

# LEFT BRAIN

These are **goal-oriented** and **well-organized** critical thinkers, who are rarely absent minded. These are the **scientists** and the **mathematicians** - the **logical rationalists**.

```

AARON BOGGS

**"I was left-brained because** I was the type of guy who looked both ways before crossing the street. I took my time with homework and created a shopping list when I went grocery shopping. Particularly, I enjoyed physics and learned various concepts in my IB Astronomy class."

ANTONY YUN

**"I was left-brained because** I thought of everything logically and concretely rather than creatively or abstractly. I tended to be more attracted to classes that were mathematical in nature. For instance, if I was faced with a problem or decision to make, I would try to find the correct or most reasonable, absolute solution instead of finding 'out-of-the-box' ideas."

SUE ANNE DAVIS

**"I was left-brained because** I got quite bored with fictional pieces, video or written. However, I could get invested in a documentary on the social tensions of Christians in Africa or a book on human cognition from the perspective of a neuroscientist. I also thought another conspicuous symptom of my being left-brained was odd social interaction, which I found much funnier than most people."

**AFTER TAKING THE MYERS-BRIGGS PERSONALITY TEST,** these participants fell under these 8 personality types (out of all 16).

BRENDAN HOLLIDAY

**ENTP**  
"the debater"

Smart and curious thinkers, ENTPs cannot resist an intellectual challenge.

LAUREN FOSTER

**INTJ**  
"the architect"

INTJs are imaginative and strategic thinkers who have a plan for everything.

KOBIE FRANK

**ESTP**  
"the entrepreneur"

Smart, energetic and very perceptive people, ESTPs truly enjoy living on the edge.

JULIAN MAGSINO

**ENFJ**  
"the protagonist"

ENFJs are charismatic and inspiring leaders who are able to mesmerize their listeners.

SARA DROCA

**ENFP**  
"the campaigner"

Enthusiastic, creative and sociable, ENFPs are free spirits who can always find a reason to smile.

JENNIFER WANG

**ISTJ**  
"the logistician"

ISTJs are practical and fact-minded individuals, whose reliability cannot be doubted.

EVAN IGLEHART

**INFP**  
"the mediator"

Poetic, kind and altruistic, INFPs are always eager to help a good cause.

ANNA TSELIK

**INFJ**  
"the advocate"

INFJs are quiet and mystical, yet very inspiring and tireless idealists.

# Right BRAIN

These are *slightly disorganized* and *impulsive free spirits*, who are *sensual* and *emotional*. These are the *artists* and the *musicians*, the *intuitive philosophers*.

KRISTINE WONG

**"I was right-brained because** being impulsive and clumsy were traits that I was known for. When I went to concerts, I never really thought through the things I did and ended up in mosh pits with my friends. I also enjoyed drawing a lot and believed it was a good way to get my mind turning."

JAKE CATARINEAU

**"I was right-brained because** I enjoyed photography and felt a sense of peace when taking photos. Being friendly was something that was a part of me and talking with others came easily. However, I only shared my feelings or emotions with those that I felt comfortable or close with."

ANTHONY PRINCE

**"I was right-brained because** I could compose my own music and act on stage. From a young age, I had the passion for music and began making beats in middle school. But organizationally, I was not neat and did not turn stuff in on time. Often times, I over-read reading passages and over-thought concepts."

## THE MYERS-BRIGGS TYPE INDICATOR

**WHAT IS THIS?** The Myers-Briggs type indicator is a personality test that authors Katharine Cook Briggs and Isabel Briggs Myers created based on psychiatrist Dr. Carl Jung's theories. The free, on-line questionnaire measured how people perceived the world and made decisions.

\*personality analyses and descriptions provided by the 16personalities website

### what do the letters represent?

#### EXTROVERSION & INTROVERSION

Extroverts derived energy from the outside world and people. Introverts get energized from internal thoughts and ideas.

#### SENSING & INTUITION

Sensing-dominant types preferred to perceive things through sight, sound, taste, touch and smell, while intuition-dominant types were drawn to abstract thinking.

#### THINKING & FEELING

This measured how people used judgment. Thinkers relied on logic to judge the world. Feelers based judgment on the emotions a decision will produce.

#### JUDGING & PERCEIVING

Judging-dominant types were more methodical and results-oriented, whereas perceiving-dominant personalities were good multitaskers and were flexible.

#### CHRISTIAN WILLIAMS

"I was surprised to see how accurate the personality descriptions were."
