50%
- C. 75%
- D. 0%

26. Many scientific discoveries begin with observations. Which of the following is a direct observation?

- A. Animals communicating by airborne chemicals
- B. Animals navigating using the Earth's magnetic field
- C. Organisms eating nectar from flowering plants
- D. Marine animals feeling vibration in the water

27. Which correctly shows where crossing over would occur?

- A. E & H
- B. B & C
- C. C & F
- D. A & B

28. An experiment requires the use of a triple beam balance or an electronic balance. Which quantity is being directly measured?

- A. Density
- B. Volume
- C. Mass
- D. Temperature

29. If you observe this symbol in a lab investigation, which of the following is the best remedy?

- A. Dispose of the waste as directed
- B. Notify teacher of contact with the material
- C. Wash your hands before and after the experiment
- D. Go to the first aid kit

30. Record the length of the paper clip shown to the nearest millimeter.

- A. 6 cm
- B. 10.6 cm
- C. 4.6 cm
- D. 16.6 cm

31. A graph is a pictorial representation of information recorded in a data table. Which type of graph shows information that is connected in a way, such as a rate?

- A. Line graph
- B. Bar graph
- C. Scatter plot
- D. Pie graph

32. What conclusion can be formed by analyzing the following data table?

Elevation	Number of Flowers	Number of Pollinators
6,500 m	2	1
3,250 m	6	7
1,150 m	20	11
750 m	18	37
150 m	31	39
25 m	30	35

- A. 3,250 meters is the best elevation for pollinators to survive and thrive
 - B. Pollinators thrive with less precipitation
 - C. Higher elevations have more rain, therefore flowers survive better
 - D. There is a correlation between number of flowers and number of pollinators
33. Scientific models represent objects, systems, or events and are used as a tool to understand the world around us. Which of the following is not an example of a scientific model?
- A. Model of Jupiter
 - B. Prototype of a robot
 - C. Data table
 - D. Dinosaur fossil replica

34. The graph represents a person walking their dog. What would be the independent variable in this situation?
- A. Time
 - B. Distance
 - C. Dog
 - D. Person

35. A scientist needs to measure the volume of water at -12°C . Which of following equipment would be best to obtain the volume?
- A. Ruler
 - B. Graduated cylinder
 - C. Beaker
 - D. Electronic balance

1. A graph is a pictorial representation of information recorded in a data table. Which type of graph shows quantitative comparisons between ordered pairs?
- A. Line graph
B. Bar graph
C. Scatter plot
D. Pie graph
2. What conclusion can be formed by analyzing the following data table?

Elevation	Number of Flowers	Number of Pollinators
6,500 m	2	1
3,250 m	6	7
1,150 m	20	11
750 m	18	37
150 m	31	39
25 m	30	35

- A. 3,250 meters is the best elevation for pollinators to survive and thrive
B. Pollinators thrive with less precipitation
C. Higher elevations have more rain, therefore flowers survive better
D. There is a correlation between number of flowers and number of pollinators
3. Scientific models represent objects, systems, or events and are used as a tool to understand the world around us. Which of the following is not an example of a scientific model?
- A. Model of Jupiter
B. Prototype of a robot
C. Dinosaur fossil replica
D. Data table

4. The graph represents a person walking their dog. What would be the independent variable in this situation?
- A. Time
B. Distance
C. Dog
D. Person

5. A scientist needs to measure the volume of water at -12°C . Which of the following equipment would be best to obtain the volume?
- A. Ruler
B. Graduated cylinder
C. Beaker
D. Electronic balance

6. How many electrons, protons, and neutrons are contained in the following atom?

- A. 55 e⁻; 55 p⁺; 77 n⁰
- B. 132 e⁻; 132 p⁺; 55 n⁰
- C. 187 e⁻; 187 p⁺; 55 n⁰
- D. 77 e⁻; 55 p⁺; 55 n⁰

7. Which best describes an atom of Neptunium?

- A. It can be divided into smaller particles that retain all of its properties
- B. It can not be divided into smaller particles that retain all of its properties
- C. It doesn't possess properties of larger quantities of neptunium
- D. Its atomic number is zero

8. Which of the following is not one of the four blocks of the periodic table?

- A. s
- B. p
- C. d
- D. h

9. Which of the following is the correct formula for ethanol?

- A. H₃O
- B. NH₃
- C. C₂H₆O
- D. NaCl

10. As a rocket launches into outer space, which law best explains how it is able to provide enough thrust to reach orbit?

- A. Law of inertia
- B. Law of force and acceleration
- C. Law of gravitation
- D. Law of action-reaction

11. If someone was traveling at 45 mph north, which quantity does this best refer to?

- A. Speed
- B. Direction
- C. Velocity
- D. Acceleration

12. If 50 grams of sodium reacts with chlorine to form 175 grams of salt, how many grams of chlorine is needed to complete this reaction?

- A. 50 g
- B. 125 g
- C. 175 g
- D. 225 g

13. What will occur to the truck shown?

- A. Balanced forces make the truck slow down
- B. Balanced forces make the truck speed up
- C. Unbalanced forces make the truck speed up
- D. Unbalanced forces make the truck slow down

14. Earth's oceans respond to the moon's gravitational pull by bulging and dipping as the moon rotates around the Earth. As the ocean bulges toward the moon a ___ tide is created.

- A. Low
- B. High
- C. Spring
- D. Constant

15. Complete the phrase:

At the new moon phase, _____.

- A. The moon is so close to the sun in the sky that none of the side facing the Earth is illuminated.
- B. The moon is behind the earth in space with respect to the sun.
- C. The half-lit moon is highest in the sky at sunset, and then sets about six hours later.

16. If the following orientation of the Sun, Moon, and Earth occurs, what events in most likely observed?

- A. Blue Moon
- B. Pink Moon
- C. Solar Eclipse
- D. Lunar Eclipse

17. Which individuals discovered cosmic microwave radiation?

- A. Lemaitre
- B. Hubble & Einstein
- C. Watson & Crick
- D. Penzias & Wilson

18. Geologists obtain indirect evidence about the interior of the Earth by:

- A. Measuring pressure differences at the surface
- B. Guesstimating the temperature of the core
- C. Looking at the layers of the Earth
- D. Recording and analyzing seismic waves

19. Which graphic best illustrates our Milky Way galaxy?

20. Given the following emission spectra from a distant star. Determine which element is mostly present.

A.

C.

B.

D.

21. Using the diagram provided, which region contains superhot, small, and not very luminous stars?

- A. Red giants
- B. Blue giants
- C. Main sequence
- D. White dwarfs

22. Hurricanes will continue to grow and strengthen, providing which of the following?

- A. It remains over a source of cold, moist air
- B. It remains over a source of cold, dry air
- C. It remains over a source of hot, moist air
- D. It remains over a source of hot, dry air

The Hertzsprung-Russell Diagram

ESO Press Photo 28e/07 (19 June 2007)

23. A collision between two pieces of continental crust at a converging boundary produces a:

- A. Mid ocean ridge
- B. Deep ocean trench
- C. Rift valley
- D. Mountain range

24. Local winds are influenced by which of the following?
- A. Coriolis effect
 - B. Latitude
 - C. Geography of area
 - D. Temperature difference
25. This is a two-dimensional model of the Earth's three-dimensional surface.
- A. Contour map
 - B. Physical map
 - C. Thematic map
 - D. Political map
26. Which of the following is not classified as a biotic factor in an environment?
- A. Bacteria
 - B. Water
 - C. Mushroom
 - D. Shrub
27. Most thermal energy in the atmosphere moves due to:
- A. Conduction
 - B. Convection
 - C. Radiation
28. Emily is heating a liquid in a test tube. According to proper lab safety procedures, what direction should the test tube correctly be positioned?
- A. In a direction pointing toward herself
 - B. In a direction pointing towards herself
 - C. In a direction pointing way from herself and others
 - D. In a direction pointing towards others
29. A bird's food supply is a species of beetle that lives in the grass. A severe drought occurs and causes much of the vegetation to die. Which trait of the beetle will allow them to survive the best?
- A. Size of the body
 - B. Size of the legs
 - C. Brown coloring
 - D. Green coloring
30. Which of the following is not a positive human impact made on the oceans?
- A. Some laws and policies
 - B. Coastal cleanups
 - C. Artificial reefs
 - D. Overfishing
31. How are the isotopes of Oxygen – 16 and Oxygen – 18 different?
- A. Number of protons
 - B. Number electrons
 - C. Number of neutrons
 - D. Atomic number
32. A group of students measures the displacement of a moving toy car. Which of the following tools is needed to collect this data?
- A. Balance
 - B. Graduated Cylinder
 - C. Meter Stick
 - D. Spring Scale

33. The diagram below shows three horizontal forces acting on an object. Neglecting all sources of friction, what is the magnitude of the force, F , if the object begin to slow?

- A. 20 N B. 7 N C. 12 N D. 17 N
34. A student conducts an experiment to measure the acceleration of falling bodies, which is 9.8 m/s^2 . The student collects an experimental value of 11.3 m/s^2 . The most likely reason for the discrepancy is due to:
- A. Air friction
 - B. Human error
 - C. Mass of the object
 - D. Potential energy of the object
35. Which of the following is not a way for humans to reduce their dependence on natural resources?
- A. Turn off flowing water while brushing your teeth
 - B. Recycle plastic products
 - C. Turn off lights when not in use
 - D. Set air conditioner a few degrees lower during the summer

1. Carbon dioxide needed for photosynthesis enters the leaf via the ____
A. Xylem
B. Stomata
C. Phloem
D. Chloroplast
2. This action doesn't involve a change in the chemical makeup of a substance. Which of the following does not belong with this description?
A. Painting
B. Cutting
C. Dissolving
D. Cooking
3. A hot air balloon rising has which of the following energy transfers?
A. Thermal to mechanical
B. Mechanical to thermal
C. Radiant to mechanical
D. Mechanical to radiant
4. What is the correct order of the following organisms in a food chain?

- A. Algae, lobster, mussel, seal
 - B. Lobster, algae, mussel, seal
 - C. Algae, mussel, lobster, seal
 - D. Mussel, algae, lobster, seal
5. If a plant has low turgor pressure, the plant appears to:
A. Wilt
B. Change colors
C. Stand upright
D. Remain unchanged
 6. When it rains, the liquid water flows into the watershed. Along the way, runoff picks up loose liquids and other materials such as:
A. Lawn chemicals
B. Cleaning products
C. Gasoline
D. All of these
 7. Today's atmosphere of Earth is primarily composed of:
A. Oxygen
B. Nitrogen
C. Carbon dioxide
D. Argon

8. Which is not an impact to an ecosystem following tornadic activity?
- A. Destruction of structures and plants
 - B. Storm surge
 - C. Water contamination
 - D. Disruption of food chain
9. Soil is formed over time by which of the following processes?
- A. Erosion & weathering of rocks
 - B. Erosion & decomposition of plants
 - C. Weathering of rocks & decomposition of biotic material
 - D. Weathering & erosion biotic material
10. Which biomes of Texas once contained large herds of grazing herbivores?
- A. Temperate forest
 - B. Tundra
 - C. Grassland
 - D. Savanna
11. The human exploration of space began in the:
- A. 1950's
 - B. 1960's
 - C. 1970's
 - D. 1980's
12. In which geographic location would you expect to find the greatest species diversity?
- A. Russia
 - B. Egypt
 - C. Panama
 - D. United States
13. Ants communicate with one another using pheromones. Ants lay down pheromones to help others find a food source. This is an example of:
- A. Structural adaptation
 - B. Behavioral adaptation
 - C. Physical adaptation
 - D. Physiological adaptation
14. This type of succession involves changing an area from one lacking life form to one that contains numerous organisms. This best describes which of the following?
- A. Primary succession
 - B. Secondary succession
 - C. Tertiary succession
 - D. Zeroth succession

15. Using the dichotomous key, correctly identify the branch of leaves shown.

	
1a. Leaves are spiny.....	<i>Pinus taeda</i>
1b. Leaves are broad.....	Go to 2
2a. Single leaf.....	Go to 3
2b. Many leaflets.....	Go to 4
3a. Leaf edge is smooth.....	<i>Cornus florida</i>
3b. Leaf edge is serrated.....	<i>Ulmus americana</i>
4a. Leaflet edges are smooth.....	<i>Albizia julibrissin</i>
4b. Leaflet edges are serrated.....	<i>Juglans nigra</i>

- A. *Pinus taeda*
- B. *Cornus florida*

- C. *Ulmus americana*
- D. *Juglans nigra*

16. What is described below?

Over time, traits are passed on to more offspring. As favorable traits become more common in the population, species adapt to environment.

- A. Selection
- B. Adaptations

- C. Variation
- D. Inheritance

17. Xylem and phloem are structures that transport materials within a plant. The structures that enable the cells to function are:

- A. Short and hollow
- B. Short and compact

- C. Long and hollow
- D. Long and compact

18. Given the graphic below, what level of organization is best represented?

- A. Nucleus
- B. Cell
- C. Tissue
- D. Organ

19. This body system's main function is to provide protection. It is comprised of skin, hair, and nails. Which best describes this system?

- A. Immune
- B. Endocrine
- C. Nervous
- D. Integumentary

20. Organisms respond to external stimuli to maintain homeostasis. Shown is a lizard basking in the sun. The lizard responds to the stimuli by

- A. Dehydration
- B. Hibernating
- C. Aestivating
- D. Camouflage

21. As technology has developed and scientists learn more about the structure and functions of the cell, the cell theory has been modified. Which of the following is not a part of the modern cell theory?

- A. Cells contain heredity information
- B. Most organisms are made of cells
- C. All cells are the same chemical composition
- D. Cells arise from other cells via cell reproduction

22. The mitochondria is most similar to which organ system?

- A. Circulatory
- B. Nervous
- C. Excretory
- D. Digestive

23. In animal cells, there are several small structures as shown. They store nutrients, water, and waste from the cell. This best describes which of the following organelles?

- A. Vacuole
- B. Mitochondria
- C. Endoplasmic reticulum
- D. Nucleons

24. What determines the biological sex of a human?
- A. Presence of a X or Y chromosome
 - B. Presence of the 21st chromosome
 - C. Codominance
 - D. Presence of the 47th chromosome
25. Elephants migrate during the dry season as a herd. This response is due to:
- A. Organism
 - B. Species
 - C. Community
 - D. Population
26. Mutations occur in organisms. Which of the following is a harmful mutation?
- A. Sickle cell anemia
 - B. Increase bone density in humans
 - C. Nylonase in bacteria
 - D. Murray Gray cattle in Australia
27. If data from repeated experiments is shown to support a hypothesis, which most likely will occur next?
- A. Data would become a law
 - B. A conclusion would be defined
 - C. A hypothesis is rejected
 - D. A hypothesis will be revised
28. What part of meiosis is most similar to mitosis?
- A. Reduction division
 - B. Interkinesis
 - C. Meiosis I
 - D. Meiosis II
29. Which of the following shows a system for identifying hazards associated with various materials?
- A. Biohazard symbols
 - B. Hazard to environment symbols
 - C. NFPA label
 - D. SDS label
30. This is commonly used to put out small fires. It comes in four different categories. This description best refers to which of the following safety equipment?
- A. Fire blanket
 - B. Fire extinguisher
 - C. Eye wash
 - D. Safety shower

31. In a student led experiment, 4 insects were placed at each end of a divided container based on specific temperature ranges. After 10 minutes, all of the insects were congregated in the center compartment. The students concluded that the organisms had moved as far as they could during the time period. Which other explanation is best supported?
- A. Insects need to be with other insects for warmth
 - B. Insects moved to the preferred temperature range
 - C. Insects randomly move until they locate other insects
 - D. Insects moved until they ran out of energy and remained stationary
32. A student hypothesized that an aquatic plant will grow the most if they are exposed to light that has a wavelength of 475 nm. To test this hypothesis, the student should design an experiment with which independent variable?
- A. Color of the aquatic plant
 - B. Rate of growth of the aquatic plant
 - C. Wavelength of light that the aquatic plant is exposed to
 - D. Time of exposure to light
33. What does this safety symbol indicate?
- A. This symbol indicates that a material is radioactive
 - B. This symbol indicates an oxidizing substance
 - C. This symbol indicates that this material is toxic
 - D. This symbol indicates a biohazard

34. According to the data presented above, a 150-year-old community would contain pine trees with a density of approximately:
- A. 2,750 trees per unit area
 - B. 4,250 trees per unit area
 - C. 5,000 trees per unit area
 - D. 17,500 trees per unit area
35. Of the following, which scientific instrument is commonly used to observe the external features of a fly's abdomen?
- A. Dissecting Microscope
 - B. Electron Microscope
 - C. Centrifuge
 - D. Scanning tunneling microscope

1. Which of the following shows a system for identifying hazards associated with various materials?
 - A. Biohazard symbols
 - B. Hazard to environment symbols
 - C. NFPA label
 - D. SDS label

2. This is commonly used to put out small fires. It comes in four different categories. This description best refers to which of the following safety equipment?
 - A. Fire blanket
 - B. Fire extinguisher
 - C. Eye wash
 - D. Safety shower

3. In a student led experiment, 4 insects were placed at each end of a divided container based on specific temperature ranges. After 10 minutes, all of the insects were congregated in the center compartment. The students concluded that the organisms had moved as far as they could during the time period. Which other explanation is best supported?
 - A. Insects need to be with other insects for warmth
 - B. Insects moved to the preferred temperature range
 - C. Insects randomly move until they locate other insects
 - D. Insects moved until they ran out of energy and remained stationary

4. A student hypothesized that an aquatic plant will grow the most if it is exposed to light that has a wavelength of 475 nm. To test this hypothesis, the student should design an experiment with which independent variable?
 - A. Color of the aquatic plant
 - B. Rate of growth of the aquatic plant
 - C. Wavelength of light that the aquatic plant is exposed to
 - D. Time of exposure to light

5. What does this safety symbol indicate?
 - A. This symbol indicates that a material is radioactive
 - B. This symbol indicates an oxidizing substance
 - C. This symbol indicates that this material is toxic
 - D. This symbol indicates a biohazard

6. Elements in the same group of the periodic table have the same number of ____.
- Protons
 - Nucleons
 - Valence electrons
 - Neutrons

7. According to the data presented above, a 150-year-old community would contain pine trees with a density of approximately:
- 2,750 trees per unit area
 - 4,250 trees per unit area
 - 5,000 trees per unit area
 - 17,500 trees per unit area

8. How many protons does the following element contain?

- 7
- 14
- 21
- 0

9. Which particle in an atom determines the identity of each particular atom?
- | | |
|--------------|-------------|
| A. Electrons | C. Neutrons |
| B. Protons | D. Nucleons |

10. Given the following reaction, determine if it is balanced or unbalanced.

A. Balanced

B. Unbalanced

11. Given the molecule shown, which of the following could represent its chemical formula?

A. C&H

B. CH

C. C₂H₄

D. CH₄

12. When forces act upon an object it is dependent upon which of the following factors?

A. Magnitude of the force

B. Distance of the force

C. Magnitude & direction of the force

D. Distance & application of the force

13. Because of Earth's tilt on its axis, the amount of daylight varies throughout the year. The least amount of variation occurs at which of the following?

A. Tropic of Cancer

C. Arctic Circle

B. Tropic of Capricorn

D. Equator

14. Jackson walked 320 meters in 92.5 seconds. Using this information, which best describes which of the following quantities could be determined?

A. Acceleration

C. Speed

B. Friction

D. Velocity

15. Which of these is not an example of Newton's Third Law of Motion?

A. Person in an automobile that is braking

B. Rowing a boat

C. Rocket propulsion

D. Swimming forward in a pool

16. The moon appears to be more than half illuminated from Earth as seen by an observer. This is best described by which phase of the lunar cycle?

A. Last quarter moon

C. Waxing crescent

B. Waning crescent

D. Waxing gibbous

17. Which two scientists created a graph showing the relationship between a star's surface temperature and brightness.

A. Russell & Hertzsprung

C. Watson & Crick

B. Hubble & Dingle

D. Aller & Alcock

18. In addition to the moon, tides on Earth are caused by which of the following?
- A. Revolution of Earth
 - B. Tilt of Earth
 - C. Rotation of Earth
19. Galaxies come in a variety of shapes and sizes. Our Milky Way galaxy is referred to as this type of galaxy.
- A. Irregular
 - B. Elliptical
 - C. Planetary
 - D. Spiral
20. What is Laurasia?
- A. A Polish scientist
 - B. Another term for continental drift
 - C. Name of the northern continent that existed millions of year ago
 - D. Another name for an ancient dinosaur that existed millions of years ago
21. Telescopes are used to gain information about our solar system and the universe. Which wave cannot be captured and reflected using mirrors?
- A. Visible
 - B. Gamma
 - C. Reflecting telescope
 - D. Refracting telescope
22. When continental plates pull apart at a divergent boundary on land, a(n) _____ forms.
- A. Mountain range
 - B. Rift valley
 - C. Ocean
 - D. Continent
23. This theory about the origin of the universe postulates that matter is created throughout the universe. This violates the law of conservation of matter and also energy. Which theory does this describe?
- A. Big Bang Theory
 - B. Open Universe Theory
 - C. Creationism
 - D. Steady State Theory
24. After the energy from the sun has reached the Earth, thermal energy always moves from _____ to _____ areas naturally.
- A. Cold; hot
 - B. Warm; hot
 - C. Cold; cool
 - D. Hot; cold
25. Complete the following rule for topographic maps. Contour lines never cross. All points along a contour line represent a _____.
- A. Single elevation
 - B. Closed circles
 - C. Depression
 - D. Sloping characteristic

26. This is the union of two fronts, shown below, as the cold front overtakes the warm front.

- A. Mix
- B. Squall
- C. Occluded
- D. Cold/warm

27. What resources are the penguins in the image competing for?

- A. Biotic
- B. Abiotic
- C. Biotic & abiotic
- D. They are not competing for any resources

28. Most hurricanes form at which of the following latitudes:

- A. Polar
- B. Equator
- C. Mid

29. Environmental changes can affect organisms and traits in the subsequent populations. Which of the following statements is true?

- A. Organisms can't change on their own to survive
- B. Organisms can change on their own to survive
- C. Organisms that have advantageous adaptations will die off
- D. Organisms with disadvantageous adaptations will survive

30. Which of the following has a positive impact on the ocean systems?

- A. Oil spill
- B. Artificial reefs
- C. Sewage and runoff
- D. Overfishing

31. If the mass number of an element is 14 and the atomic number is 7, how many nucleons does the following element contain?

- A. 7
- B. 14
- C. 21
- D. 0

32. Susan ran south 400 meters in 92.5 seconds. Using this information, which of the following quantities could be determined?

- A. Acceleration
- B. Friction
- C. Speed
- D. Velocity

33. You are doing a lab with another student when her hair gets caught on the balance scale. She should have -

- A. Gotten a haircut before class today
- B. Skipped the lab
- C. Pulled her hair up in a ponytail or bun
- D. Worn a hat today

34. Where should a student properly discard liquid chemical waste, such as an acid or base?
- A. The sink
 - B. Trash can
 - C. Cardboard box
 - D. Container identified by teacher
35. Flammable materials should never be dispensed or used near:
- A. Water
 - B. An operating Bunsen burner
 - C. A flashlight
 - D. A broken glass container

University Interscholastic League

Science I

**DO NOT OPEN TEST
UNTIL TOLD TO DO SO**

**UNIVERSITY INTERSCHOLASTIC LEAGUE
2018-2019 A+ SCIENCE I
SPRING DISTRICT TEST**

1. Using the dichotomous key correctly identify the branch of leaves shown.

		
1a. Leaves are spiny..... <i>Pinus taeda</i>		
1b. Leaves are broad.....Go to 2		
2a. Single leaf.....Go to 3		
2b. Many leaflets.....Go to 4		
3a. Leaf edge is smooth..... <i>Cornus florida</i>		
3b. Leaf edge is serrated..... <i>Ulmus americana</i>		
4a. Leaflet edges are smooth..... <i>Albizia julibrissin</i>		
4b. Leaflet edges are serrated..... <i>Juglans nigra</i>		

- | | |
|-------------------------------|---------------------------|
| A. <i>Albizia julibrissin</i> | C. <i>Ulmus americana</i> |
| B. <i>Cornus florida</i> | D. <i>Juglans nigra</i> |

2. Photosynthesis uses the energy from the sun to covert water and ___ into high energy ___ and oxygen. Correctly complete the missing words.

- | | |
|---------------------------|--------------------------|
| A. Carbon dioxide; starch | C. Carbon dioxide; sugar |
| B. Starch; carbon dioxide | D. Sugar; carbon dioxide |

3. When you eat a bag of chips you are consuming which of the following types of energy?

- | | |
|-----------------------|---------------|
| A. Chemical potential | C. Thermal |
| B. Radiant | D. Mechanical |

4. Which of the following is a physical change?

- | | |
|---------------------|---------------------------|
| A. Toasting bread | C. Roasting a marshmallow |
| B. Lighting a match | D. Burning a candle |

5. Organisms with tropisms will naturally turn in response to a given stimulus. In a negative tropism, the organism will move:

- | | |
|---------------------------|--|
| A. Toward the stimulus | C. Does not move in relation to the stimulus |
| B. Away from the stimulus | |

6. Sequence the trophic levels to show the flow of energy in this following energy pyramid.

- A. Sun, A, B, C
- B. A, B, C, Sun
- C. Sun, C, B, A
- D. C, B, A, Sun

7. In some regions, extreme flooding is expected to increase. This could have serious effects on important natural habitats such as:

- A. Icebergs
- B. Rivers
- C. Deserts
- D. Mountains

8. Which of the following planets is not considered to lie in the habitable zone?

- A. Earth
- B. Venus
- C. Mars
- D. Uranus

9. What supplies sixty percent of all water used in the state of Texas, according to the Texas Water Development board?

- A. Reservoirs
- B. Aquifers
- C. Rivers
- D. Oceans

10. Which of the following is a natural agent of weathering and erosion?

- A. Constant temperature
- B. Fire
- C. Air pollution
- D. Water

11. The amount of oxygen in a fish tank is a ___ that can affect the number of organisms living in the tank.

- A. Tolerance zone
- B. Biotic factor
- C. Limiting factor
- D. Environmental factor

12. What was the first manned satellite to orbit Earth?

- A. Sputnik
- B. Vostok
- C. Explorer I
- D. Mercury

13. An area of a forest that experiences very little change in its composition of species would most likely show which of the following:

- A. Climax community
- B. Primary succession
- C. Secondary succession
- D. Primary community

14. Many diversity indices have been developed to measure biodiversity. This model combines species richness and species evenness.

- A. Shannon index
- B. Renyi index
- C. Einstein's index
- D. Simpson's index

15. When cold weather drives insects away, bats can do which of the following to help them survive?

- A. Hibernate
- B. Migrate
- C. Both of these

16. Another adaptation that allows fishes to live in an aquatic environment is their gills. Gills are made up of very thin tissues because...

- A. It enables O_2/CO_2 exchange
- B. It enables O_2/CO exchange
- C. It enables N_2/O_2 exchange
- D. It enables H_2/O_2 exchange

17. In order to acquire different food sources, a finch's beak is varied in shape. A large billed beak bird would feed more efficiently on which of the following food sources?

- A. Small, hard seeds
- B. Large, hard seeds
- C. Small, soft seeds
- D. Large, soft seeds

18. Which of these is not considered an organ in a plant?

- A. Leaf
- B. Root
- C. Xylem
- D. Flower

19. This cell structure controls the movement of substances in and out of the cell.

- A. Cell wall
- B. Cell membrane
- C. Endoplasmic reticulum
- D. Nucleus

20. The discovery of cells and the development of the cell theory would not have been possible without the invention of a:

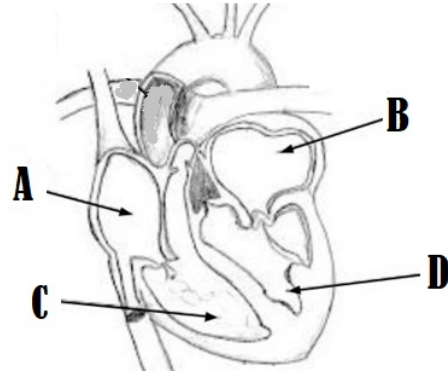

- A. Magnifying glass
- B. Telescope
- C. Microscope
- D. Spectroscope

21. The endoplasmic reticulum transports materials from one part of the cell to another. This is most similar to which body system?

- A. Nervous
- B. Skeletal
- C. Digestive
- D. Circulatory

22. What part of the heart does the oxygen rich blood enter?

- A. A
- B. B
- C. C
- D. D

23. An organism that carries two dominant or two recessive alleles for any given trait is said to be:

- A. Heterozygous
- B. Hybrid
- C. Pure
- D. Hidden

24. Fight or flight is an automatic response. Most of the time this response is triggered which of the following occurs?

- A. A false alarm
- B. An adaptive response
- C. A freeze response
- D. A survival alarm

25. If a black dog (Bb) were crossed with a white dog (bb). What is the resulting phenotypic ratio?

- A. 0:1 black to white
- B. 1:0 black to white
- C. 1:1 black to white
- D. 3:1 back to white

26. This helps the body protect itself against pathogens.

- A. Vomiting
- B. Fever
- C. Dehydration
- D. Hunger

27. For an organisms with six pairs of chromosomes, how many possible combinations of gametes can be produced by random lining up?

- A. 32
- B. 48
- C. 64
- D. 120

28. Which of the following shows an SI unit of measurement?

- A. 10 ft.
- B. 10 oz.
- C. 10 L
- D. 10 in.

29. What type of property is best represented in the picture above?
- A. Chemical
B. Physical
C. Conversation
D. Elemental
30. One one-hundredth is expressed using the prefix:
- A. Centi-
B. Milli-
C. Deci-
D. Micro-
31. In the scientific method after a conclusion is drawn, which of the following would not be done?
- A. Determine if the hypothesis is supported
B. Determine if the hypothesis is not supported
C. Test the hypothesis
D. Modify the hypothesis as needed
32. How many liters are comprised of 2500 mL?
- A. .25 L
B. 2.5 L
C. 25 L
D. 250 L
33. A scientist needs to measure the volume of water at 22°C. Which of the following equipment would be best to obtain the volume?
- A. Ruler
B. Graduated cylinder
C. Beaker
D. Electronic balance
34. A graph is a pictorial representation of information recorded in a data table. Which type of graph shows a statistical graphic which is divided into slices to illustrate numerical proportions?
- A. Line graph
B. Bar graph
C. Scatter plot
D. Pie graph
35. The graph shows a person walking their dog. What would be the dependent variable in this situation?

- A. Time
B. Distance
C. Dog
D. Person

UNTIL TOLD TO DO SO**

**UNIVERSITY INTERSCHOLASTIC LEAGUE
2018-2019 A+ SCIENCE II
SPRING DISTRICT TEST**

1. One one-hundredth is expressed using the prefix:

A. Centi-	C. Deci-
B. Milli-	D. Micro-

2. In the scientific method after a conclusion is drawn, which of the following would not be done?
 - A. Determine if the hypothesis is supported
 - B. Determine if the hypothesis is not supported
 - C. Test the hypothesis
 - D. Modify the hypothesis as needed

3. How many liters are comprised of 2500 mL?

A. .25 L	C. 25 L
B. 2.5 L	D. 250 L

4. A scientist needs to measure the volume of water at 22°C. Which of following equipment would be best to obtain the volume?

A. Ruler	C. Beaker
B. Graduated cylinder	D. Electronic balance

5. A graph is a pictorial representation of information recorded in a data table. Which type of graph shows a statistical graphic which is divided into slices to illustrate numerical proportions?

A. Line graph	C. Scatter plot
B. Bar graph	D. Pie graph

6. How many outermost electrons does lithium and sodium have?

A. 1	C. 3
B. 2	D. 4

7. The graph shows a person walking their dog. What would be the dependent variable in this situation?

A. Time	
B. Distance	
C. Dog	
D. Person	

8. Which scientist's atomic model is represented?

A. Democritus	
B. Dalton	
C. Rutherford	
D. Thompson	

9. Two elements with the same number of protons but different number of neutrons is referred to as a(n)
- A. Molecule
 - B. Isotope
 - C. Atom
 - D. Ion

10. In a chemical formula, a subscript is used when
- A. More than one mole is reacting
 - B. Less than one mole is reacting
 - C. More than one atom is represented
 - D. Less than one atom is represented

11. Select the following correct reaction based on your knowledge of the law of conservation of mass.
- A. $N_2 + H_2 \rightarrow NH_3$
 - B. $Fe + Cl_2 \rightarrow FeCl_3$
 - C. $2Fe_2O_3 + 3C \rightarrow 4Fe + 3CO_2$
 - D. $CH_4 + 2O_2 \rightarrow CO_2 + 3H_2O$

12. Using a graph of a train moving in a straight line, which of the segments show a balanced force?

- A. A & C
- B. B & D
- C. C & E
- D. A, C, & E

13. Which of the following is a common misconception many people have about Earth's seasons?
- A. Seasons are caused by the tilt of the Earth's axis
 - B. Seasons are caused by the sun's gravitational force
 - C. Seasons are caused by the distance from the Earth to the Sun
 - D. Seasons are caused by the rotation of Earth on its axis

14. Which of the following is not used in calculating acceleration of an object?
- A. Initial velocity
 - B. Average speed
 - C. Time
 - D. Final velocity

15. Even in a low speed head on test crash, ___ causes an unrestrained crash dummy to slam into the front windshield or seat directly in front of it. Correctly complete the missing word.
- A. Inertia
 - B. Air resistance
 - C. Gravity
 - D. Friction

16. This is a cloud of gas and dust in outer space. It is a region where new stars are formed, while some are remnants of a dead or dying stars. This description best refers to which of the following terms?
- A. Nebula
 - B. Galaxy
 - C. Black hole
 - D. Black dwarf
17. We see the moon in the night sky because ...
- A. The moon is luminous
 - B. The moon reflects light
 - C. The moon absorbs light
18. Our sun is located in the Orion Arm of the Milky Way galaxy. The approximate distance from the center of the galaxy to our Sun is:
- A. 1,000 light years
 - B. 2,600 light years
 - C. 100,000 light years
 - D. 260,000 light years
19. The relationship between the phases of the moon and the tides on Earth were discovered by which of the following individuals?
- A. Zheng He, a Chinese explorer
 - B. Zhu Xi, a Chinese philosopher
 - C. Aristotle, a Greek philosopher
 - D. Pytheas, a Greek explorer
20. When using this type of telescope, astronomers do not have to worry about the amount of sunlight, clouds, or rain that might affect their observations.
- A. Reflecting
 - B. Refracting
 - C. Radio
 - D. Optical
21. Which of the following tectonic plate collision will form a mountain, providing it is a convergent?
- A. Continental to oceanic
 - B. Continental to continental
 - C. Oceanic to oceanic
22. The big bang theory originated in 1927 with several scientists having contributed to it over the years. Which scientist discovered cosmic microwave radiation?
- A. Lemaitre
 - B. Einstein & Hubble
 - C. Aristotle
 - D. Penzias & Wilson
23. The plate tectonic theory as we know it today, was formed from components of all of the following scientist research except:
- A. Wegner
 - B. Hess
 - C. Lacks
 - D. Holmes

24. Which of the following best shows a depression as illustrated on a topographic map?

25. The movement of wind is affected by the rotation of earth. What causes the winds to change directions?

- A. Conduction
- B. Pressure differences
- C. Uneven heating
- D. Coriolis effect

26. Competition of organisms for biotic and abiotic factors in an environment can do which of the following?

- A. Increase the population
- B. Increase the resources
- C. Prevent population growth

27. The beginning of a hurricane starts with an area of ___ in a(n) ___ ocean. Correctly complete the blanks.

- A. High pressure; tropical
- B. Low pressure; tropical
- C. High pressure; arctic
- D. Low pressure; arctic

28. Which of these is not a physical adaptation of an organism to its environment?

- A. Migration
- B. Beak shape
- C. Teeth
- D. Camouflage

29. Looking at the diagram, which front is shown?

- A. Cold
- B. Warm
- C. Stationary
- D. Occluded

30. About seven billion tons of litter is dumped into the oceans each year. Of that litter, sixty percent of it is made of which of the materials listed?

- A. Metal
- B. Sewage
- C. Oil
- D. Plastic

31. Dmitri Mendeleev is given credit for developing the modern periodic table due to which of the following?
- A. He arranged known elements by their atomic number
 - B. He arranged elements into distinctive groups and periods
 - C. He arranged elements based on repeating properties
 - D. He arranged known elements and also left blank spaces for elements yet to be discovered based on their properties
32. Which will experience more weathering?
- A. A rock in the Sonora Desert
 - B. A rock in a decorative pond in someone's yard
 - C. A rock on the beach in South Carolina
 - D. A rock preserved in a museum
33. Each of these is an example of how research has changed scientific understanding except:
- A. Classification of living things now includes six kingdoms instead of five.
 - B. The metric system is now used around the world instead of other less precise systems.
 - C. Protons and electrons are now known to be made of smaller particles of matter.
 - D. Heat, which was once thought to be fluid, now is known as a form of energy.
34. When did Newton first propose his Laws of Motion?
- A. During World War II
 - B. After the American Civil War
 - C. Approximately 300 years ago
 - D. After humans orbited the Earth
35. Which of the following does not contain 4 atoms?
- A. H_2O_2
 - B. AlCl_3
 - C. H_2O
 - D. 2O_2

University Interscholastic League

Social Studies

grades 7 & 8

**DO NOT OPEN TEST
UNTIL TOLD TO DO SO**

**UNIVERSITY INTERSCHOLASTIC LEAGUE
2018-19 A+ SOCIAL STUDIES
INVITATIONAL TEST — GRADES 7 & 8**

1. What principle of government is illustrated in the following chart?

Texas Government		
Legislative Makes laws	Executive Enforces laws	Judicial Interprets the laws

- a. Limited government
- b. Separation of powers
- c. Republicanism
- d. Federalism

“Humbly invoking the blessings of Almighty God, the people of the State of Texas, do ordain and establish this Constitution...” Texas Constitution of 1876

2. How does the Preamble to the Texas Constitution reflect the principle of popular sovereignty?
- a. Churches are the sole source of power for the government
 - b. Governor has supreme power over the government
 - c. The state government is to be held superior to the federal government
 - d. The people of the State of Texas are clearly the source of power for the government
3. Which branch of the government contains the Senate and House of Representatives?
- a. Judicial
 - b. Executive
 - c. Legislative
 - d. Religious
4. Who performs the following duties?

Presents a budget to the Legislature
Appoints members to some boards and commissions
Helps set policies for colleges and universities

- a. Governor
 - b. Attorney General
 - c. Comptroller of Public Accounts
 - d. Agricultural Commissioner
5. How does the State of Texas pay for the services it offers?
- a. Stocks and bonds
 - b. Donations
 - c. Mutual funds
 - d. Taxes and fees

6. What is the largest expense in the Texas budget?
- a. Education
 - b. Regulatory services
 - c. Judicial system
 - d. General provisions
7. Which President of the Republic of Texas faced the following difficulties?

Mexican government refused to recognize Texas's independence
Financial problems
Native Americans resented the growing number of settlers invading their territory

- a. Edward Burluson
 - b. Sam Houston
 - c. Peter Grayson
 - d. John Allen
8. _____ was a Native American leader who refused an order by President Lamar to lead the Cherokees out of Texas.
- a. Quanah Parker
 - b. Satanta
 - c. Chief Bowles
 - d. Sitting Bull
9. Which Texas city protested the sale of the state's Navy?
- a. Galveston
 - b. Brownsville
 - b. Houston
 - d. Nacogdoches
10. How did Jose Antonio Navarro help shape the early history of Texas?
- a. Commanded the Texas Navy
 - b. Only Texas-born delegate to the Constitutional Convention in 1845
 - c. Built a new town near Harrisburg, named Houston
 - d. Served as Secretary of State under Sam Houston
11. Where did President Lamar send General Hugh McLeod and a force of 270 men in an attempt to gain control over their lucrative trail and further develop the trade links between Texas and New Mexico?
- a. Tucson
 - b. Bent's Fort
 - c. Santa Fe
 - d. San Miguel
12. Who was the candidate for President of the United States in 1844 that supported the annexation of Texas?
- a. Martin Van Buren
 - b. William Henry Harrison
 - c. Henry Clay
 - d. James K. Polk

13. The United States Congress approved a joint resolution on February 26, 1845, agreeing to accept Texas as the twenty-eighth state. What is a joint resolution?
- The transfer of land from one country to another
 - Limited the possible uses for each piece of property in a city
 - A formal ruling passed by both houses of the legislature and intended to become law
 - Rule by an army instead of the usual civil authorities
14. How do Texans decide who will lead our towns, state and country?
- Serving on juries
 - Getting out and voting
 - Obeying rules and laws
 - Paying taxes
15. Organizations that work together to influence lawmakers are called _____.
- Commissions
 - Trustee
 - Delegates
 - Special interest groups

16. Who is the elected official pictured to the right?
- Dan Patrick
 - Kevin Yeary
 - Bert Richardson
 - Scott Walker

17. The Preamble to the Constitution of the Republic of Texas is similar to the Preamble to the Constitution of what country?
- Mexico
 - Spain
 - United States
 - France

18. Which position in the new government of the Republic of Texas required the following qualifications?

Attained the age of 25 years
 Citizen of the Republic
 Shall have resided in the county or district 6 months preceding the election

- Senate
 - House of Representatives
 - Supreme Court Justice
 - President
19. How long was the term of a member of the Senate in the Republic of Texas?
- 3 years
 - 2 years
 - 1 year
 - 4 years
